Table S4.The included trials from the meta-analyses

Authors	Title	Included trials	Trials included in this study	Journals
Liu, J. 2001[1]	The efficacy of highly agglutinative staphylococcin combined with chemotherapeutic drugs in the treatment of malignant pleural and ascites: A Meta analysis.	12 trials	3 trials [2-4]	Shenyang Army Med **14**(6): 556-557.
Liu, Y. 2016[5]	Meta -analysis of the treatment efficacy of staphylococcin plus cisplatin versus cisplatin monotherapy in malignant pleural effusion and malignant intraperitoneal effusion	16 trials	14 trials[6-19]	J Mod Oncol **24**(21): 3479-3484.

In all, we included 17 trials [2-4 6-19]after evaluating previous two meta analyses

1. Liu J, Zhao H, Liu X. The efficacy of highly agglutinative staphylococcin combined with chemotherapeutic drugs in the treatment of malignant pleural and ascites: A meta analysis. *Shenyang Army Med* 2001;14(6):556-57.
2. Li S, Wu Y, Wang X. Observation on the clinical efficacy of combined intrapleural injection of high-aggregating staphylococcus aureus and cisplatin in the treatment of malignant pleural effusion (analysis of 40 cases). *J Pract Oncol* 1997;12(4):171-72.
3. Zhang Y. Observation on the effect of high-aggregating staphylococcus aureus combined with mitoxantrone in the treatment of lung pleural effusion. *West China J Pharmaceut Sci* 1999;14(3):200-00. doi: 10.3969/j.issn.1006-0103.1999.03.025
4. Fu J. Treatment of 55 cases of cancerous pleural effusion with highly agglutinative staphylococcin. *China Pharmaceuticals* 2000;9(10):40-41. doi: 10.3969/j.issn.1006-4931.2000.10.033
5. Liu Y, Zhang X, Huang L. Meta -analysis of the treatment efficacy of staphylococcin plus cisplatin versus cisplatin monotherapy in malignant pleural effusion and malignant intraperitoneal effusion. *J Mod Oncol* 2016;24(21):3479-84. doi: 10.3969/j.issn.1672-4992.2016.21.037
6. Qiu Y, Han G, Ma S. Observation of the curative effect of high-agglomerated staphylococcus and cisplatin on malignant pleural fluid. *Sichuan J Cancer Contr* 1999;12(3):28-30.
7. Lang F, Zhao M, Zhao M, et al. Observtion of the result of highly agglutinative staphylococcin and cisplatin in treating of malignant pleural feeusion. *China J Cancer Prev Treat* 2001;8(z1):256-58. doi: 10.3969/j.issn.1673-5269.2001.z1.073
8. Xu Q, Luo K, Qin H. Observation on the curative effect of low-dose cisplatin combined with high-aggregation staphylococcus aureus in the treatment of 62 cases of malignant pleural effusion. *Chongqing Med* 2003;32(12):1659-59,61. doi: 10.3969/j.issn.1671-8348.2003.12.088
9. Chen J, Cheng X. Clinical observation on treating malignant pleural effussion with both gaojusheng and cisplatin. *Jiangxi J TCM* 2005;36(8):19-20. doi: 10.3969/j.issn.0411-9584.2005.08.012
10. Zhao Z, Li K, Lu W, et al. Clinical observation of Gaojusheng combined with cisplatin in the treatment of malignant pleural effusion. *Pract Clin J ITCWM* 2006;6(6):19-20. doi: 10.3969/j.issn.1671-4040.2006.06.013
11. Wang H, Wang Y, Su L, et al. Clinical observation on the treatment of 84 cases of pleural effusion caused by lung cancer. *Chongqing Med* 2009;38(01):66-67. doi: 10.3969/j.issn.1671-8348.2009.01.030
12. Cheng J, An Y, Zhang X, et al. Clinical observation on treatment of malignant hydrothorax with locally administered highly agglutinative staphylococcin and cisplatin. *China Pharm* 2010;21(12):1130-31.
13. Qu Y, Liu T, Cao y, et al. The therapeutic effects of highly agglutinative staphylococcin combined with cisplatin in the treatment of patients with malignant pleural effusion. *J Basic Clin Oncol* 2010;23(5):413-14. doi: 10.3969/j.issn.1673-5412.2010.05.019
14. Xu J. Efficacy of high-aggregation staphylococcus aureus combined with cisplatin in the treatment of pleural effusion caused by lung cancer. *Strait Pharm J* 2012;24(10):191-92. doi: 10.3969/j.issn.1006-3765.2012.10.102
15. Du Y. Clinical observation on the treatment of pleural effusion caused by lung cancer with

high aggregate staphylococcus and cisplatin. *Chin J Clin Oncol Rehab* 2013;20(09):987-89. doi: 10.13455/j.cnki.cjcor.2013.09.033
16. Li W. Efficacy of high-aggregation staphylococcus aureus combined with cisplatin in the treatment of pleural effusion caused by lung cancer. *China Health Care Nutr* 2013;23(9):4857-58. doi: 10.3969/j.issn.1004-7484(s).2013.09.077
17. Yao X. Therapeutic effect of cisplatin combined with Staphylococcin on malignant pleural effusion. *Chin Pract J Rural Doct* 2014;21(18):51-52. doi: 10.3969/j.issn.1672-7185.2014.18.031
18. Zhang J. Observation and nursing of intrapleural injection of different drugs in treating malignant pleural effusion. *Nurs Pract Res* 2014;11(10):65-66. doi: 10.3969/j.issn.1672-9676.2014.10.035
19. Zhao Y. Comparative observation on the efficacy of intrapleural injection of different drugs in the treatment of lung cancer pleural effusion. *Yiyao Qianyan* 2014;4(12):208-08. doi: 10.3969/j.issn.2095-1752.2014.12.227

List of excluded studies

i) Study about patients with systemic chemotherapy (35 studies)
