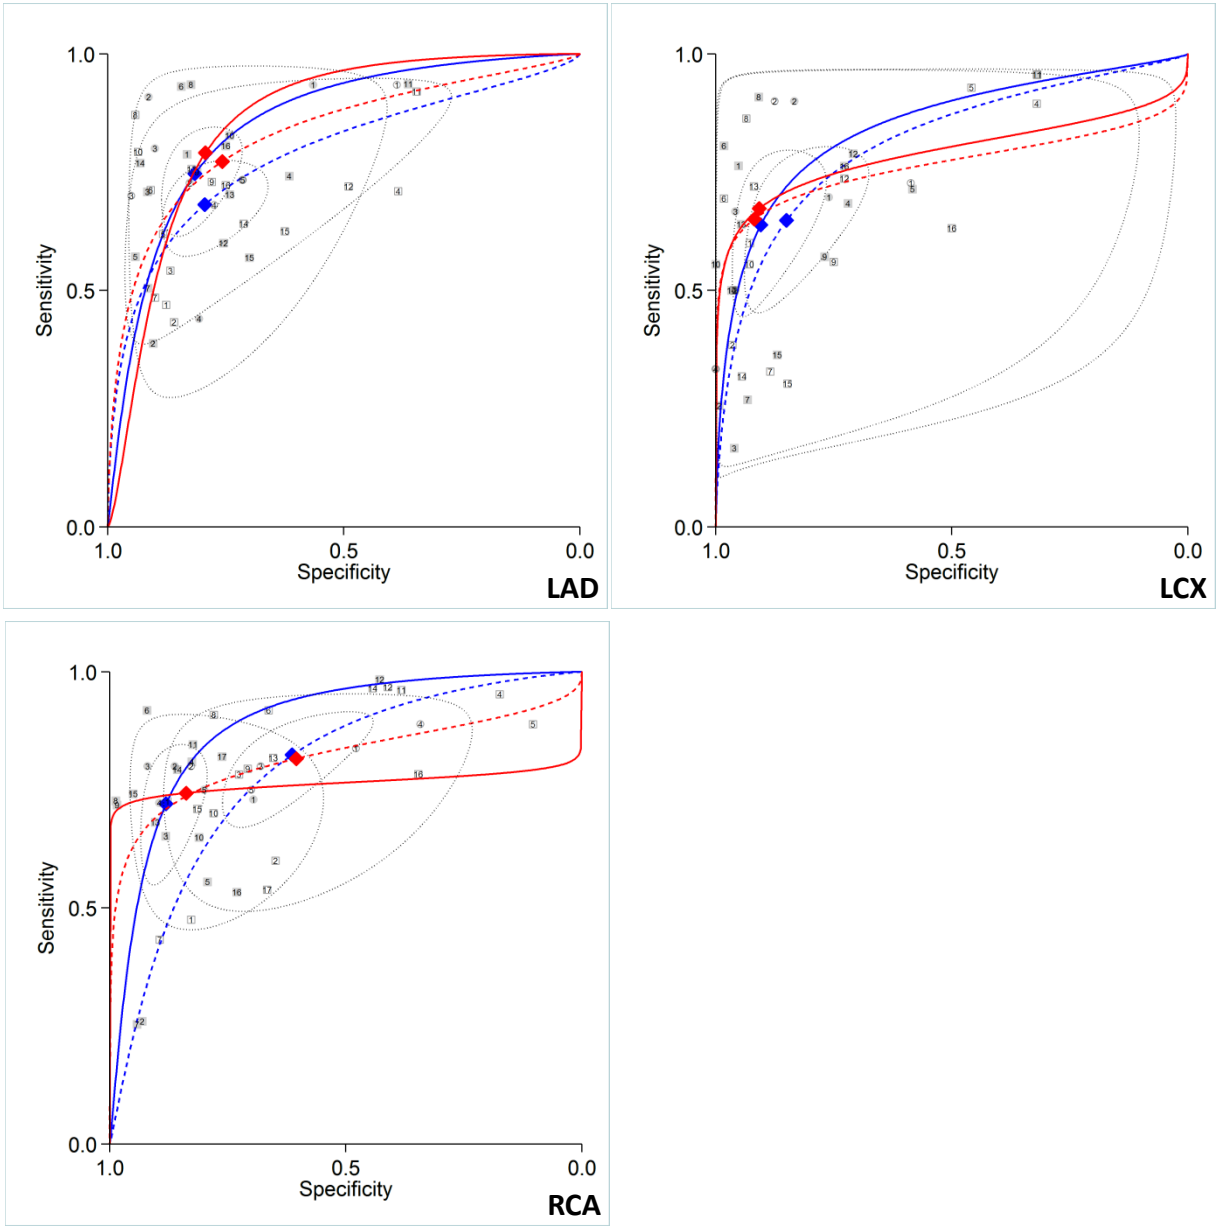
Supplementary Figure 2

Summary ROC curves of the thallium-201 subgroup (red) and technetium-99m subgroup (blue). Comparisons of summary ROC curves between AC (solid line) versus NAC (dashed line) in the thallium-201 and technetium-99m subgroups.



AC: attenuation correction; LAD: left anterior descending artery; LCX: left circumflex artery; NAC: non-AC; RCA: right coronary artery; ROC: receiver operating characteristic
