Supplementary material 2:

	Formulae
Standardized mean difference	$Standardized\ mean\ difference\ (SMD) = \frac{Mean\ difference}{\sqrt{\frac{SD1^2 + SD2^2}{2}}}$ Where SD = standard deviation
Standard error of the SMD	$Standard\ error\ of\ the\ SMD = \sqrt{\frac{1}{N} + \frac{SMD2}{2N}} \times \sqrt{2(1-r)}$ Where n = number of participants and r = correlation coefficient
