CODE: Items for different study designs.

Randomised controlled trials	
2.1	Is randomization appropriately performed?
2.2	Are the groups comparable at baseline?
2.3	Are there complete outcome data?
2.4	Are outcome assessors blind to the intervention provided?
2.5	Did the participants adhere to the assigned intervention?
Quantitative non-randomised designs	
3.1	Are the participants representative of the target population?
3.2	Are the measurements appropriate regarding both the outcome and intervention?
3.3	Are there complete outcome data?
3.4	Are the confounders accounted for in the design and analysis
3.5	During the study period, is the intervention administered as intended?
