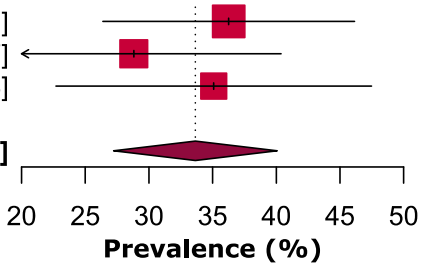
A

Study ID	Cases	Total	Prevalence	95% C.I.
Non-survived (Adult)				
Fan 2020	33	91	36.26	[26.39; 46.14]
Li 2020a	17	59	28.81	[17.26; 40.37]
Shi 2020	20	57	35.09	[22.70; 47.48]
Random effects model		**207**	**33.65**	**[27.23; 40.07]**

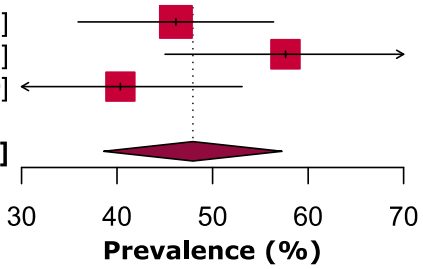
Heterogeneity: I^2 = 0%, τ^2 = 0, χ^2_2 = 0.99 (p = 0.61)



B

Study ID	Cases	Total	Prevalence	95% C.I.
Non-survived (Adult)				
Fan 2020	42	91	46.15	[35.91; 56.40]
Li 2020a	34	59	57.63	[45.02; 70.24]
Shi 2020	23	57	40.35	[27.61; 53.09]
Random effects model		**207**	**47.93**	**[38.60; 57.26]**

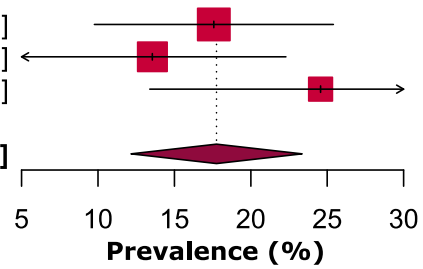
Heterogeneity: I^2 = 47%, τ^2 = 0.0032, χ^2_2 = 3.75 (p = 0.15)



C

Study ID	Cases	Total	Prevalence	95% C.I.
Non-survived (Adult)				
Fan 2020	16	91	17.58	[9.76; 25.40]
Li 2020a	8	59	13.56	[4.82; 22.30]
Shi 2020	14	57	24.56	[13.39; 35.74]
Random effects model		**207**	**17.76**	**[12.16; 23.35]**

Heterogeneity: I^2 = 13%, τ^2 = 0.0003, χ^2_2 = 2.31 (p = 0.31)



S7 Fig. Prevalence of (A) low-grade (37·3-38·0°C), (B) medium-grade (38·1-39·0°C), and (C) high-grade fever (>39·0°C) in non-survived adult COVID-19 patients.
