Supplementary Table 2: Risk of bias of included studies using Risk of Bias In Non-Randomised Studies-of Exposures (ROBINS-E)

Review	Risk of bias due to confounding	Risk of bias in selection of participants into the study	Risk of bias in classification of exposure(s)	Risk of bias due to inappropriate adjustment (e.g. adjusting for potential mediators)	Risk of bias due to missing data	Risk of bias in measurement of outcomes	Risk of bias in selection of the reported result	Overall bias
