Supplementary material

Supplementary Figure 1 Forest plot showing odds ratio of intra-abdominal sepsis comparing preoperative ustekinumab and anti-TNF
CI, confidence interval; TNF, tumor necrosis factor

Supplementary Table 1 MOOSE checklist for meta-analyses of observational studies [20]

Item No	Recommendation	Reported on page No
Reporting of background should include		
1	Problem definition	5
2	Hypothesis statement	-
3	Description of study outcome(s)	7
4	Type of exposure or intervention used	5-6
5	Type of study designs used	5-6
6	Study population	6
Reporting of search strategy should include		
7	Qualifications of searchers (e.g., librarians and investigators)	6, Title page
8	Search strategy, including time period included in the synthesis and key words	6, Table 1
9	Effort to include all available studies, including contact with authors	6
10	Databases and registries searched	6
11	Search software used, name and version, including special features used (e.g., explosion)	6
12	Use of hand searching (e.g., reference lists of obtained articles)	6
13	List of citations located and those excluded, including justification	8, Fig. 1
14	Method of addressing articles published in languages other than English	6
15	Method of handling abstracts and unpublished studies	6
16	Description of any contact with authors	6
Reporting of methods should include		
17	Description of relevance or appropriateness of studies assembled for assessing the hypothesis to be tested	6-7
18	Rationale for the selection and coding of data (e.g., sound clinical principles or convenience)	6-7

(Contd...)

Item No	Recommendation	Reported on page No
19	Documentation of how data were classified and coded (e.g., multiple raters, blinding and interrater reliability)	6-7
20	Assessment of confounding (e.g., comparability of cases and controls in studies where appropriate)	7
21	Assessment of study quality, including blinding of quality assessors, stratification or regression on possible predictors of study results	6,8, Table 1
22	Assessment of heterogeneity	7
23	Description of statistical methods (e.g., complete description of fixed or random effects models, justification of whether the chosen models account for predictors of study results, dose-response models, or cumulative meta-analysis) in sufficient detail to be replicated	7
24	Provision of appropriate tables and graphics	Tables 1-2, Fig. 1-4
Reporting of results should include		
25	Graphic summarizing individual study estimates and overall estimate	Fig. 2-4
26	Table giving descriptive information for each study included	Table 2
27	Results of sensitivity testing (e.g., subgroup analysis)	9
28	Indication of statistical uncertainty of findings	10-12
Reporting of discussion should include		
29	Quantitative assessment of bias (e.g., publication bias)	10
30	Justification for exclusion (e.g., exclusion of non-English language citations)	6
31	Assessment of quality of included studies	8-9
Reporting of conclusions should include		
32	Consideration of alternative explanations for observed results	10-12
33	Generalization of the conclusions (i.e., appropriate for the data presented and within the domain of the literature review)	12
34	Guidelines for future research	12
35	Disclosure of funding source	1
