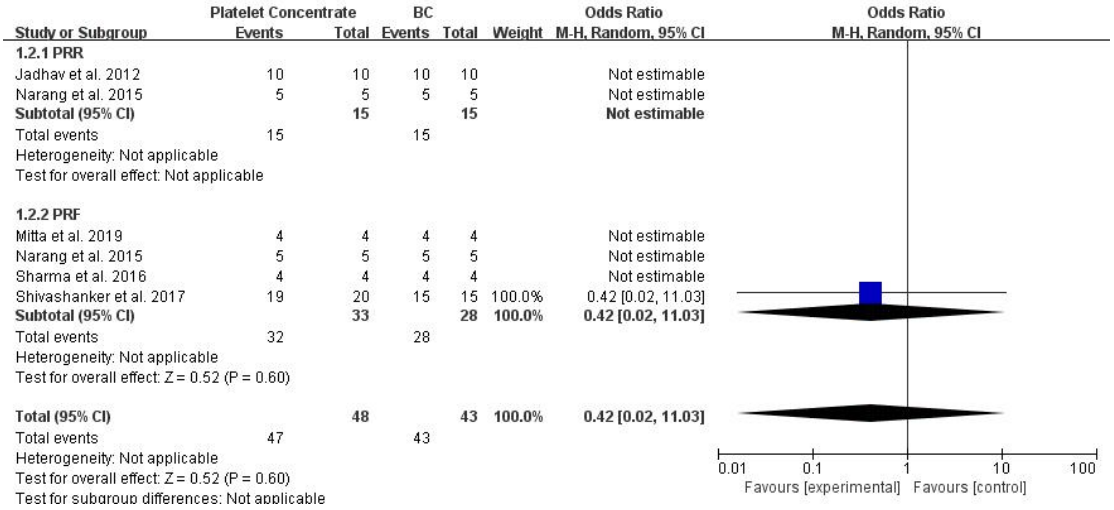
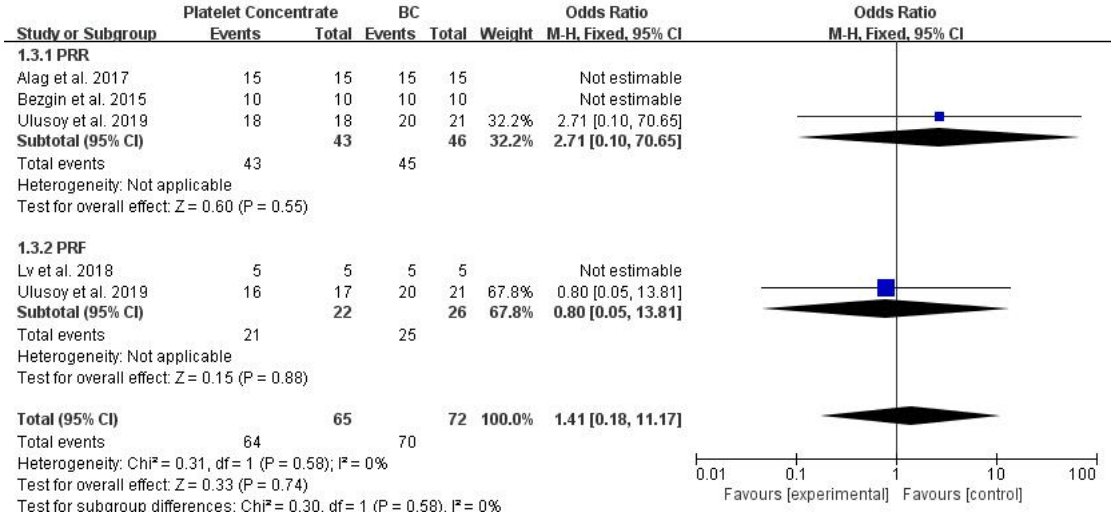
Additional file 5. The forest map of studies involving imechanical instrumentation or not of the canal.

（A）Clinical success

Minimal instrumentation

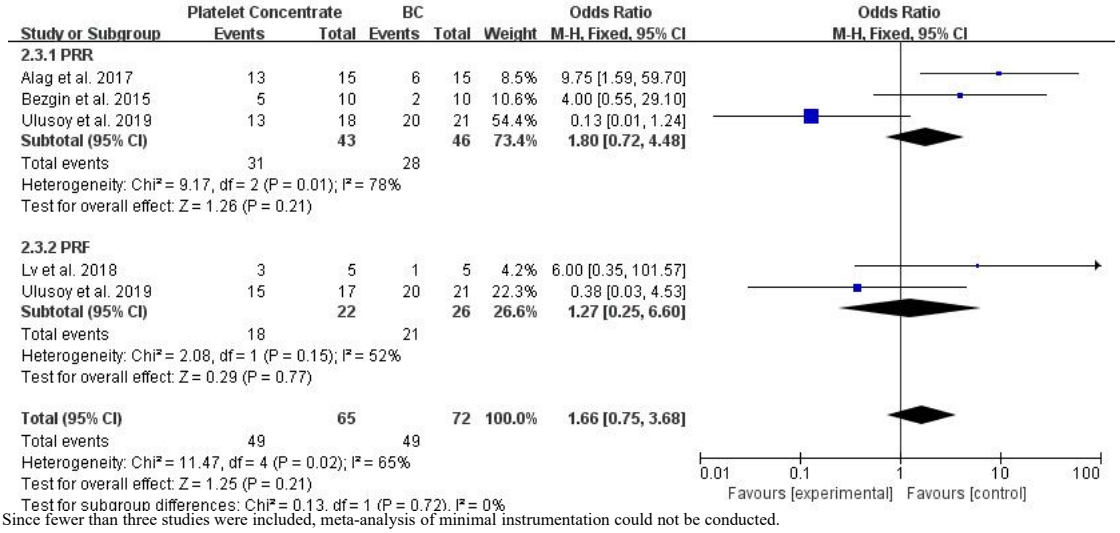


No instrumentation



(B) Response to cold and electric pulp tests.

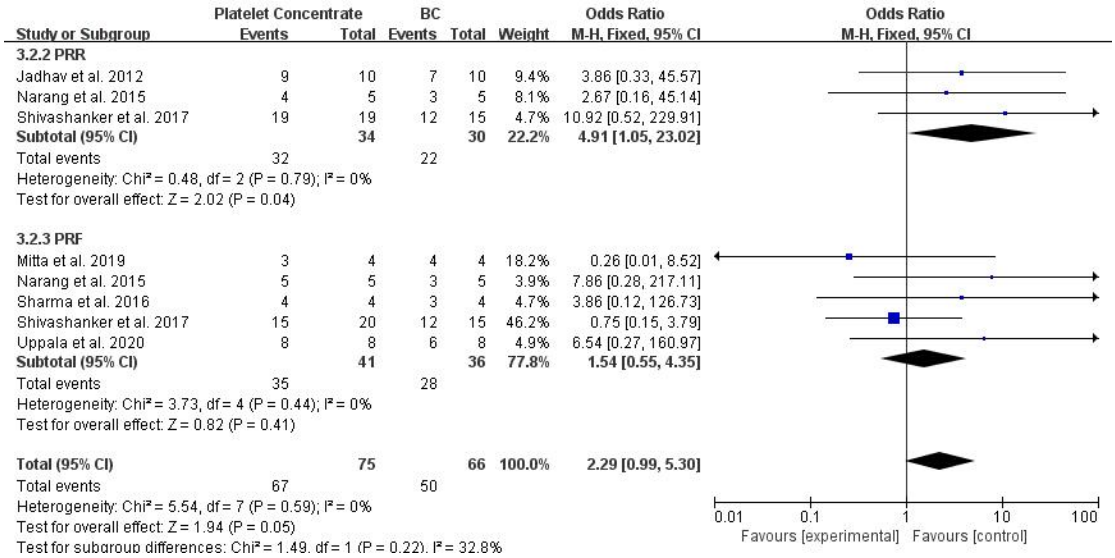
No instrumentation



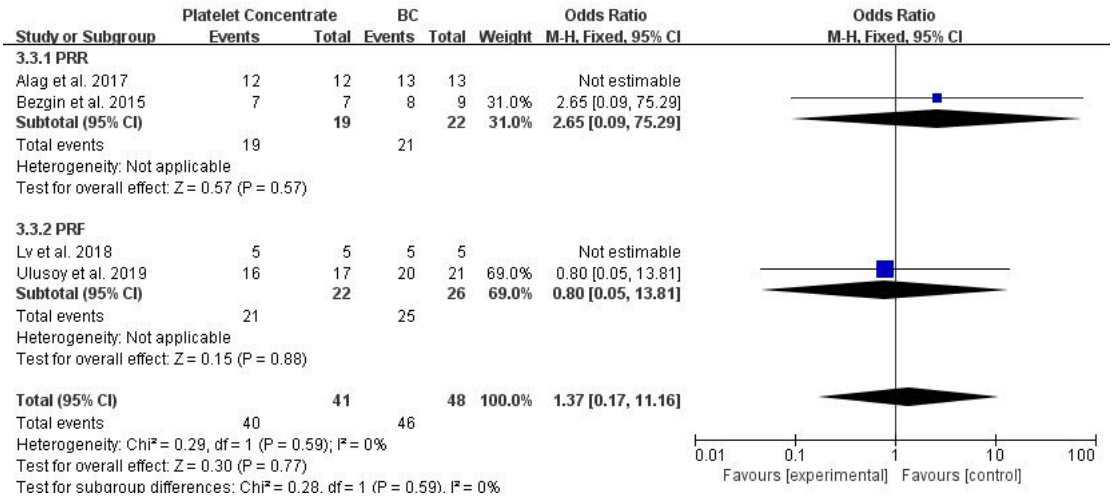
Since fewer than three studies were included, meta-analysis of minimal instrumentation could not be conducted.

(C) Periapical healing.

Minimal instrumentation

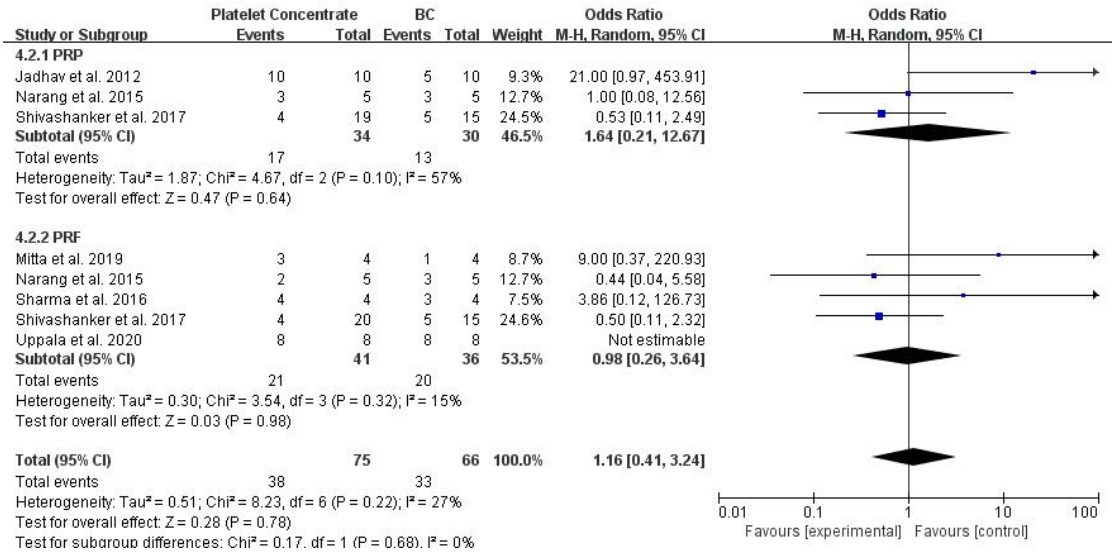


No instrumentation

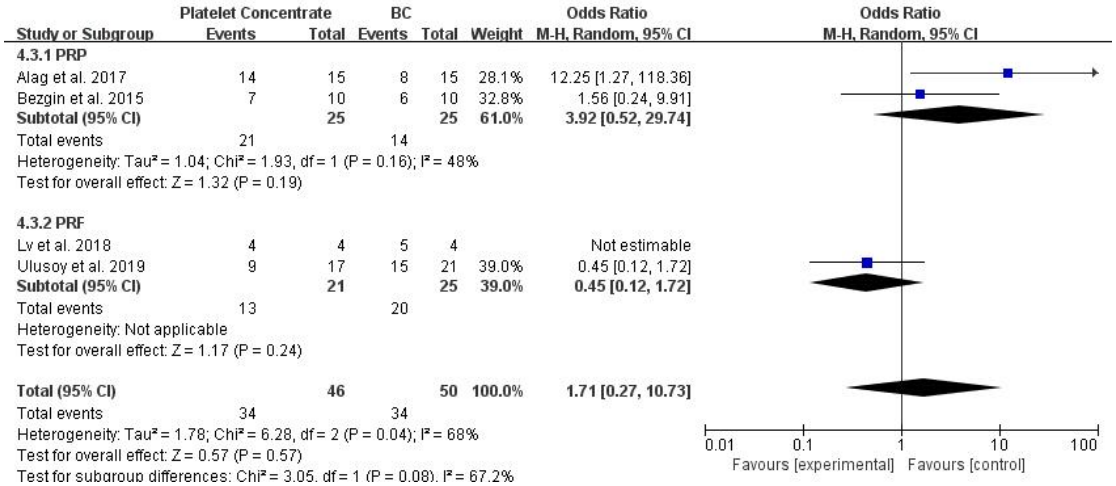


(D) Apex closure.

Minimal instrumentation

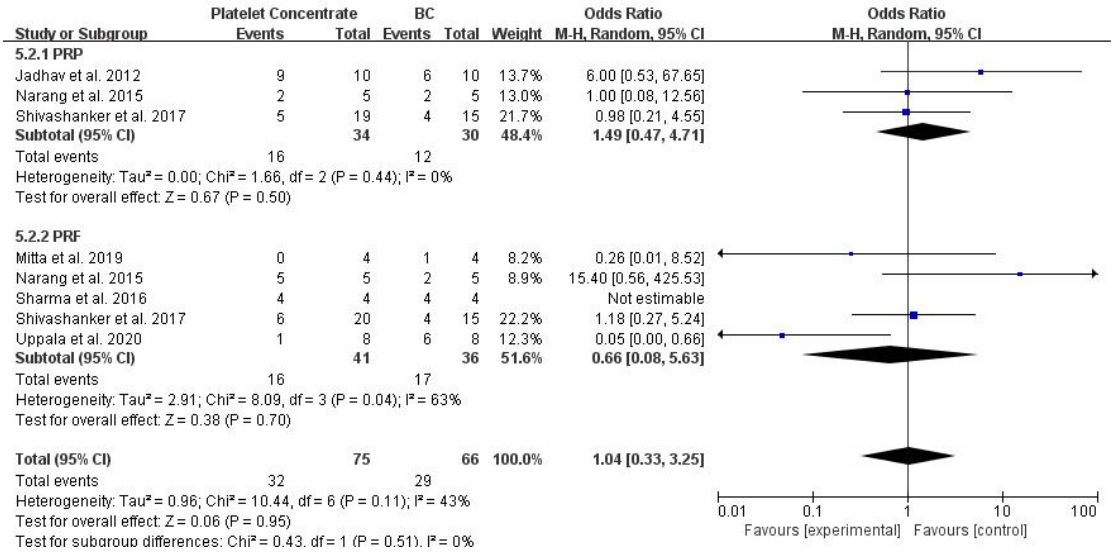


No instrumentation



(E) Root lengthening

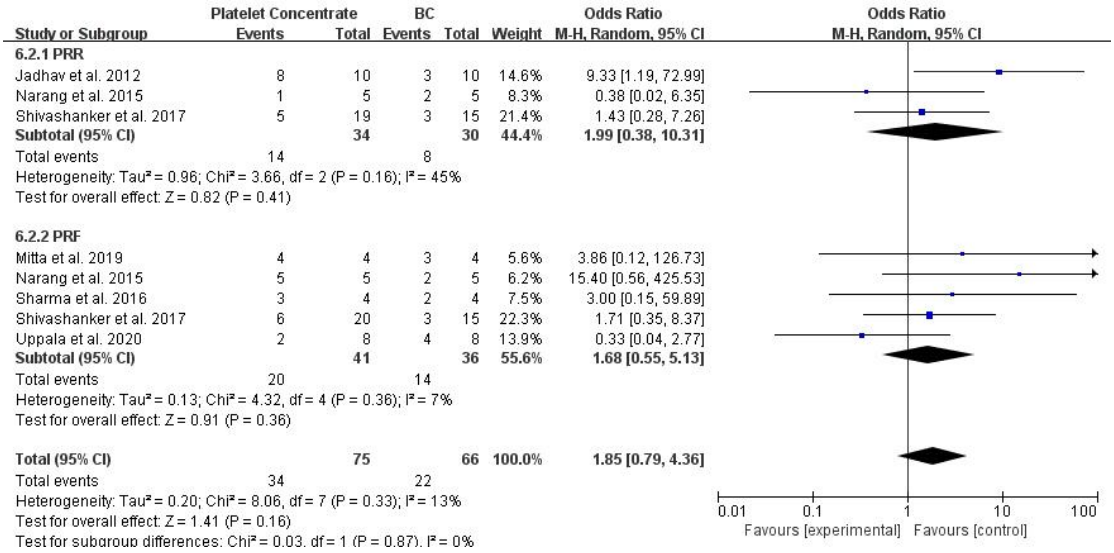
Minimal instrumentation



Since fewer than three studies were included, meta-analysis of no instrumentation could not be conducted.

(F) Root canal thickening.

Minimal instrumentation



Since fewer than three studies were included, meta-analysis of no instrumentation could not be conducted.
