Supplemental Tables for:
The inconsistent and inadequate reporting of irAE in PD-1/PD-L1 inhibitors: a systematic review of randomized controlled clinical trials
Zhi Peng et al.

Supplementary table S1. Revised harms extension of CONSORT Checklist

Item	Item description	Criteria	Criteria Description
1	If the study collected data on harms and benefits, the title or abstract should so state.	1a	AE mentioned in title.
		1b	AE mentioned in abstract.
2	If the study collected data on harms and benefits, the introduction should so state.	2a	irAE addressed in introduction.
3	List addressed AEs with definitions of each	3a	Does the methods section provide a list of specific irAEs to be assessed.
		3b	Does the study provide justification for the selection of irAEs.
		3c	Does the methods section provide a definition of the irAEs.
		3d	Was the severity of irAEs assessed.
		3e	If yes was a validated instrument used and which one?
4	Clarify how harms related information was collected (in the main manuscript but not the appendix protocal)	4a	Is there a description of the method of collection of irAE data?
		4b	If Yes - How was the irAE data collected. e.g. patient report, clinician/researcher assessment, interviews, diary.
		4c	Is the timing of irAE data collection described. e.g. baseline, follow-up.
5	Describe plans for presenting and analysing information on harms	5a	Does the methods section provide a description of the methods for analysis of irAEs?
6	Describe for each arm the participant withdrawals that are a result of harms and their experiences with the allocated treatment	6a	Does the study report withdrawals or conversions attributed to irAEs? (this may be stated as inability to tolerate drugs or similar wording)
		6b	If yes what was the percentage withdrawal or conversion from each arm due to irAEs or inability to tolerate treatment?
		6c	Does the study report specify the irAEs leading to withdrawal or inability to tolerate treatment?
7	Provide the denominators for analyses of harm.	7a	Does the study report the number at baseline for each arm?

		7b	Does the study report the number included in any analysis of irAEs?

8	Present the absolute risk per arm and per AE type .... and present appropriate metrics etc.	8a	Does the study present quantitative data for irAEs?
		8b	Does the study tabulate results for irAEs?
		8c	Does the study present results of irAEs separately for each arm?
9	Describe any sub group analyses.	9a	Has the study conducted any sub-group analyses with respect to irAEs?
10	Provide a balanced discussion of benefits and harms with emphasis on study limitations etc.	10a	Are irAEs addressed in the discussion?
		10b	If yes did irAE results influence study conclusions?

Supplementary table S2. Basic characteristics of trials

Author	Year	N	Phase	Tumor type	Experimental arm	Controlled arm	Treatment line	No. of irAE type	ACS
Nivolumab									
H. Borghaei	2015	582	3	NSCLC	Nivolumab	Docetaxel	2	7	0.39
Julie Brahmer	2015	272	3	NSCLC	Nivolumab	Docetaxel	2	7	0.39
R.J. Motzer	2015	821	3	Renal-cell carcinoma	Nivolumab	Everolimus	2	NA	0.09
R.L. Ferris	2016	361	3	HNSCC	Nivolumab	Methotrexate/docetaxel/cetuximab	2	7	0.35
Caroline Rober	2015	418	3	Melanoma	Nivolumab	Dacarbazine	1	6	0.48
D.P. Carbone	2017	423	3	NSCLC	Nivolumab	Platinum doublet	1	6	0.43
Yoon-Koo Kang	2017	493	3	Gastric/GEJ cancer	Nivolumab	BSC	3	5	0.35
James Larkin	2018	272	3	Melanoma	Nivolumab	Dacarbazine/carboplatin+paclitaxel	2	NA	0.09
Jeffrey S Weber	2015	405	3	Melanoma	Nivolumab	Dacarbazine/paclitaxel+carboplatin	2	7	0.39
Ken Kato	2019	419	3	Oesophageal SCC	Nivolumab	Paclitaxel/docetaxel	2	NA	0.09
Pembrolizumab									0.00
Martin Reck	2016	305	3	NSCLC	Pembrolizumab	Platinum doublet	1	6	0.52
J. Bellmunt	2017	542	3	Urothelial carcinoma	Pembrolizumab	Paclitaxel/docetaxel/vinflunine	2	7	0.30
