Supplementary information

Four-item pre-checklist for content validity in AI-based depression screening

Item	**Score**
1. Working definition of depression stated in the study?	Yes ☐ No ☐
2. Does definition fit current clinical standard? E.g. DSM-V, ICD-11?	Yes ☐ No ☐
3. Consultation with psychiatric or clinical experts?	Yes ☐ No ☐
4. Heterogeneity of results (Give brief description)	Yes ☐ No ☐
Total score Yes=1; No = 0	

COSMIN Checklist for content validity

Box D. Content validity (including face validity)				
General requirements		yes	no	?
1	Was there an assessment of whether all items refer to relevant aspects of the construct to be measured?	☐	☐	☐
2	Was there an assessment of whether all items are relevant for the study population? (e.g. age, gender, disease characteristics, country, setting)	☐	☐	☐
3	Was there an assessment of whether all items are relevant for the purpose of the measurement instrument? (discriminative, evaluative, and/or predictive)	☐	☐	☐
4	Was there an assessment of whether all items together comprehensively reflect the construct to be measured?	☐	☐	☐
5	Were there any important flaws in the design or methods of the study?	☐	☐
