Appendix 2. Extraction sheet

Appendix 2, Extraction terms	
Background details	First author surname Year Title Country Region Intervention- Funding source Evaluation- Funding source Author email address

Study Context	Study location:
	rural=1;
	urban=2;
	peri-urban=3;
	mixed (urban/rural/peri-urban)=4
	Background and history of groups
	(who formed, trained and maintained the groups in the study areas)
	Health system strength/indicators
	(in author's words- the health systems setting, the important health indicators talked about in the study area)
	Specific policy environment towards groups (NRLM, linkages with other devlopment programmes)
	Others

Hypothesis tested |&| Theory of Change	What is the underlying hypothesis being tested in the paper? What is the implicit or explicit theory of change? Were any statistical analyses done to test the TOC? Yes/ No- 1/0 What are the effect modifiers/ anticipated effect modifiers, if any What SBC theory is used implicitly or explicitly?
Intervention	Describe the intervention and its components in the authors' own words Intervention description- On field implementation details (Text from paper/ rewrite in brief) What elements of the intervention were participatory (in authors' own words) What is the average group size? Who was the facilitator? (1- Internal member, trained from within the group; 2- External facilitator, from NGO or Govt.) Facilitator characteristics (education, residence, social group, sex, etc). What training was given to the facilitator in authors' own words? Were the facilitators given any monetary incentive? Y=1, N=0 Number of groups per facilitator (con)

	Number of groups per facilitator (exp) intervention period? Number of sessions Is this a mixed method evaluation? Yes=1, No=2 Level of participation of members in intervention design and implementation (Arnstein): Informed/Consulted/Partners Level of capability strengthening for health (Labonte and Laverack): Individual/Group/community/other Intervention communication approach: Didactic/Interactive/Participatory Category of group intervention (Gram et al): Class/Club/Collective
Group details	How often did groups meet? Underlying group type:- 1= Microfinance groups 2= Open groups 3= Community based women only groups 4= Special population groups Average age (and range) of members in groups What is the duration of each meeting? Population coverage of groups? (% coverage) Group dissolution during the intervention period What are the service linkages (health specific), if any?
Intensity/ Coverage of Intervention	Details on functioning of Groups in Control arm Details on functioning of Groups in Intervention arm Topics discussed in a regular (control) group meeting + length of discussion Additional topics discussed in Intervention arm group meetings (Due to layering) + length of discussion Frequency of add-on intervention % members who attended the add-on intervention sessions Exposure to the intervention (text from paper, if any) Target group of intervention - does this align with group membership (age, demographic characteristics). In authors words if available
Participant Inclusion Criterion	Evaluation- Participant eligibility, inclusion criteria [text] Evaluation- Participant eligibility, Exclusion criteria [text] Intervention- Participant eligibility, inclusion criteria [text] Intervention- Participant eligibility, Exclusion criteria [text]
Evaluation details	How would you characterise the evaluation on the efficacy/effectiveness spectrum?

	1 = towards efficacy (implementation on small/medium scale by non-gov partners); 2 = implementation on small/medium scale by gov partners in conditions close to routine; 3 = implementation on large scale, through routine training systems by gov partners Evaluation design (1= RCT, 2=Longitudinal Cohort, 3= Repeated Cross-sectional survey 4= Pre/ post evaluation design 5=Other (specify, eg. Type of Quasi experimental) Nature of comparison (1=exp vs con; 2=before vs after intervention) Is there a control group? Yes=1, No=2 Type of control (group with no intervention OR no group, with or without matching) Is this a cross-sectional baseline/endline survey design? Yes=1, No=2 Please describe survey design [text]
Cost effectiveness component	Does the study include a cost effectiveness component? Yes--1 No--2 Is the cost given a total cost figure, or separate cost given for each descriptive component of the intervention? Total cost--1 Individual cost components--2 Cost effectiveness method used (text from paper) Cost value (figure given in the paper with unit)
Outcome areas	MNCH SRH and HIV Family planning General health/morbidity Violence Mental health Nutrition (Includes Breastfeeding) Non-communicable diseases Communicable diseases Expenditure Health insurance Sanitation Outcomes at group level or population level? 1- Group level 2- Population/ Community level 3. Sample members and non-members (from the community) Non health outcomes, if any? What is the primary outcome? What are the secondary outcomes? Does study differentiate between primary and secondary outcomes? Yes=1/no=0

Timing of data collection	baseline endline Time between baseline and endline other information (if any, write it in text)
Data collection and statistical methods	Sampling methods in the authors' own words Is the analysis by Intention-to-treat> (yes=1, no=0) Confounders assessed/adjusted for? Unit of clustering Clustering at -- 1: geographical level, 2: clusters formed using specific characteristics (other than geography) Number and size of clusters Adjusted for clustering in analysis? Yes=1/no=0 Does the study have a sample size calculation? Yes=1, No=0 Does the study have a published protocol or registration with details of outcomes and analysis methods? Yes=1, No=0 Randomisation method, if any Blinding process, in authors' own words (i.e. were any or all of persons who did random allocation, data collectors, and analysts blind to exposure/cont rolallocation?). N eligible participants (exp vs control or before/after) Loss to follow-up/Attrition (individual) Method of assessment (write name of questionnaire/describe method) e.g specific scales used like PHQ, CESD etc or anthropometric or biometric measurements taken Statistical method (the name of analysis)
Results	mean age- separate baseline and endline if appropriate Literacy - separate baseline and endline if appropriate % of participants belonging to marginalised groups (con) - separate baseline and endline if appropriate
	N eligible participants (exp vs control or before/after)
Results: Primary Outcomes	Results - Mean (SD) in exp/con or before/after participants Results - Rate in exp/con or before/after participants Results - Prevalence in exp/con or before/after participants Results - incidence in exp/con or before/after participants Results -Odds Ratio (95% CI) for exp/con or before/after participants specify adjusted and unadjusted Results - Rate ratio (95% CI) for exp/con or before/after participants specify adjusted and unadjusted Results; Beta coefficient (95% CI) for exp/con or before/after participants specify adjusted and unadjusted Results: difference-in-difference (DID) (difference in % points)- control v/s intervention before vs after
	Results; P-value for difference between groups
Results: Secondary Outcomes	Results: report all results on secondary outcomes with effect sizes (95% CI) and p-value - use ITT results, not sub-group analyses -

	Highlight significant findings (CI does not include 1) in red or with asterisk Notes on secondary outcomes
Qualitative Results and Appraisal	Qualitative sample Qualitative data collection methods Qualitative results Clarity of the research question Explanation of the context Sampling Reflexivity of the account Clear account of the methods used for data collection and analysis Amount of data pertinent to the review question
Authors' Own Account Of Study Limitations	Notes on bias
Risk of Bias assessment	ROB-2 and ROBINS
Barriers And Enablers To Intervention Achieving Impact	Enablers for the intervention in the authors words Barriers for the intervention in the authors words Reviewers interpretation of barriers and enablers.
Layering specific Barriers and Enablers	Barriers to layering the intervention Enablers to layering the intervention
Process Evaluation	Does this study include a process evaluation Is the process evaluation quantitative, qualitative or mixed methods (give citation here)
Additional information, if any	Notes/ Remarks
