Additional file 1: Table S1 Publication bias assessment with Egger's test for HT and functional outcome

Publication bias	Egger's *P* value	T&F(Fill) method analysis		Model
		Before	After	
HT	0.019	1.33(1.14-1.56)	1.31(0.99-1.72)	random
Functional outcome	0.001	1.64(1.38-1.94)	1.42(0.86-2.36)	random

Abbreviations: HT: hemorrhagic transformation; Fill: number of studies added by trim and fill method; T&F=result of trimmed and filled analysis, using assumption of random effects.

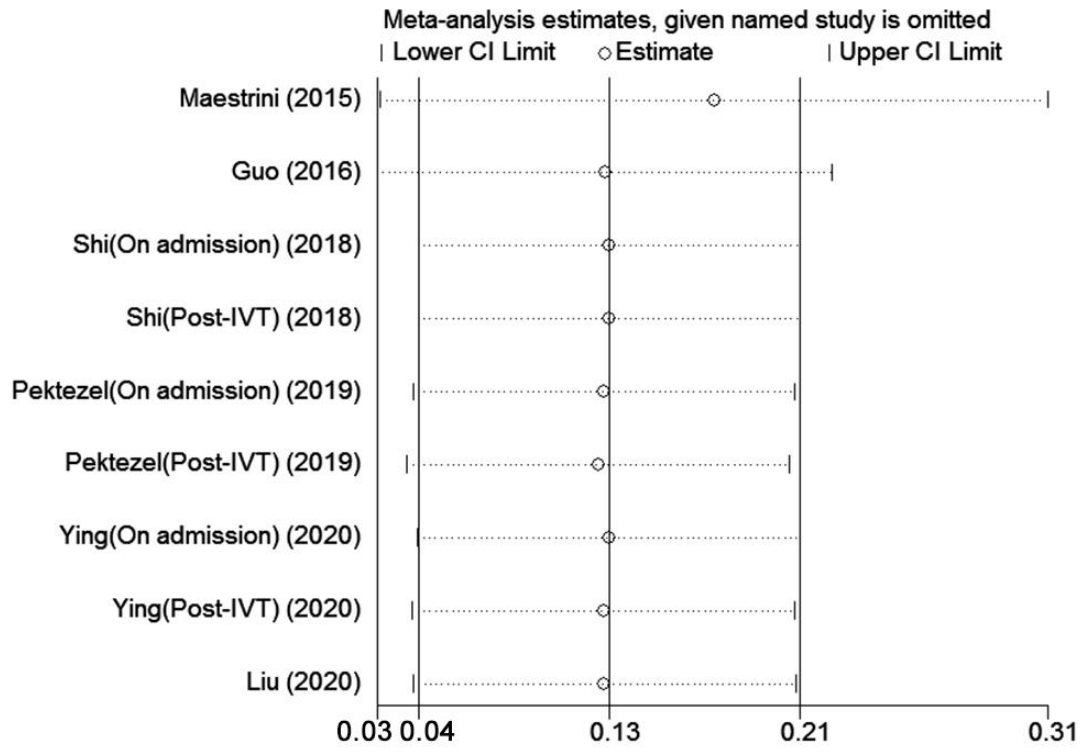

Figure S1 Sensitivity analysis of HT

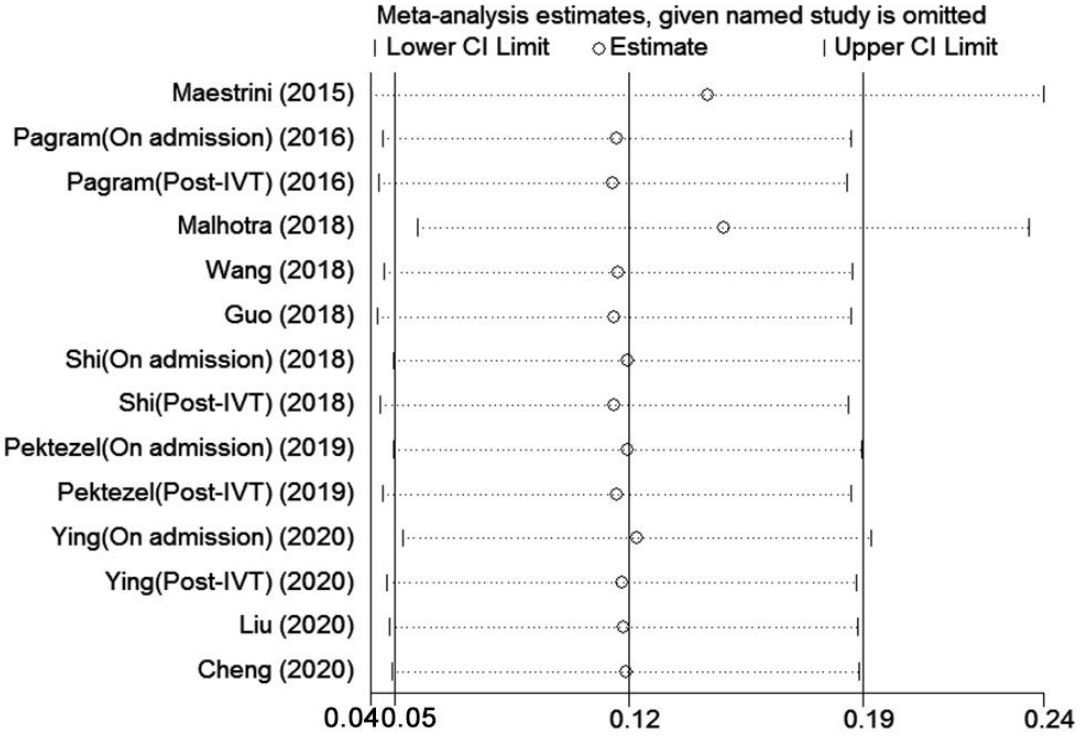

Figure S2 Sensitivity analysis of functional outcome
