Supplementary Table S2. Description of the studies

Study	Design	N[a]	Patient population	Treatment groups	Treatment duration, months
Koester et al. 2010	Multicentre, prospective, open-label, non-interventional	344	Chronic stable angina pectoris	Ivabradine + beta-blockers	4
Werdan et al. 2012	Multicentre, prospective, open-label, non-interventional	2330	Stable angina pectoris	Ivabradine + beta-blockers	1 and 4
Zaky et al. 2013	Prospective	20	Chronic stable ischaemic heart disease	Ivabradine + beta-blockers	4
Zarifis et al. 2015	Multicentre, prospective, non-interventional	2403	Stable angina pectoris	Ivabradine + beta-blockers	1 and 4
Perings et al. 2016	Multicentre, prospective, open-label, non-interventional	798	Chronic stable angina in routine clinical practice	Ivabradine ± beta-blockers	1 and 4
Glezer et al. 2018	Multicentre, prospective, open-label, randomised	876	Stable angina	Ivabradine + beta-blockers vs up-titration of beta blockers	1 and 4
Kashtalap et al. 2019	Single-centre, prospective, observational	50	Stable angina pectoris	Ivabradine + beta-blockers	1

[a]Data are the number of patients receiving ivabradine + beta-blockers
