Additional file 4: Methodological quality of included studies

The "JBI critical appraisal checklist for qualitative research (2020)" from the JBI Manual of Evidence Synthesis (1) was used for this systematic review. Responses are coded as yes (Y), no (N), or unclear (U). For qualitative studies all questions in the checklist were used. For "other evaluation studies" with qualitative findings, Q1 to Q7 were considered not applicable (N/A).*

*For the purposes of this review "qualitative studies" referred to studies with an explicit qualitative methodological approach (e.g. phenomenology). "Other evaluation studies" refers to studies incorporating a qualitative inquiry component (e.g. user feedback study) but without an explicit qualitative methodological approach.

Table 1: Studies with qualitative findings
