Supplementary1. Risk of bias in Clinical trials

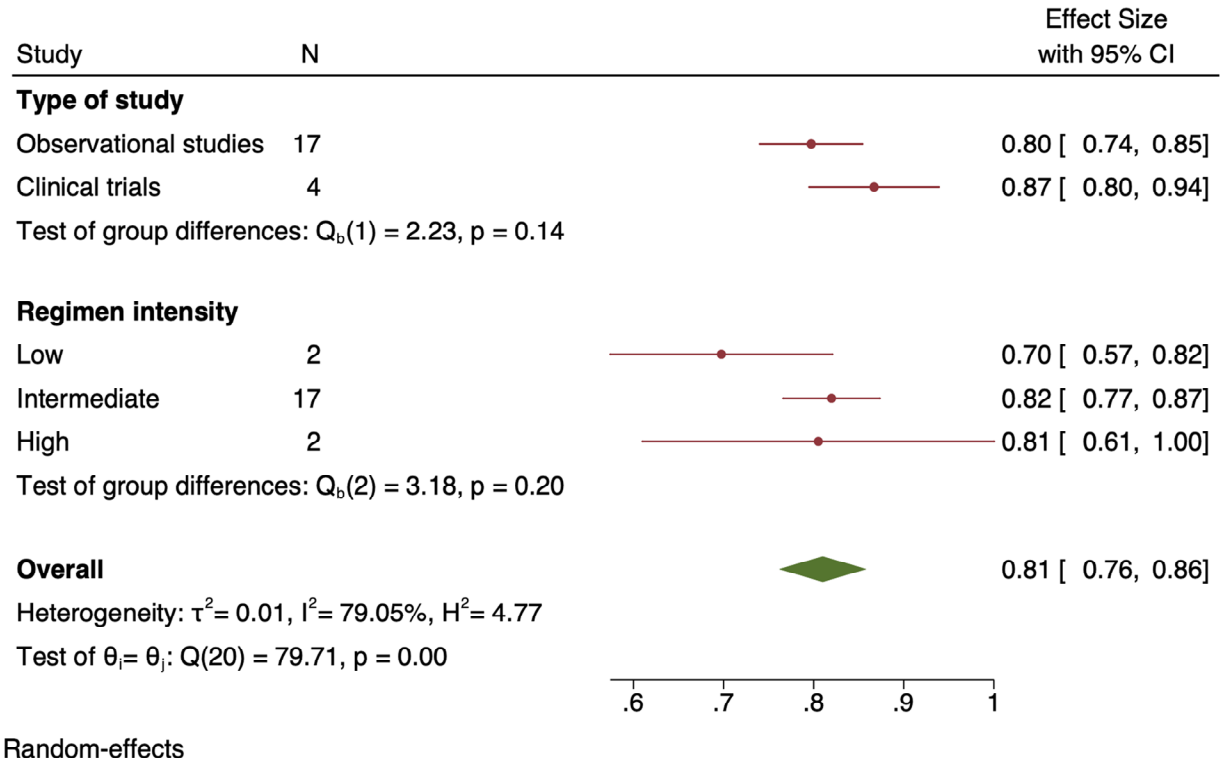

Supplementary2. Publication bias

Publication bias	Begg's test	Egger's test
EDSS	0.737	0.638
ARR	0.433	0.072
PFS	0.842	0.349
RFS	0.221	0.012
MAFS	0.912	0.839
EFS	0.781	0.229
OS	0.458	0.228
TRM	0.836	0.912
MRI new-lesions	0.016	0.071

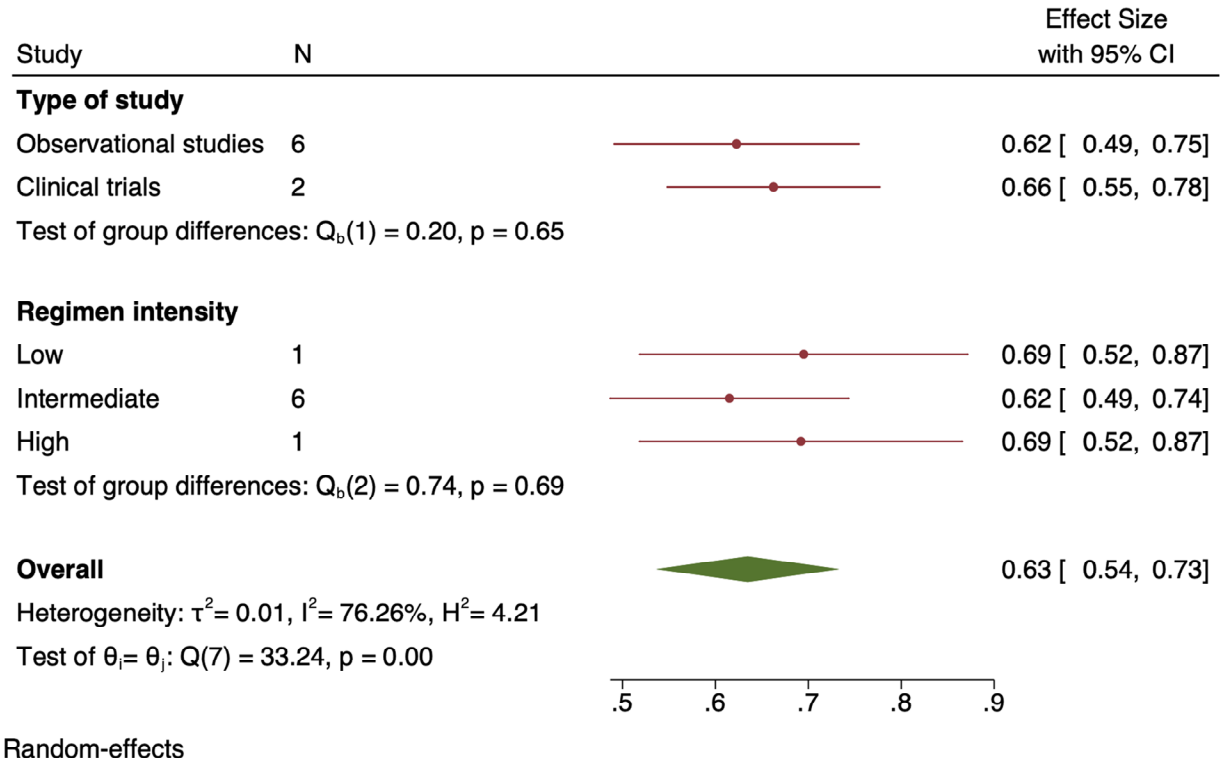

Expanded Disability Status Scale (EDSS) baseline and after treatment, annualized relapse rate (ARR) baseline and after treatment, progression-free survival (PFS), relapse-free survival (RFS), event-free survival (EFS), MRI-activity free survival (MAFS), no evidence of disease activity (NEDA) incidence of new MRI lesions after treatment, overall survival (OS), transplant related mortality (TRM).

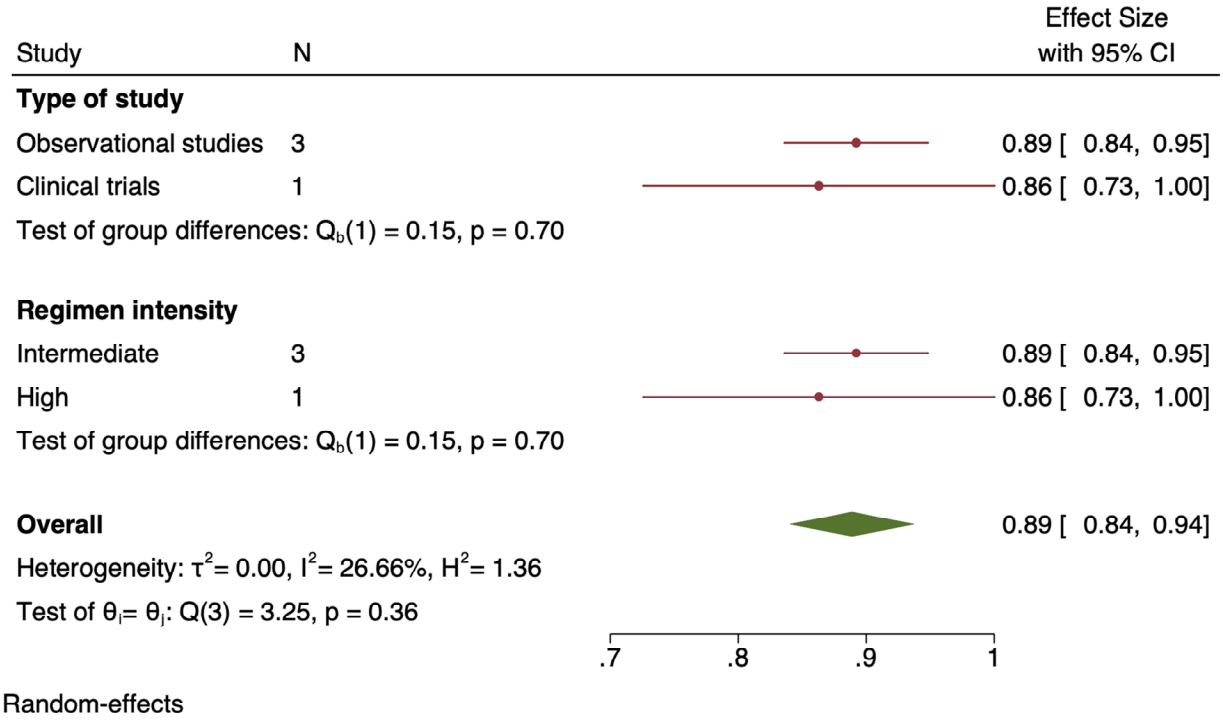

Supplementary3. Forest plot of progression-free survival after treatment

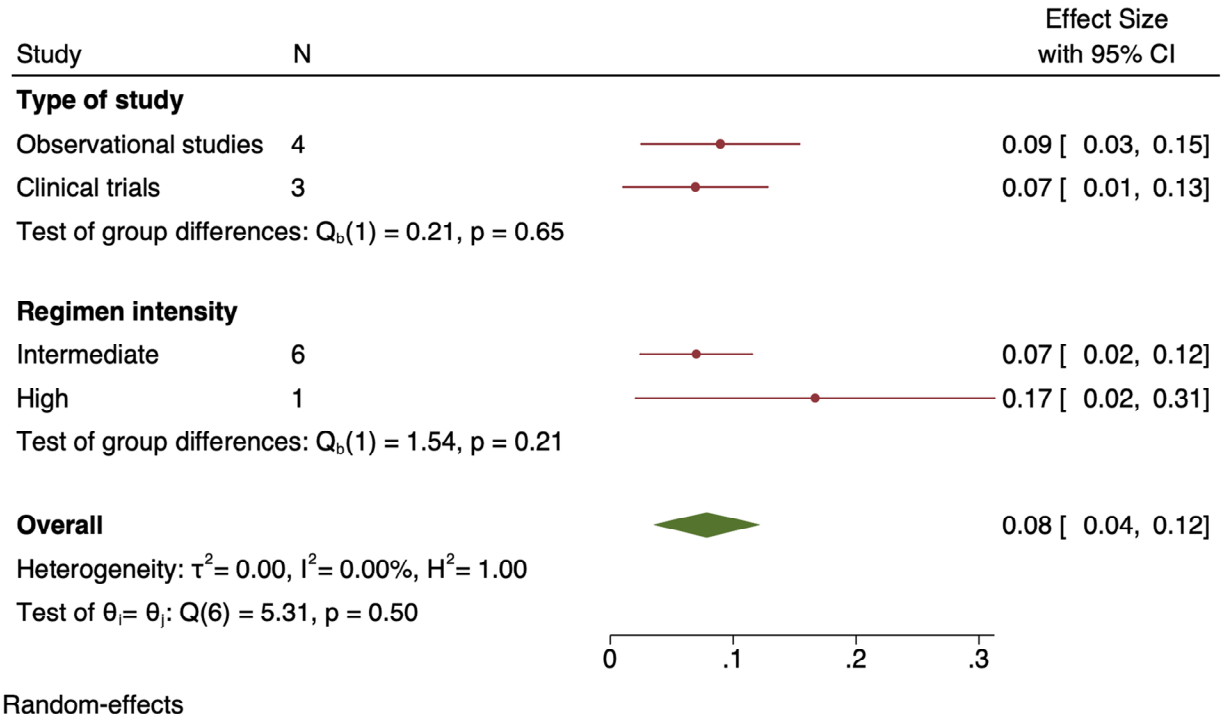

Supplementary4. Forest plot of relapse-free survival after treatment

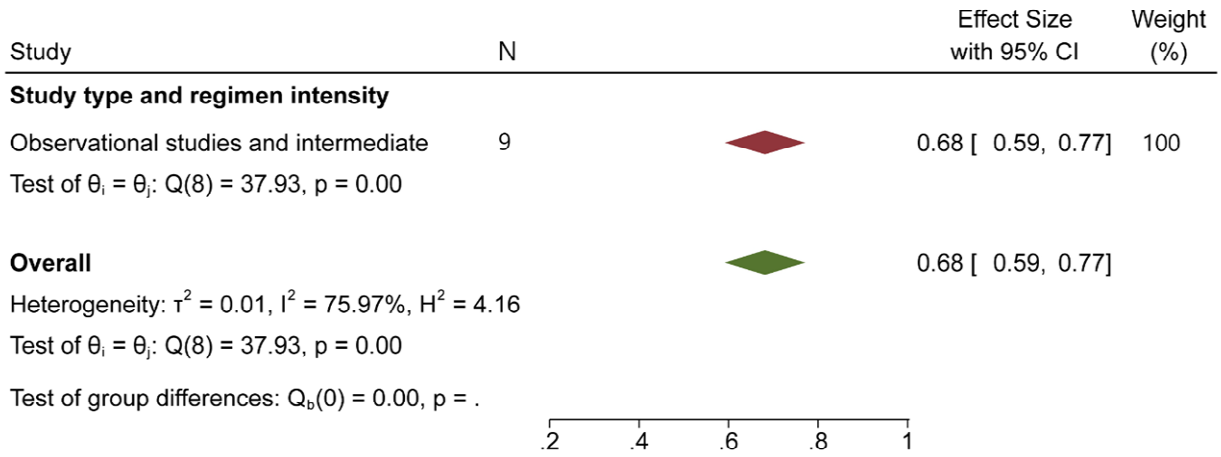

Supplementary5. Forest plot of event-free survival after treatment

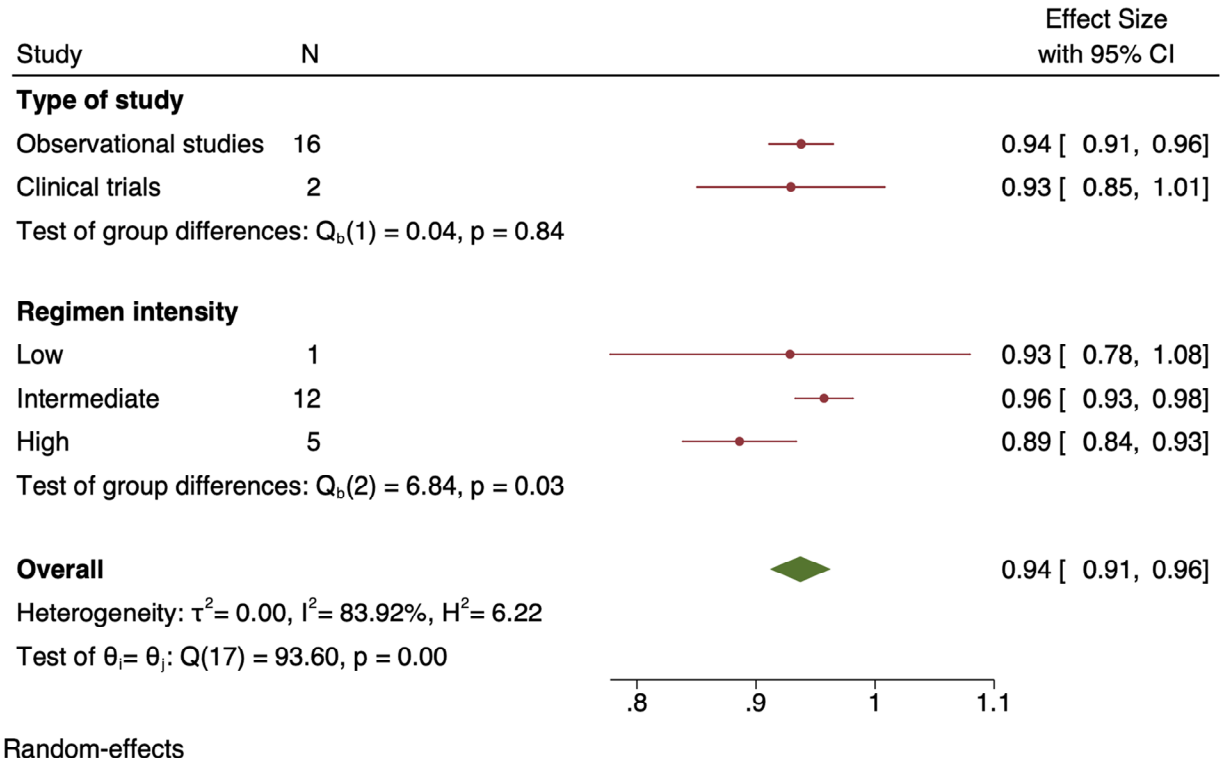

Supplementary6. Forest plot of MRI-activity free survival after treatment

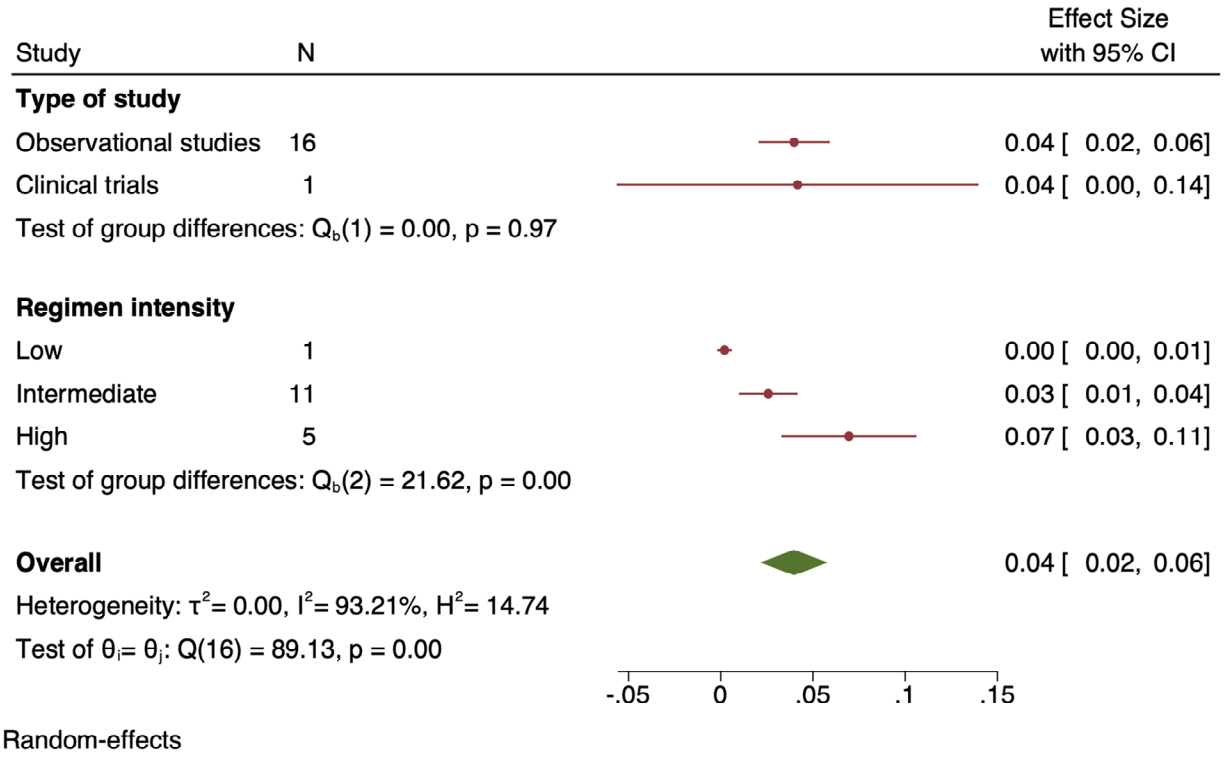

Supplementary7. Forest plot of MRI new-lesions after treatment

Supplementary8. Forest plot of NEDA after treatment

Supplementary9. Forest plot of overall survival after treatment

Supplementary10. Forest plot of transplant related mortality after treatment
