**Supplementary Table 3. Median number of specimens tested and percent positive for influenza, by age group, study design, and population among all data sources**

| | Number of data sources (n=112) | Median total number specimens tested | Interquartile Range (IQR) | | Median percent positive | IQR | | p-value |
|---|---|---|---|---|---|---|---|---|
| **All adults** | 112 | **361** | 183 | 1137 | **11%** | 7% | 19% | |
| **Age group** | | | | | | | | |
| Adults <65 years* | 50 | **727** | 319 | 1934 | **15%** | 9% | 21% | 0.28 |
| Adults ≥65 years | 48 | **219** | 90 | 667 | **13%** | 8% | 17% | |
| **Data source** | | | | | | | | |
| GRIPP Surveillance datasets | 37 | **1308** | 565 | 3222 | **15%** | 10% | 20% | 0.011 |
| Published papers | 75 | **242** | 129 | 470 | **10%** | 6% | 17% | |
| **Timeframe** | | | | | | | | |
| Pre-2009 data only | 45 | **187** | 119 | 296 | **8%** | 5% | 16% | 0.016 |
| Post-2009 data only | 61 | **569** | 328 | 1890 | **14%** | 8% | 20% | |
| Pre- & post-2009 data | 6 | **2294** | 1188 | 7487 | **10%** | 10% | 15% | |
| **Diagnostic Test** | | | | | | | | |
| RT-PCR only | 40 | **452** | 204 | 1161 | **14%** | 8% | 20% | 0.58 |
| Immunofluorescence only | 12 | **556** | 397 | 1053 | **9%** | 6% | 15% | |
| Serological assay only | 13 | **250** | 135 | 338 | **11%** | 6% | 16% | |
| Multiple tests, including RT-PCR | 38 | **455** | 189 | 1755 | **10%** | 7% | 17% | |
| Multiple tests, excluding RT-PCR | 6 | **121** | 80 | 174 | **14%** | 7% | 21% | |
| Other† | 3 | **340** | 321 | 412 | **9%** | 9% | 16% | |
| **Case definition** | | | | | | | | |
| Acute respiratory infection (ARI) | 7 | **266** | 164 | 312 | **9%** | 6% | 13% | 0.0014 |
| Lower respiratory infection (LRI) | 8 | **850** | 516 | 3697 | **14%** | 11% | 15% | |
| Pneumonia | 32 | **189** | 127 | 302 | **7%** | 6% | 11% | |
| Severe acute respiratory infection (SARI) | 35 | **1308** | 444 | 3213 | **17%** | 11% | 20% | |
| Other‡ | 30 | **412** | 190 | 579 | **10%** | 5% | 18% | |

| High | 45 | **240** | 124 | 328 | **9%** | 4% | 16% | |

*Gaps in age-specific estimates due to lack of outcome data stratified by age group.

† Includes rapid immunochromatographic assay (n=2), virus culture (n=1).

‡ Includes acute exacerbation of chronic obstructive pulmonary disease (COPD) (n=14), respiratory hospitalization (acute or non-acute) (n=10), acute exacerbation of asthma (n=3), acute febrile illness (n=2), intubation among intensive care unit (ICU) patients (n=1), acute respiratory distress syndrome (ARDS) (n=1), ICD codes consistent with influenza (n=1), and acute coronary syndrome with recent influenza-like illness (n=1).

¶ Includes studies of populations with COPD (n=10), hospitalised in the ICU only (n=3), immunocompromising conditions (n=1), asthma (n=1), heart disease (n=1), or in the military (n=1)
