Additional File 5:

Title:

Prevalence / incidence of cough of children consulting in primary care (all studies)

Legend:

* = study included solely children <5/<6/<7 years, § = study included solely children <12/<14/<15 years, ~ = study included solely children 5-17 years, CI = confidence interval, k = number of consultations because of a cough / (incidental) reasons for encounter because of a cough / patients in consultation for a cough, N = total number of consultations / (incidental) reasons for encounter / patients in consultation
