Quality of articles were calculated using the Newcastle-Ottawa Scale (NOS), as described in the Methods Section. Selection: minimum 1 – maximum 4 stars; Comparability: 0 – 1 star; and Exposure: 1 – 3 stars. In addition, the Clark-Baudouin Score (CBS) was also used to assess the quality of the studies. The CBS consists in a scoring systems that allows from 0 to 10 points regarding pre-defined criteria.
