Supplementary file 4

Results from network network meta-analysis

The size of the nodes corresponds to the total number of participants that study the treatments. The (directly) comparable treatments are linked with a line. The thickness of the line corresponds to the standard error of trials that study this comparison. The colours of the line corresponds to the quality of trials that study this comparison. low risk of bias [green] ,moderate risk of bias [yellow]. EPN: enteral nutrition and/or adjuvant peripheral parenteral nutrition. TPN: total parenteral nutrition.

Figure S 4.1 Network plot of all intervention comparisons for nosocomial infection

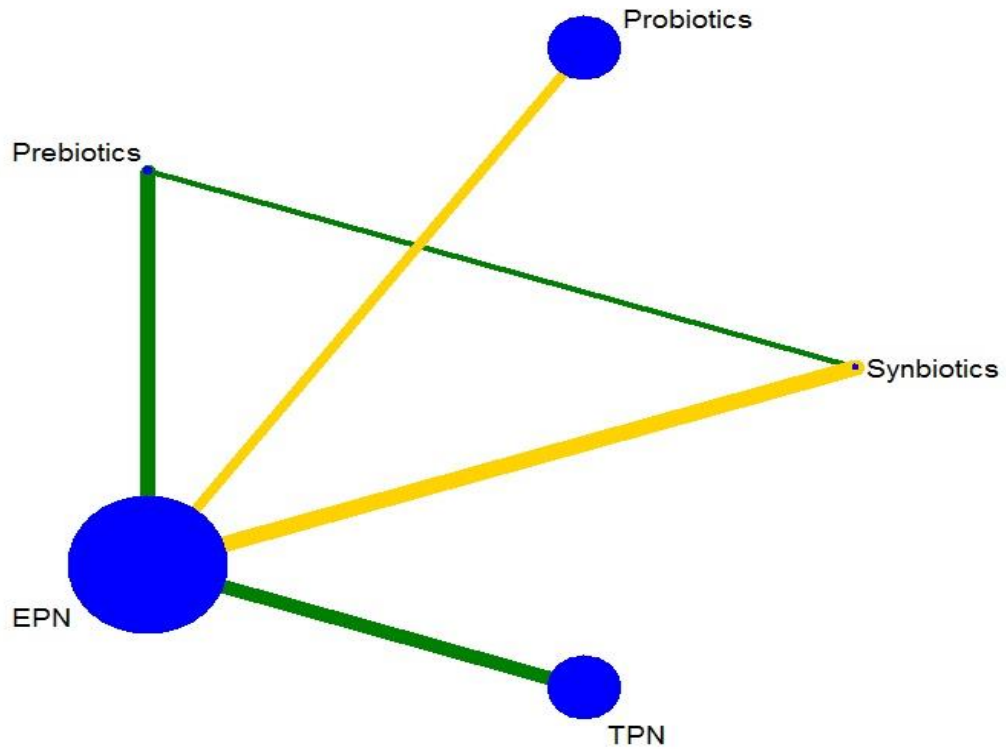

Figure S 4.2 Network plot of all intervention comparisons for bloodstream infection

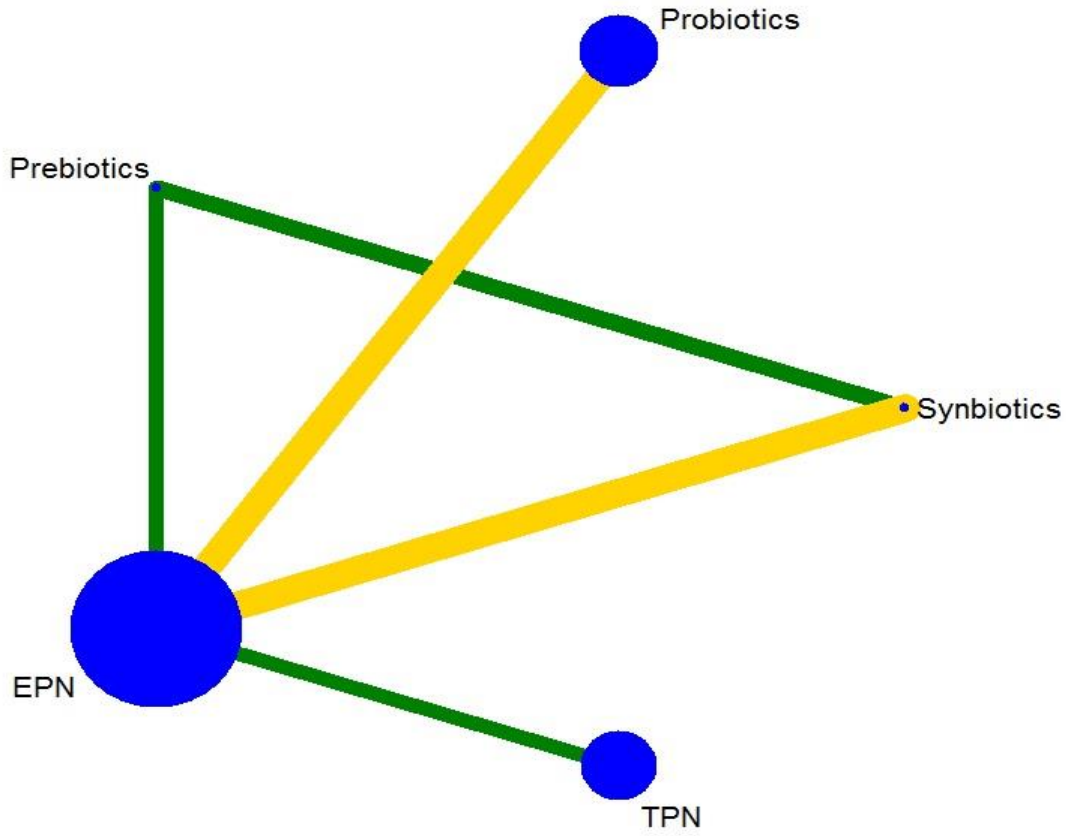

Figure S 4.3 Network plot of all intervention comparisons for urinary tract infection

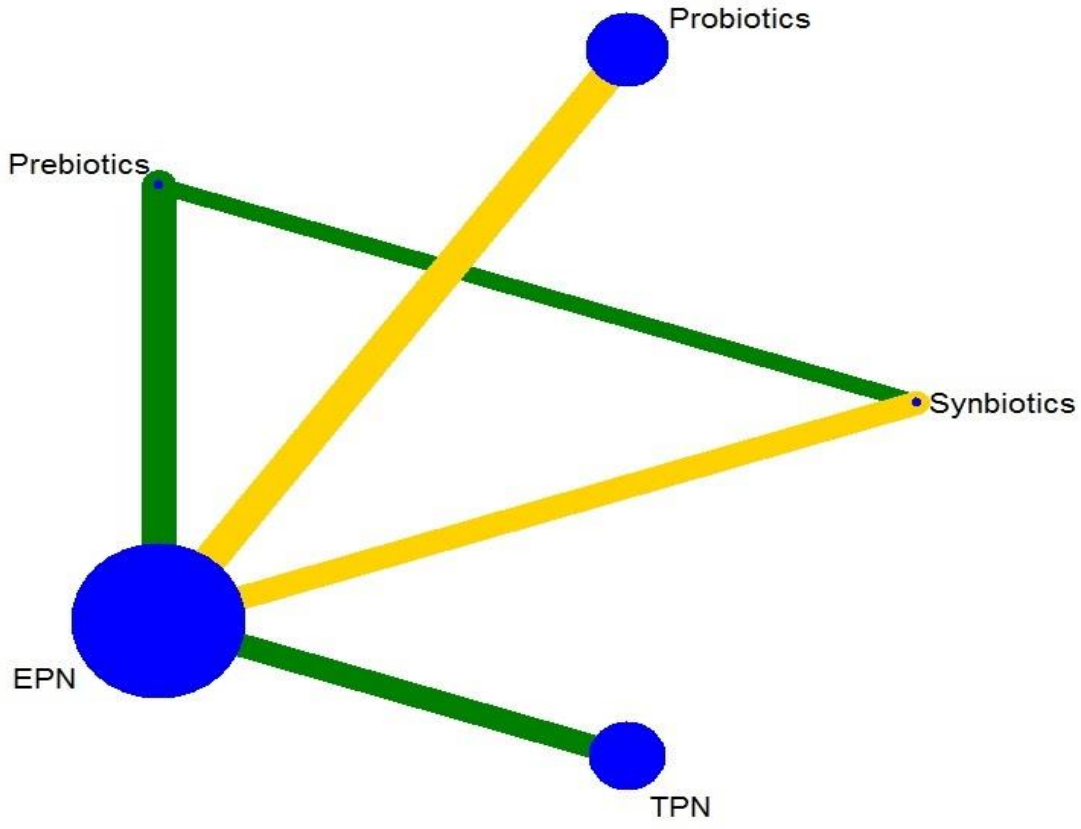

Figure S 4.4 Network plot of all intervention comparisons for diarrhea

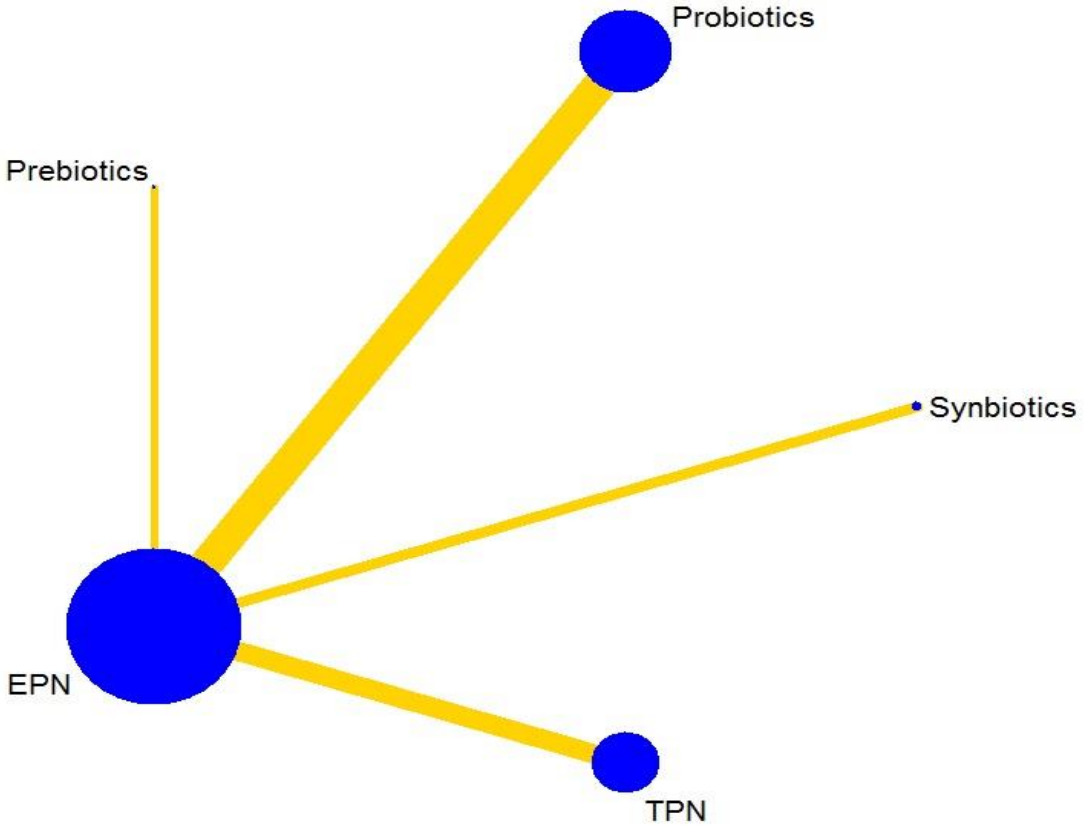

Figure S 4.5 Network plot of all intervention comparisons for hospital mortality

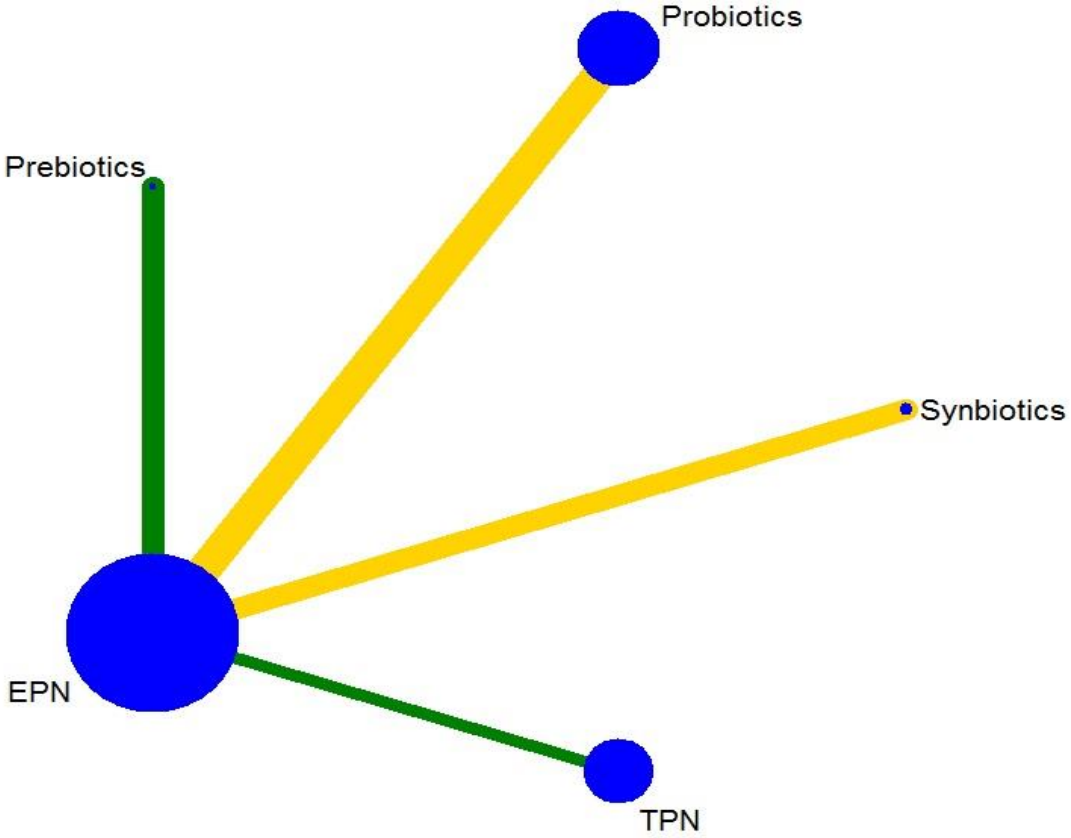

Figure S 4.6 Network plot of all intervention comparisons for ICU mortality

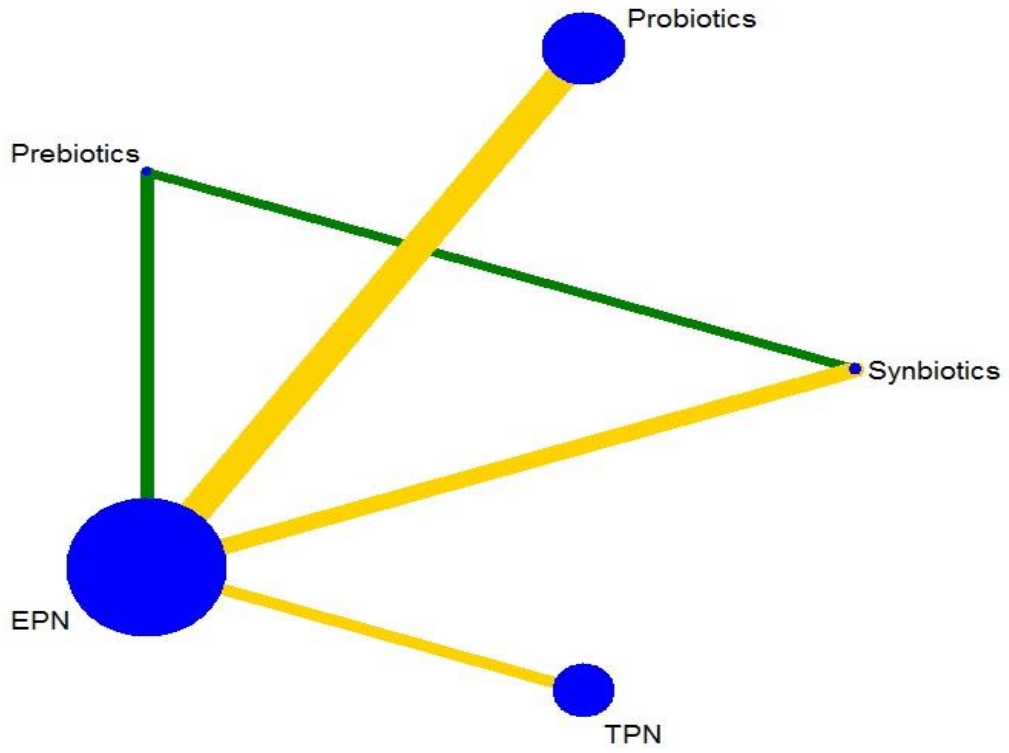

Figure S 4.7 Network plot of all intervention comparisons for hospital lengtn of stay

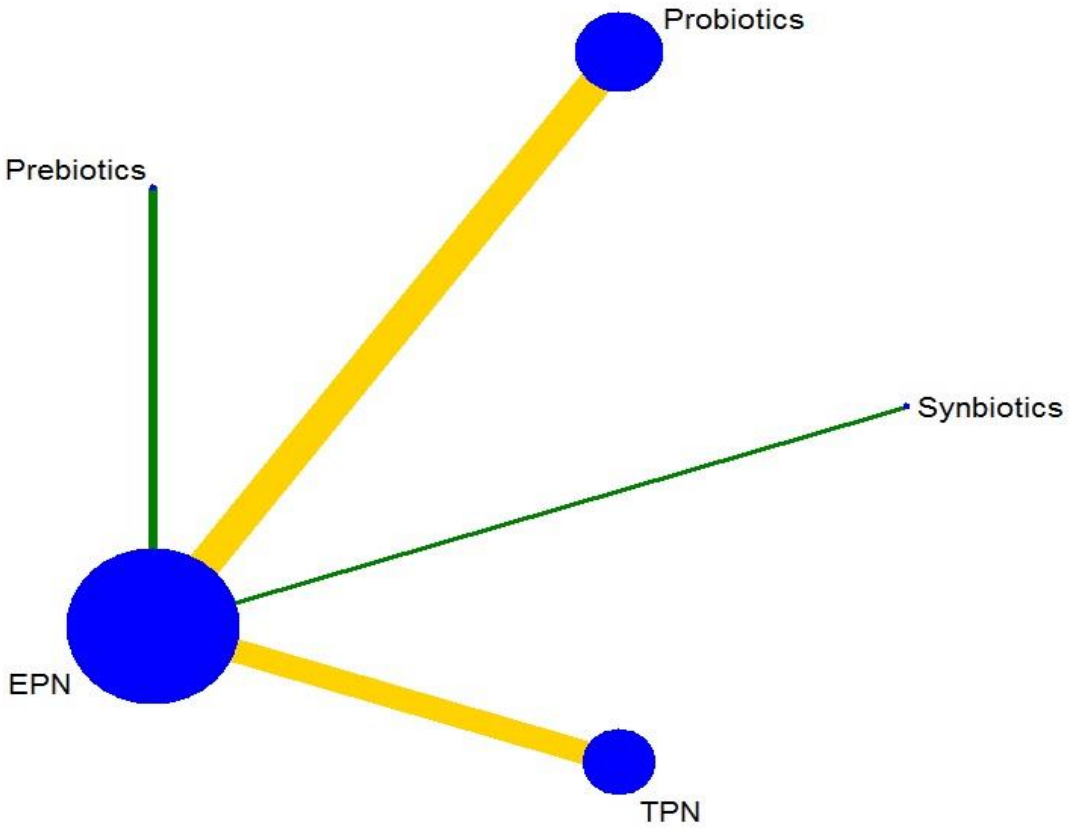

Figure S 4.8 Network plot of all intervention comparisons for ICU length of stay

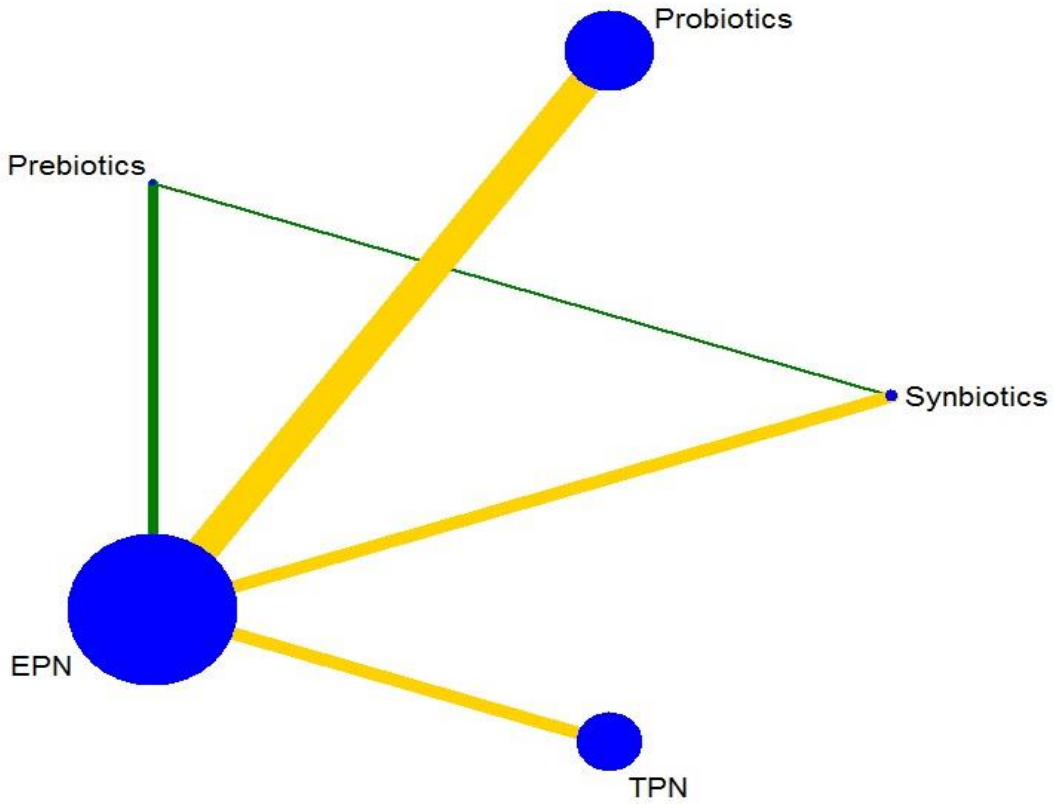

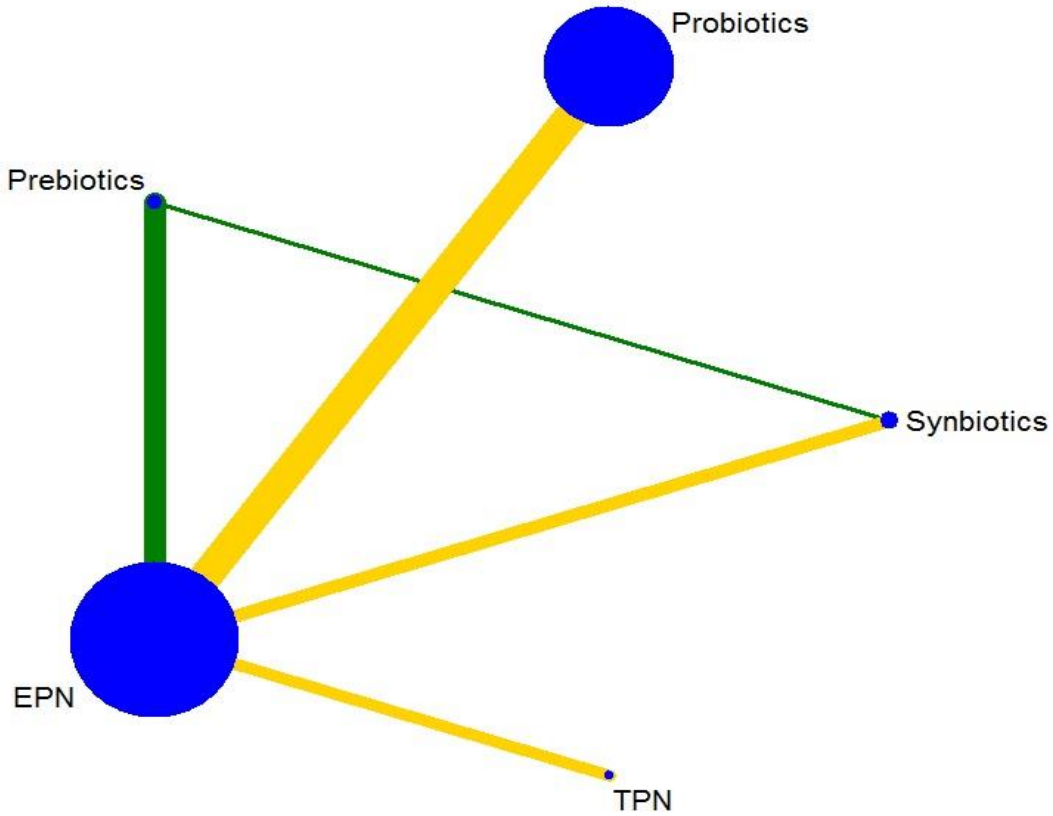

Figure S 4.9 Network plot of all intervention comparisons for the duration of mechanical ventilation
