Search history: UPDATE SEARCH

The searches are repeated exactly as in the original search, but there is a time limit set: 2018-2020, to capture the latest articles. Among the references identified in the update search, there will be references that have already been identified, this because the original search was performed in November 2018. The period January 2018-November 2018 is covered by both searches.

	with Cochrane Library publication date from Jan 2018 to Mar 2020	665

NOTABENE: The updated search in the Cochrane library identified 325 articles with a publication date from 1999-2018, these were removed from the EndNote library before duplicate checks were performed. The total number of articles identified from Cochrane was therefore 340.
