Note: ①whether genotyping methods were mentioned, ②whether to stratify the targeted population, ③whether to provide methods to infer genotypes, ④if the control group satisfied Hardy-Weinberg equilibrium (HWE), ⑤if the study could be

repeated, ⑥ if targeted population, inclusion, and exclusion criteria were described, ⑦ whether to describe statistical methods and software, ⑧ whether to provide methodologies of multiple comparisons, handling false-positive findings or correcting relatedness, ⑨ whether the provided information was sufficient.
