Note to readers with disabilities: *EHP* strives to ensure that all journal content is accessible to all readers. However, some figures and Supplemental Material published in *EHP* articles may not conform to 508 standards due to the complexity of the information being presented. If you need assistance accessing journal content, please contact ehp508@niehs.nih.gov. Our staff will work with you to assess and meet your accessibility needs within 3 working days.

Supplemental Material

Exposure to Outdoor Particulate Matter Air Pollution and Risk of Gastrointestinal Cancers in Adults: A Systematic Review and Meta-Analysis of Epidemiologic Evidence

Natalie Pritchett, Emily C. Spangler, George M. Gray, Alicia A. Livinski, Joshua N. Sampson, Sanford M. Dawsey, and Rena R. Jones

Table of Contents

Table S1. PRISMA 2020 item checklist.

Table S2. Final search strategies used for literature searches.

Table S3. Detail and rationale for risk of bias ratings for included human studies relevant to PM exposure and GI cancer outcomes.

Figure S1. Sensitivity analysis of included human studies of Esophageal cancer.

Figure S2. Sensitivity analysis of included human studies of Gastric cancer.

Figure S3. Sensitivity analysis of included human studies of Pancreatic cancer.

Figure S4. Sensitivity analysis of included human studies of Colorectal cancer.

Figure S5. Sensitivity analysis of included human studies of liver cancer.

Figure S6. Funnel plot of studies of the association between $PM_{2.5}$ and gastric cancer.
