Additional file 09. A comprehensive list of all reported primary and secondary outcome domains, classified according to the Dodd *et al.* (2018) taxonomy. Categories within each core area are arranged by the most frequently used first. The number of individual studies that reported each primary and secondary domain is also listed. - = none reported.

Taxonomy core area	**Taxonomy categories** (number of studies reporting as primary / secondary outcome)	**Outcome domain**	**Number of times primary outcome domain reported** (number of studies reporting as primary outcome)	**Number of times (n) secondary outcome domain reported** (number of studies reporting as secondary outcome)
