Supplementary information 2. Rationale of excluding studies

Study	Reason for exclusion
Neeland2020	Did not measure any outcome of interest
Javed2020	Did not measure any outcome of interest
Pereira2017	Combine therapy (Dapagliflozin 10 mg qd +exenatide 2 mg qd in experiment group)
Kato 2017	Overweight patients with type 2 diabetes: a randomized, crossover, controlled clinical trial.
Lundkvist 2017	Combine therapy (Dapagliflozin 10 mg qd +exenatide 2 mg qd in experiment group)
Lundkvist 2017	Combine therapy (Dapagliflozin 10 mg qd +exenatide 2 mg qd in experiment group)
Rosenstock 2014	obese inadequately controlled type 2 diabetes
Sarich 2010	Published as abstract only.
Deol 2017	diabesity, the real world experience, Combination therapy with GLP-1 analogues ,with no control
Faerch 2017	Protocol, prediabetes
NCT02811484	Withdrawn, Patients With Type 2 Diabetes
NCT02360774	not completed
NCT02338193	not completed
NCT02243202	Overlapping population
NCT01018823	Completed with no result
NCT00650806	Overlapping population

Exclude studies
