Appendix.5 Subgroups analysis and meta-regression (Figs.S14-65)

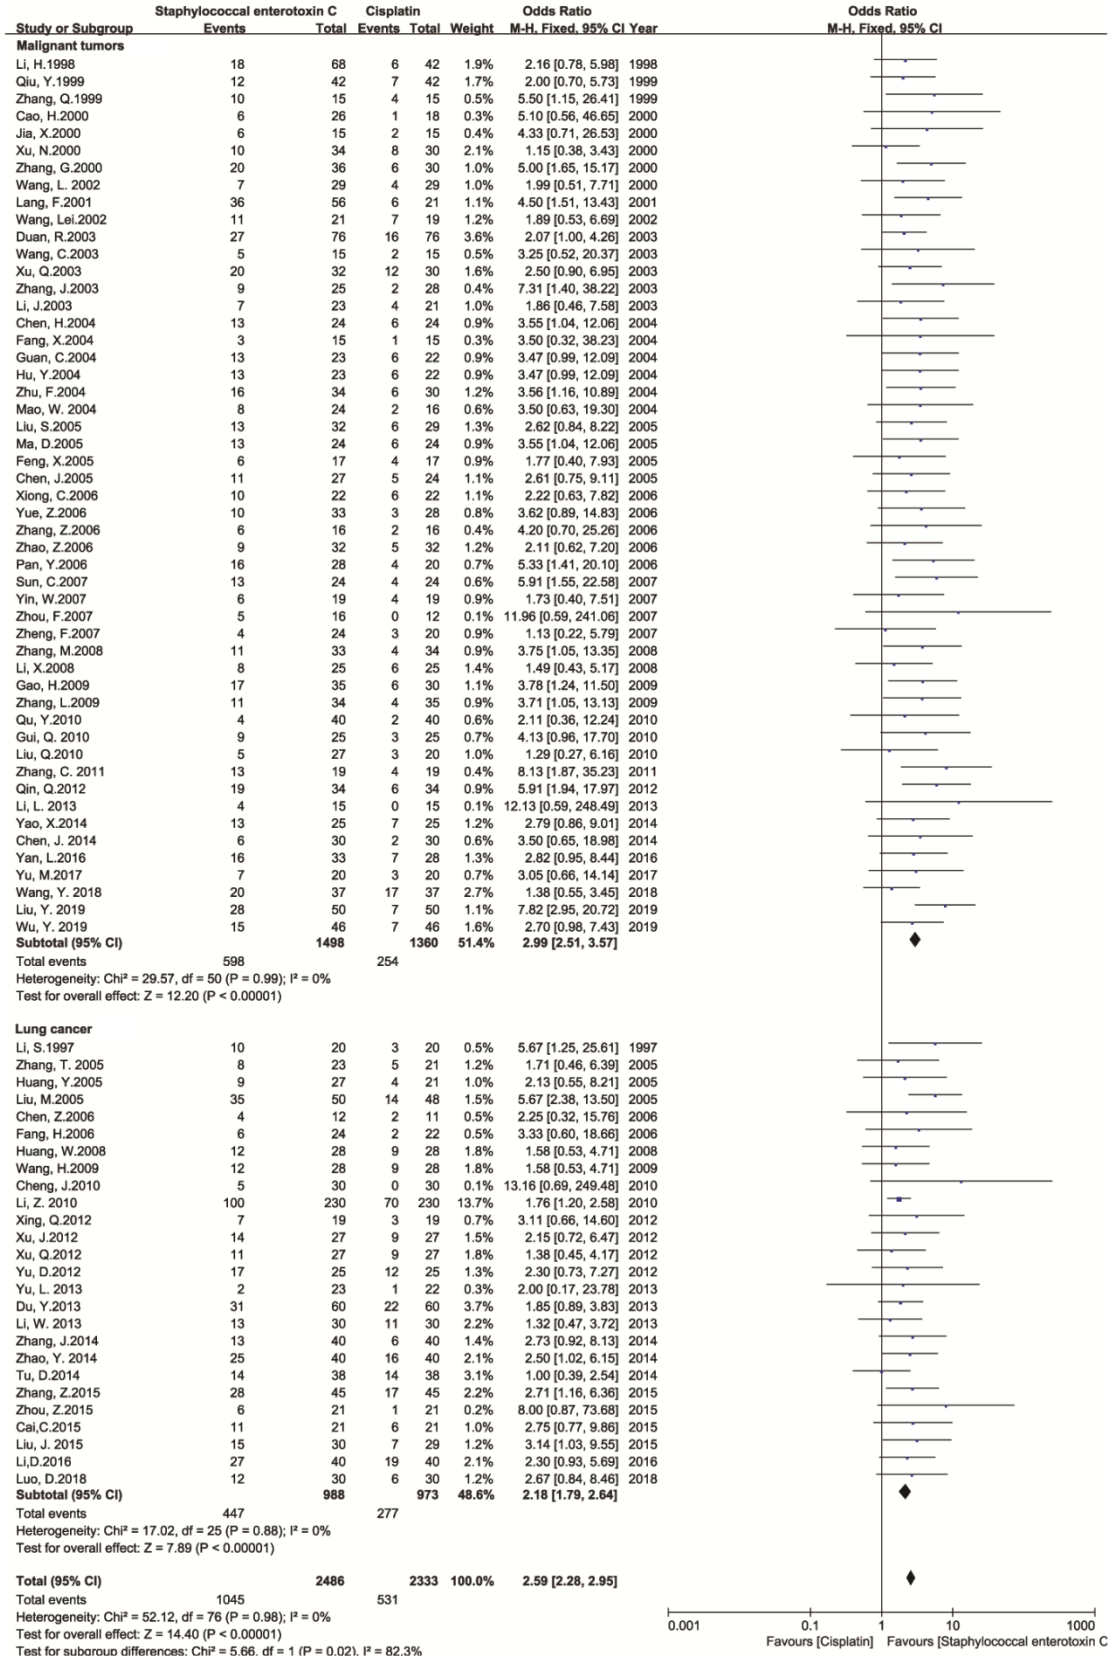

Fig.S14 Subgroups analysis of complete response via primary tumors

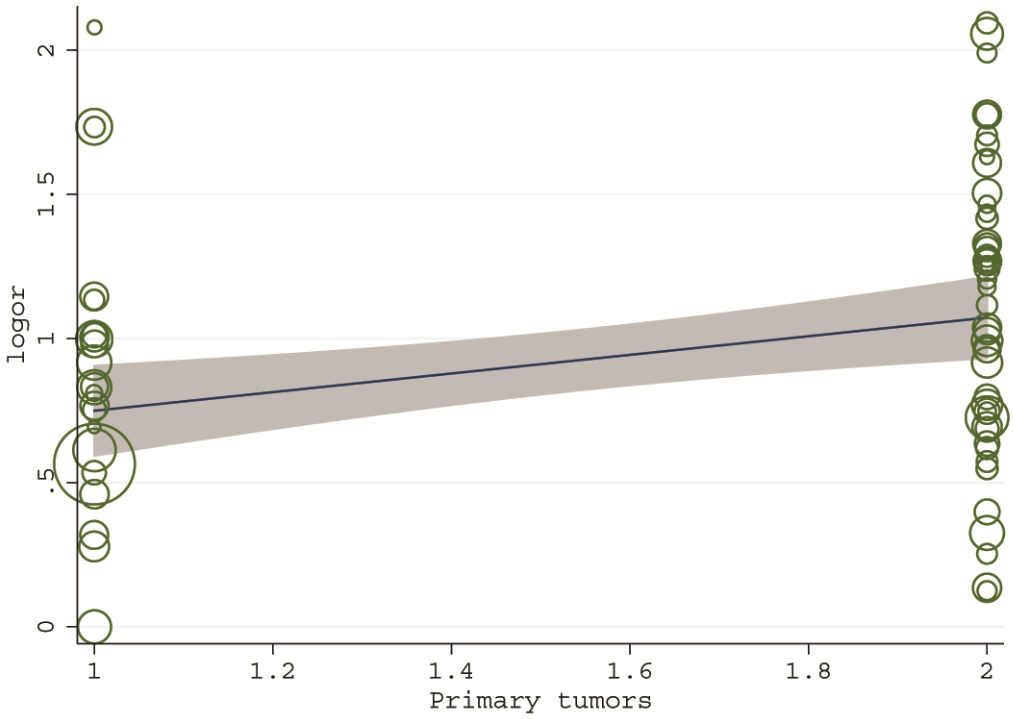

Fig.S15 Meta regression of complete response via primary tumors

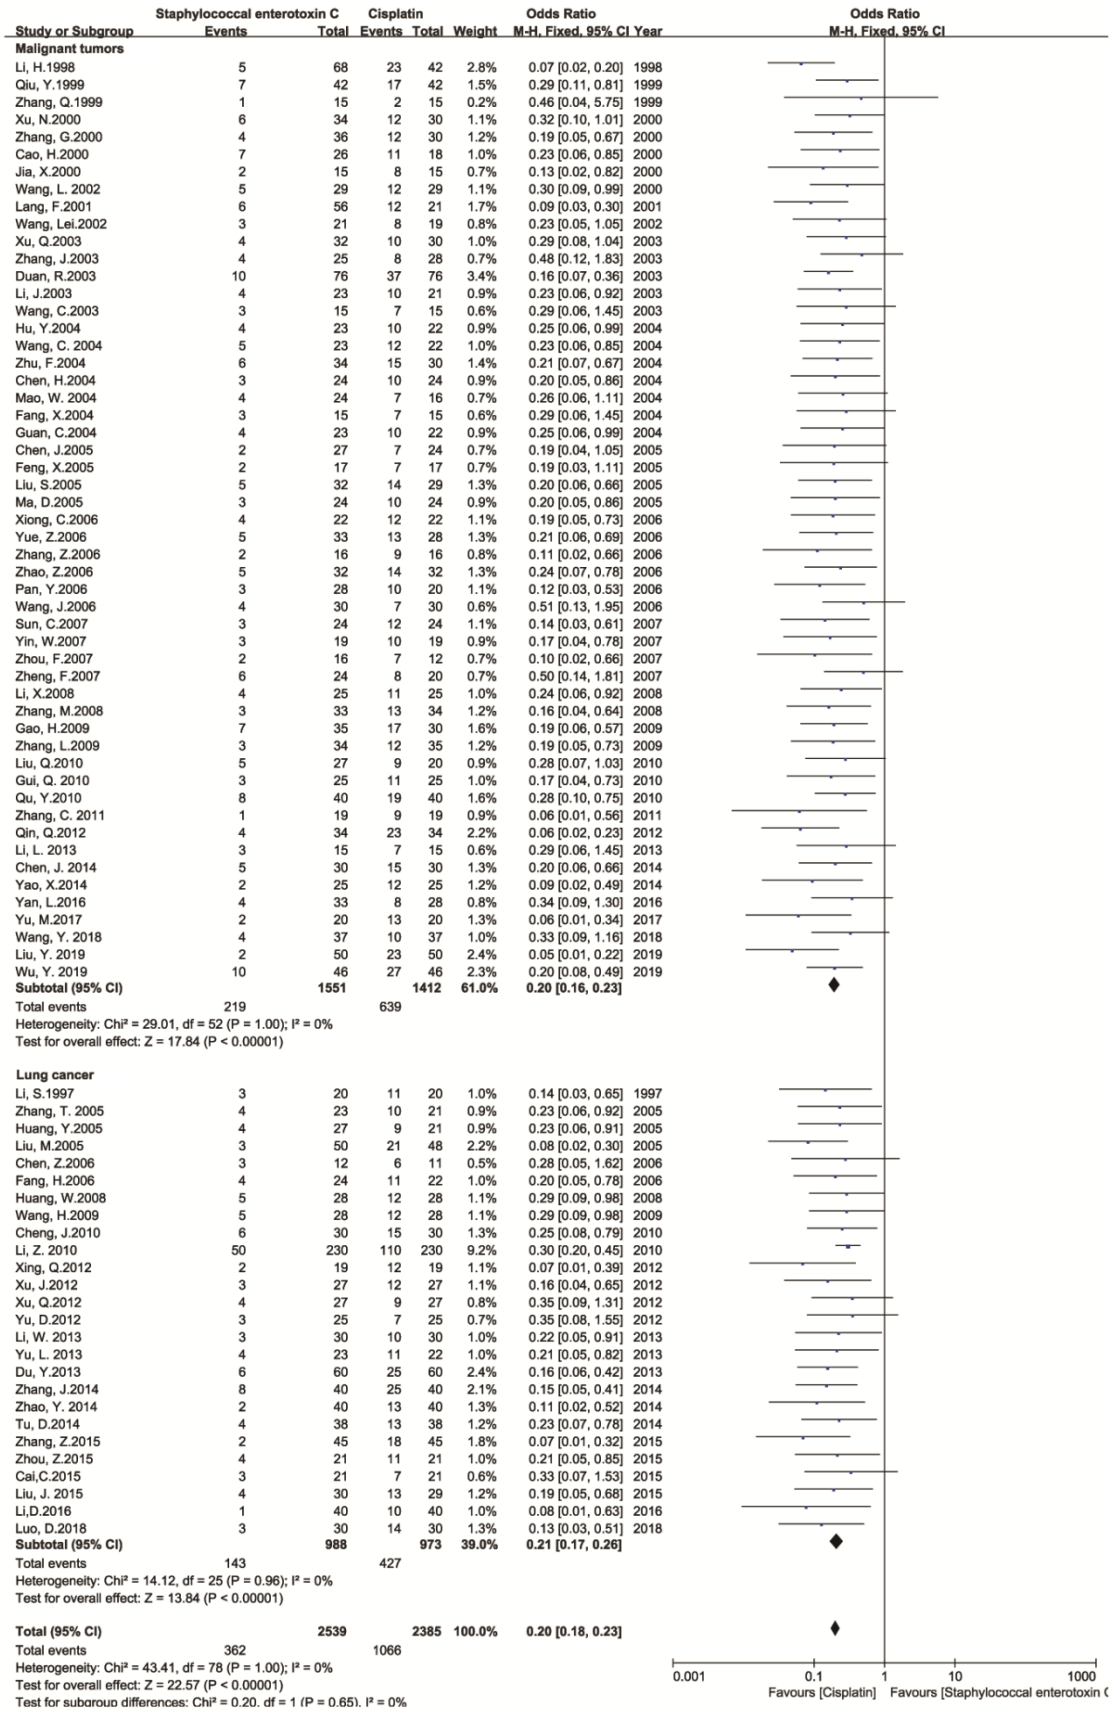

Fig.S16 Subgroups analysis of treatment failure via primary tumors

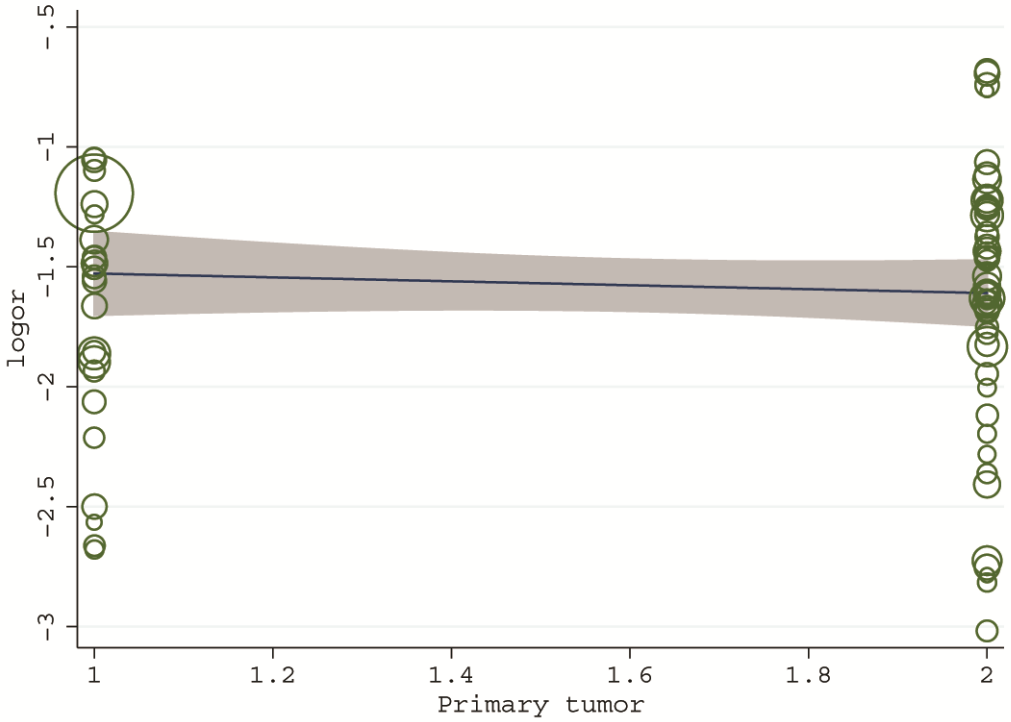

Fig.S17 Meta regression of treatment failure via primary tumors

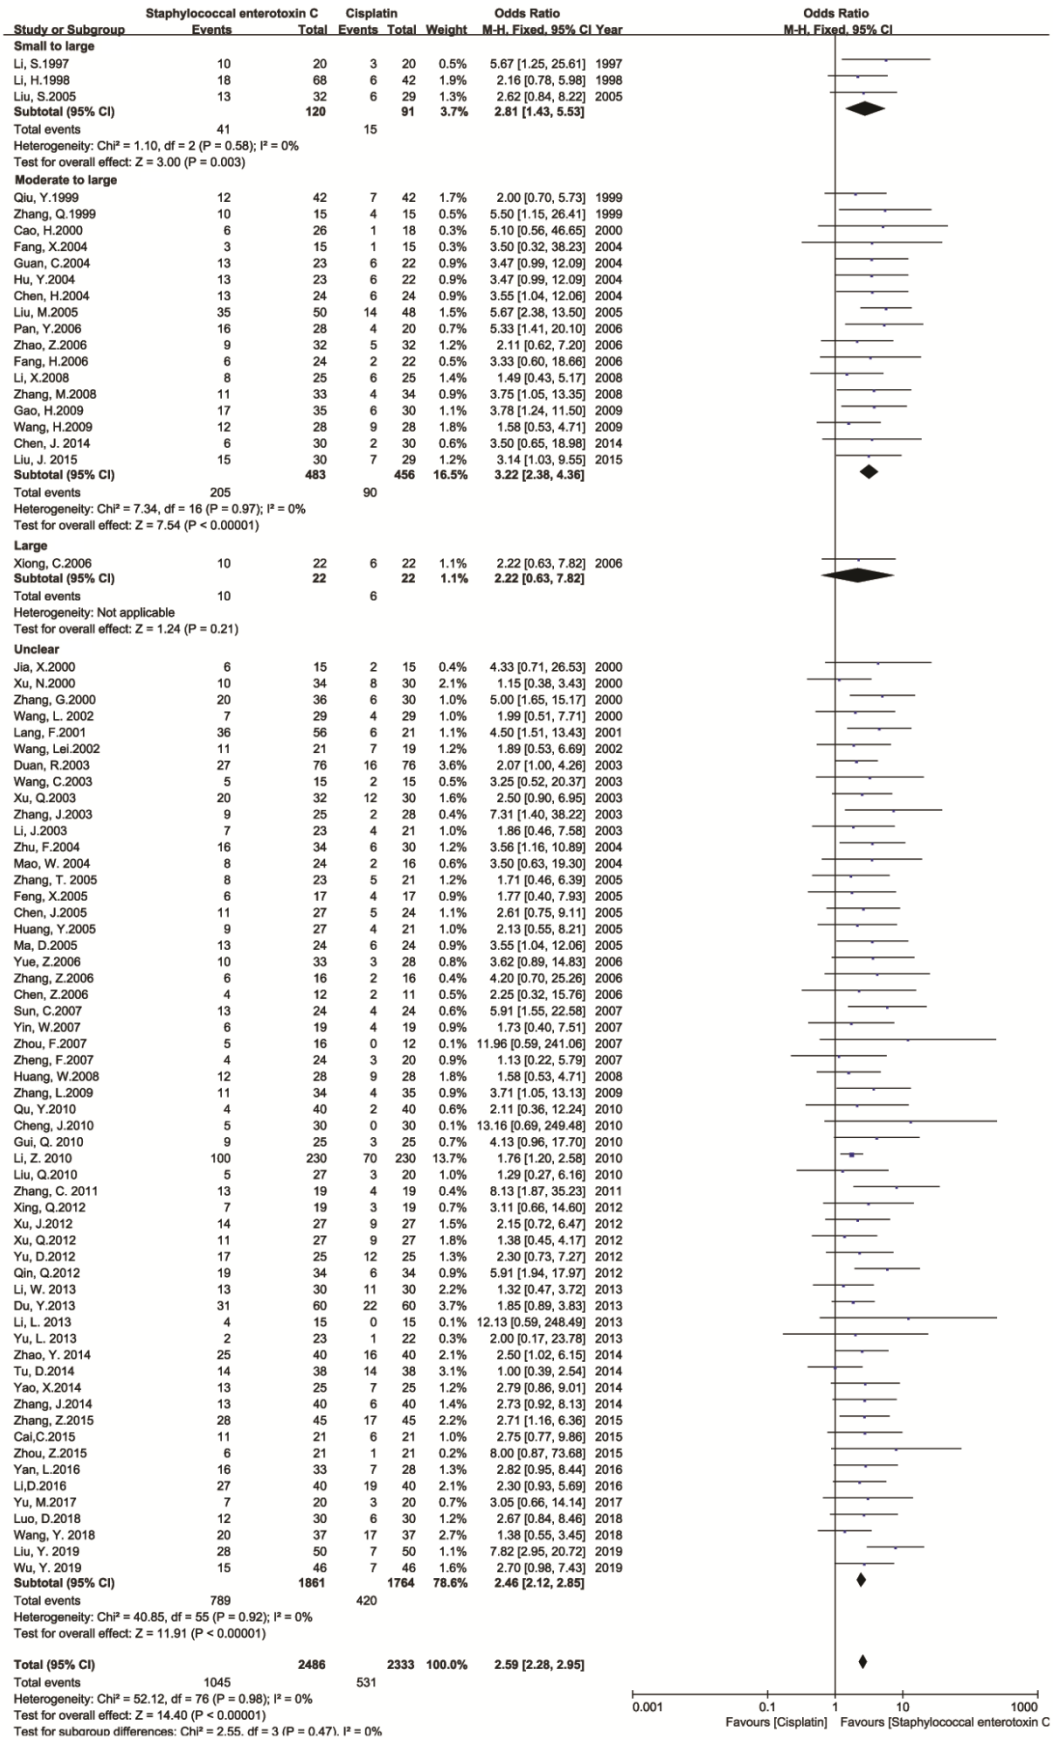

Fig.S18 Subgroups analysis of complete response via volume of pleural effusion

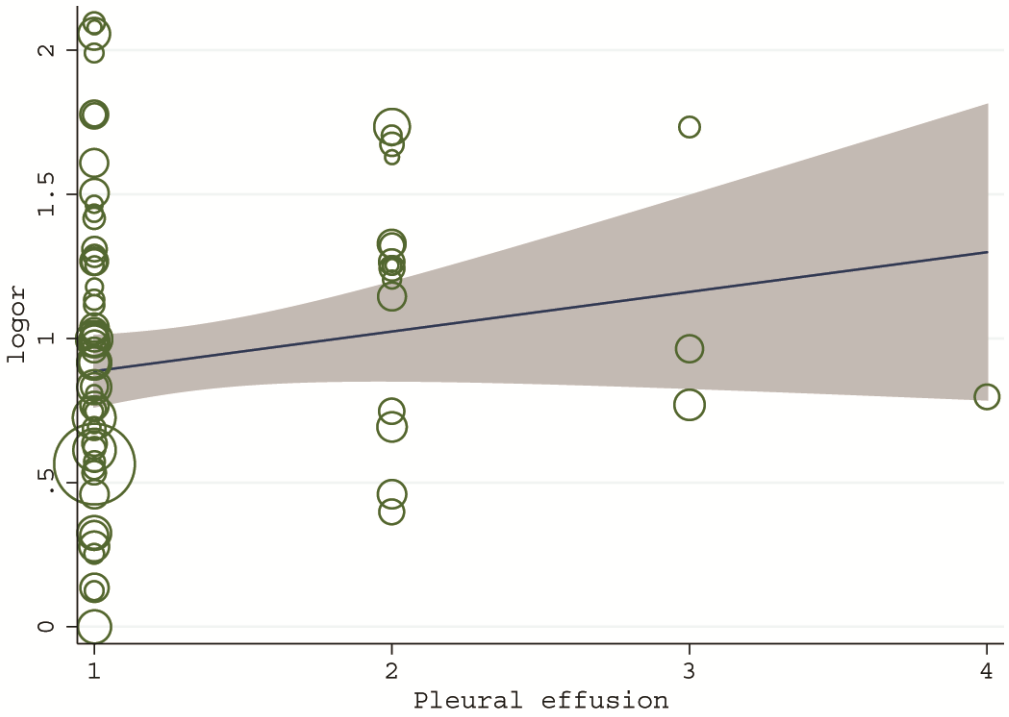

Fig.S19 Meta regression of complete response via volume of pleural effusion

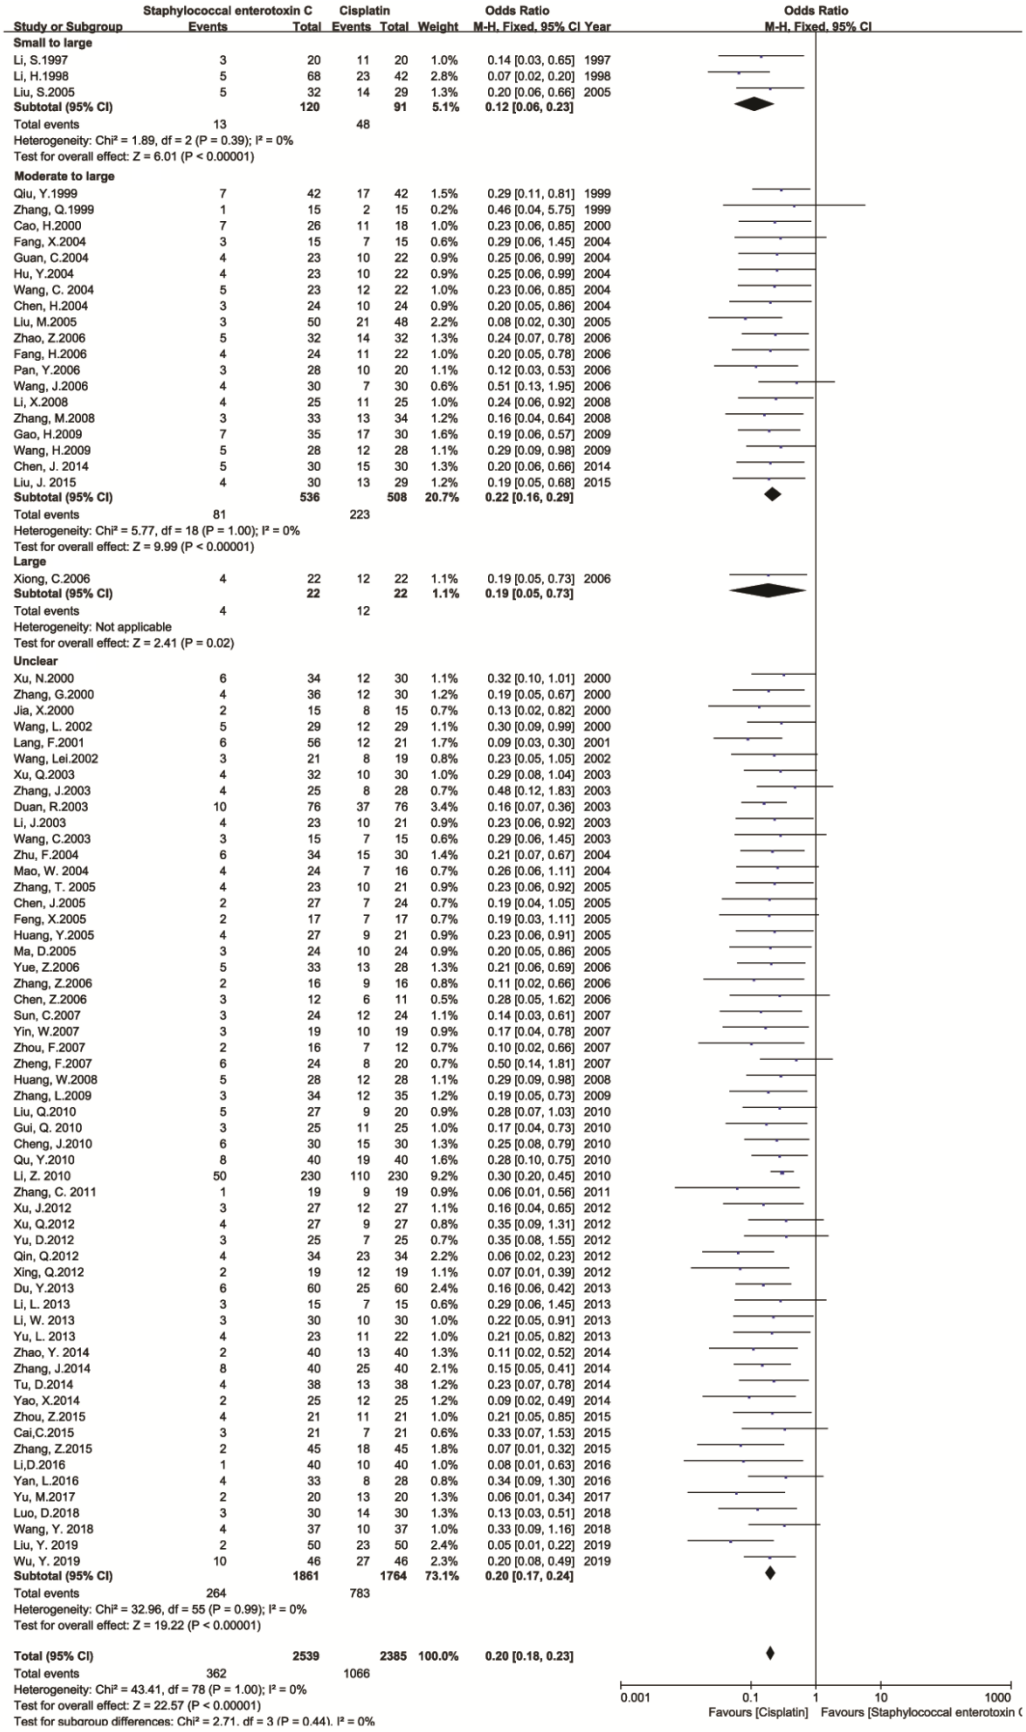

Fig.S20 Subgroups analysis of treatment failure via volume of pleural effusion

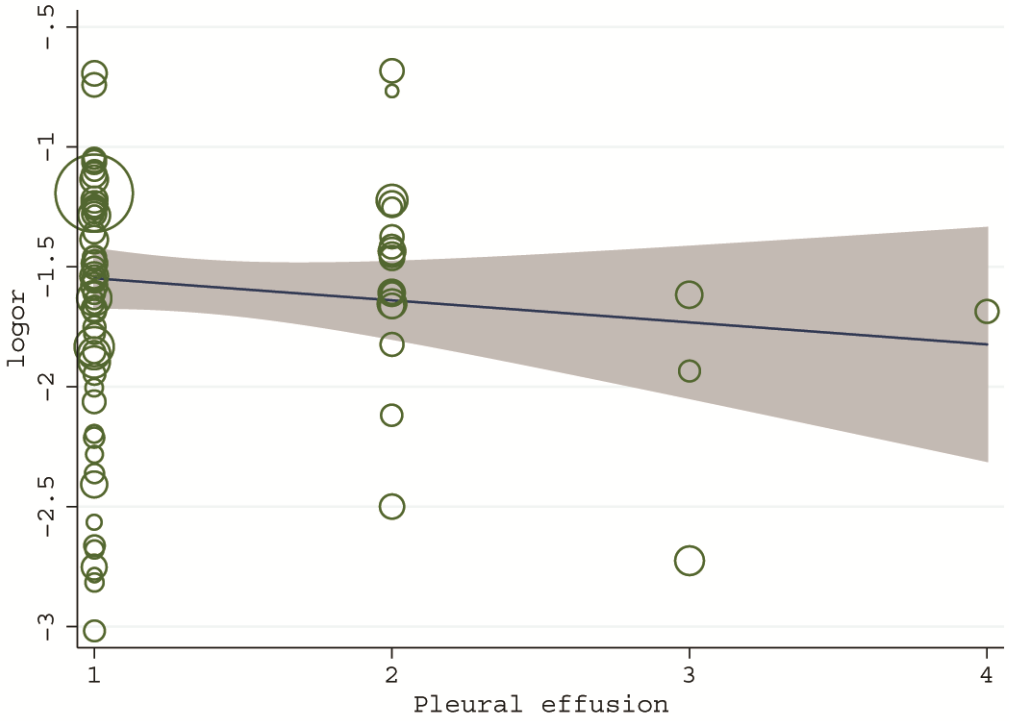

Fig.S21 Meta regression of treatment failure via volume of pleural effusion

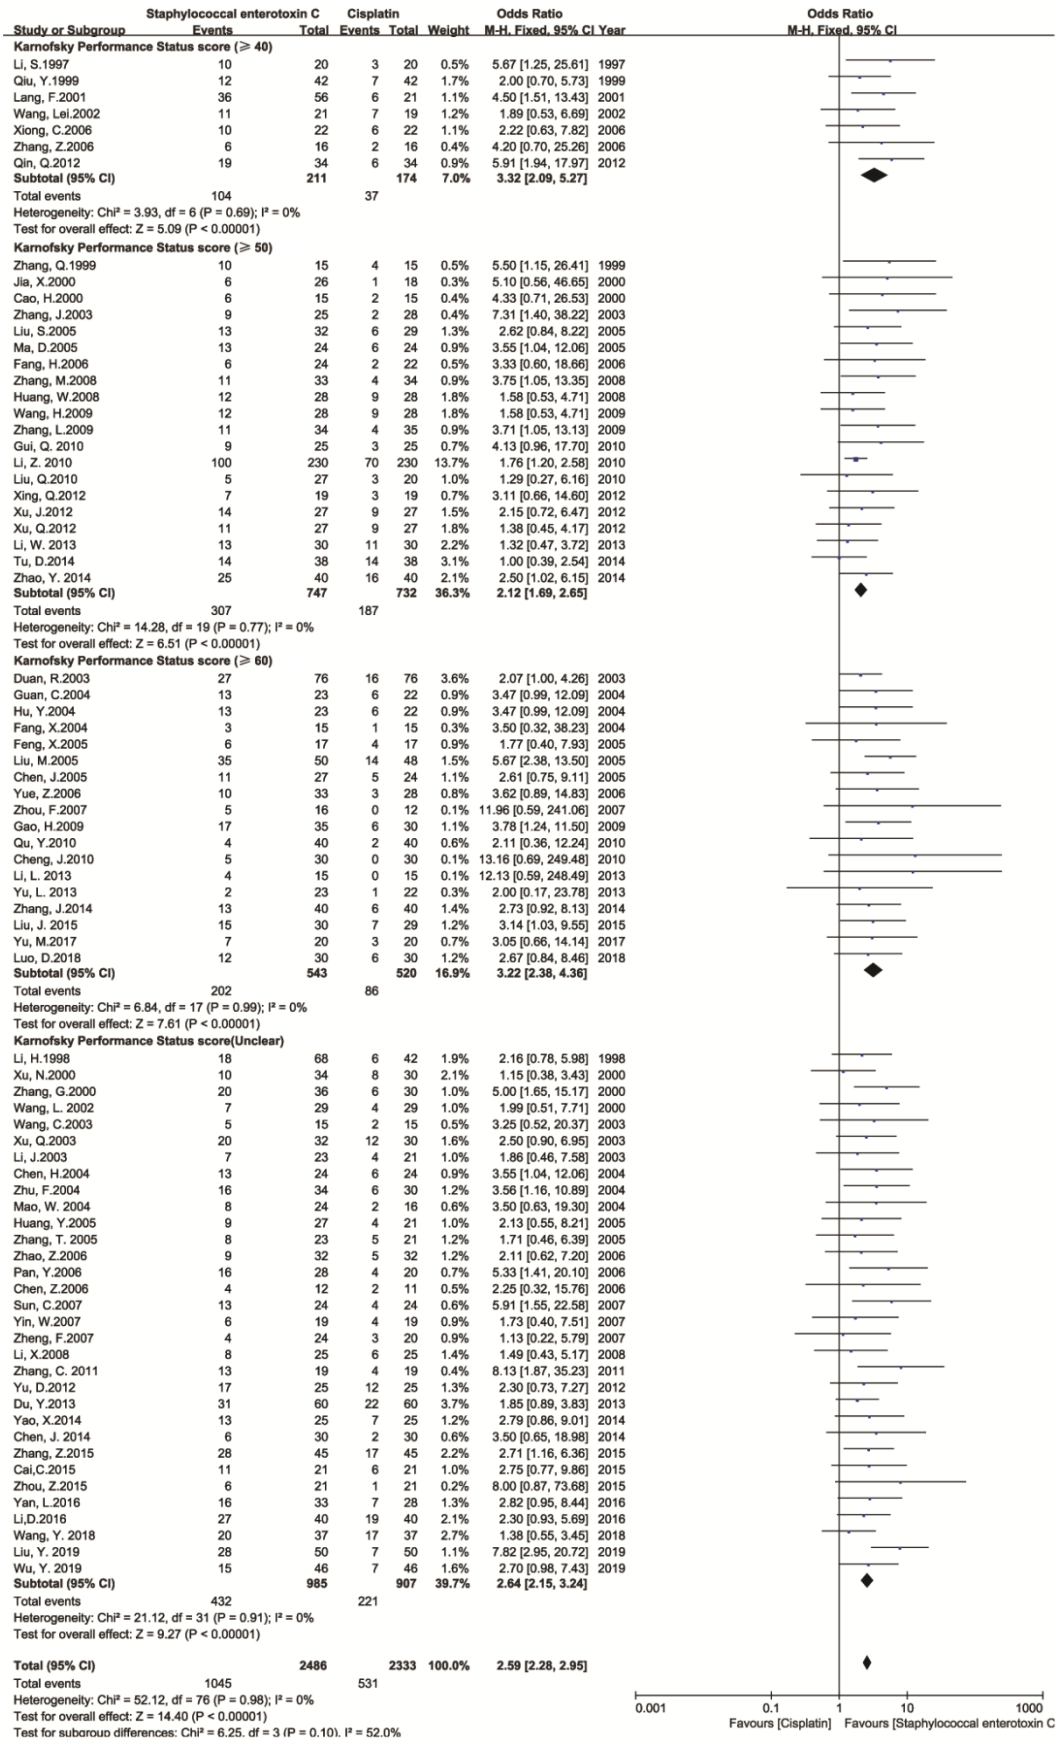

Fig.S22 Subgroups analysis of complete response via KPS score

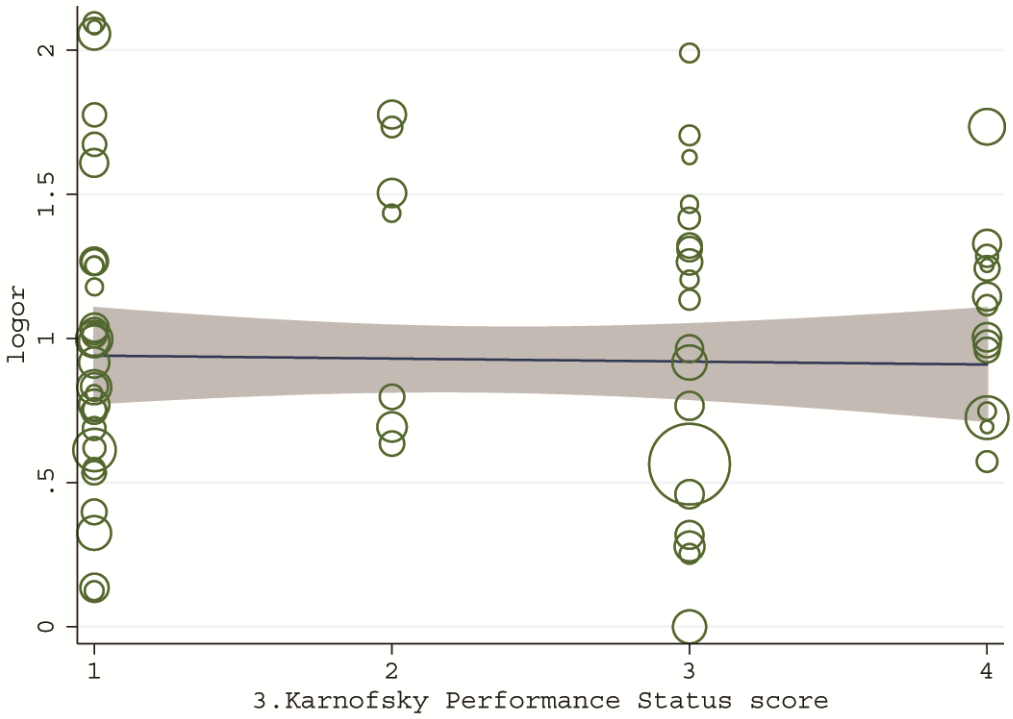

Fig.S23 Meta regression of complete response via KPS score

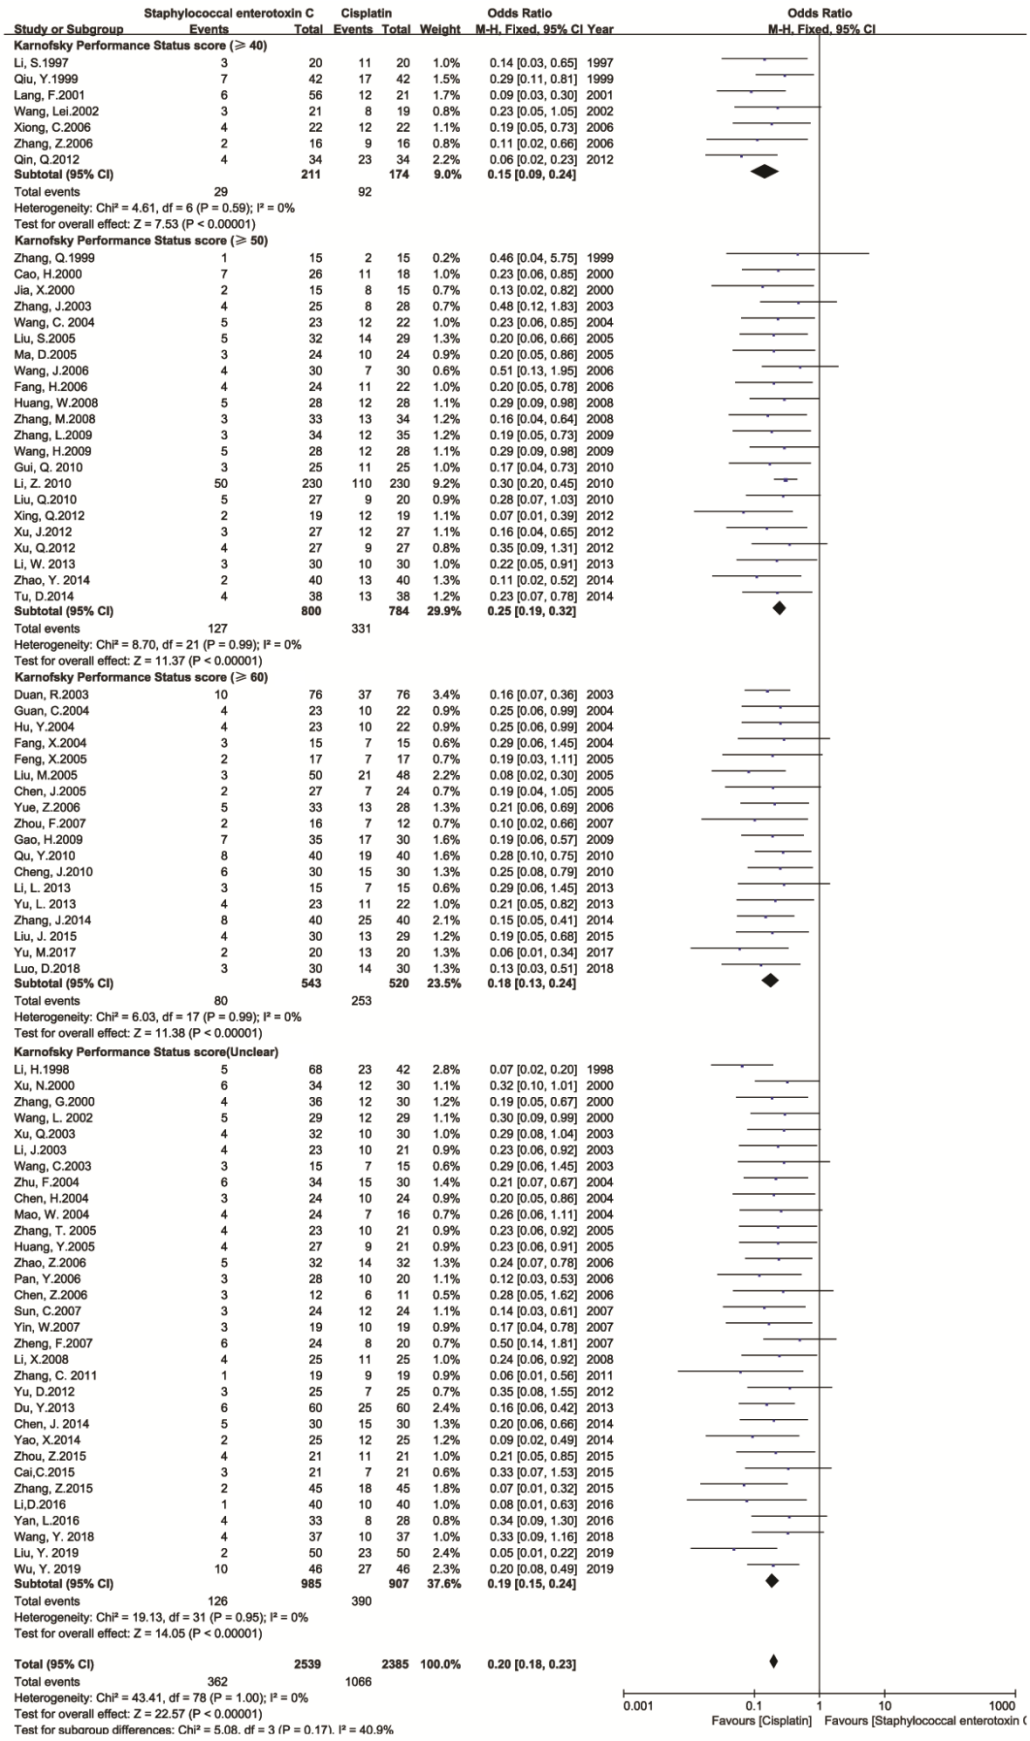

Fig.S24 Subgroups analysis of treatment failure via KPS score

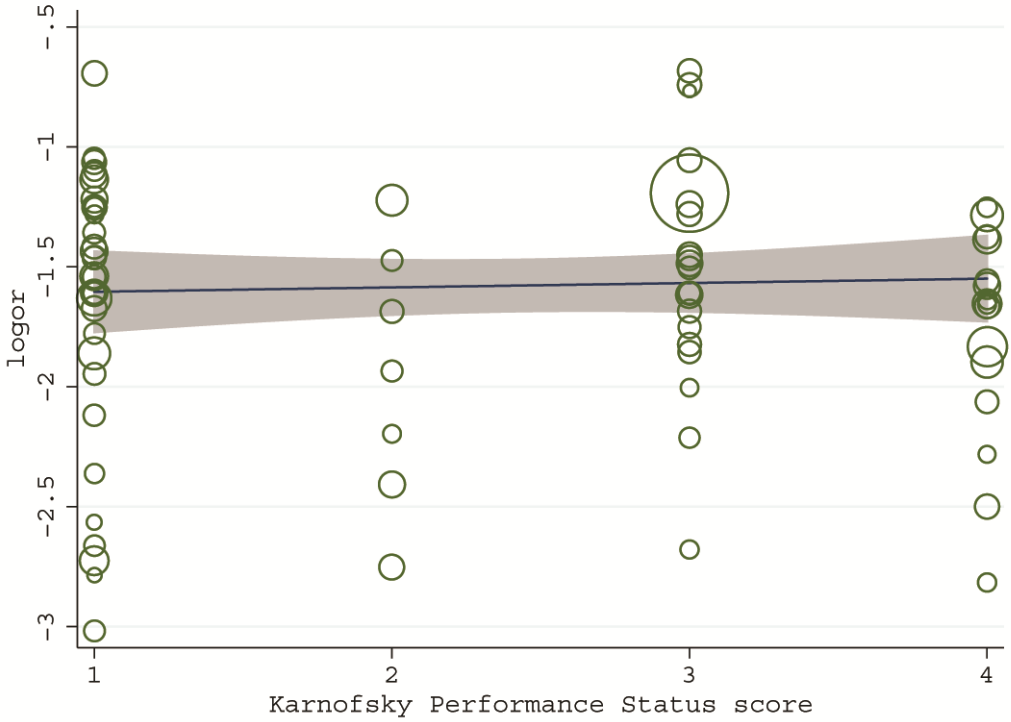

Fig.S25 Meta regression of treatment failure via KPS score

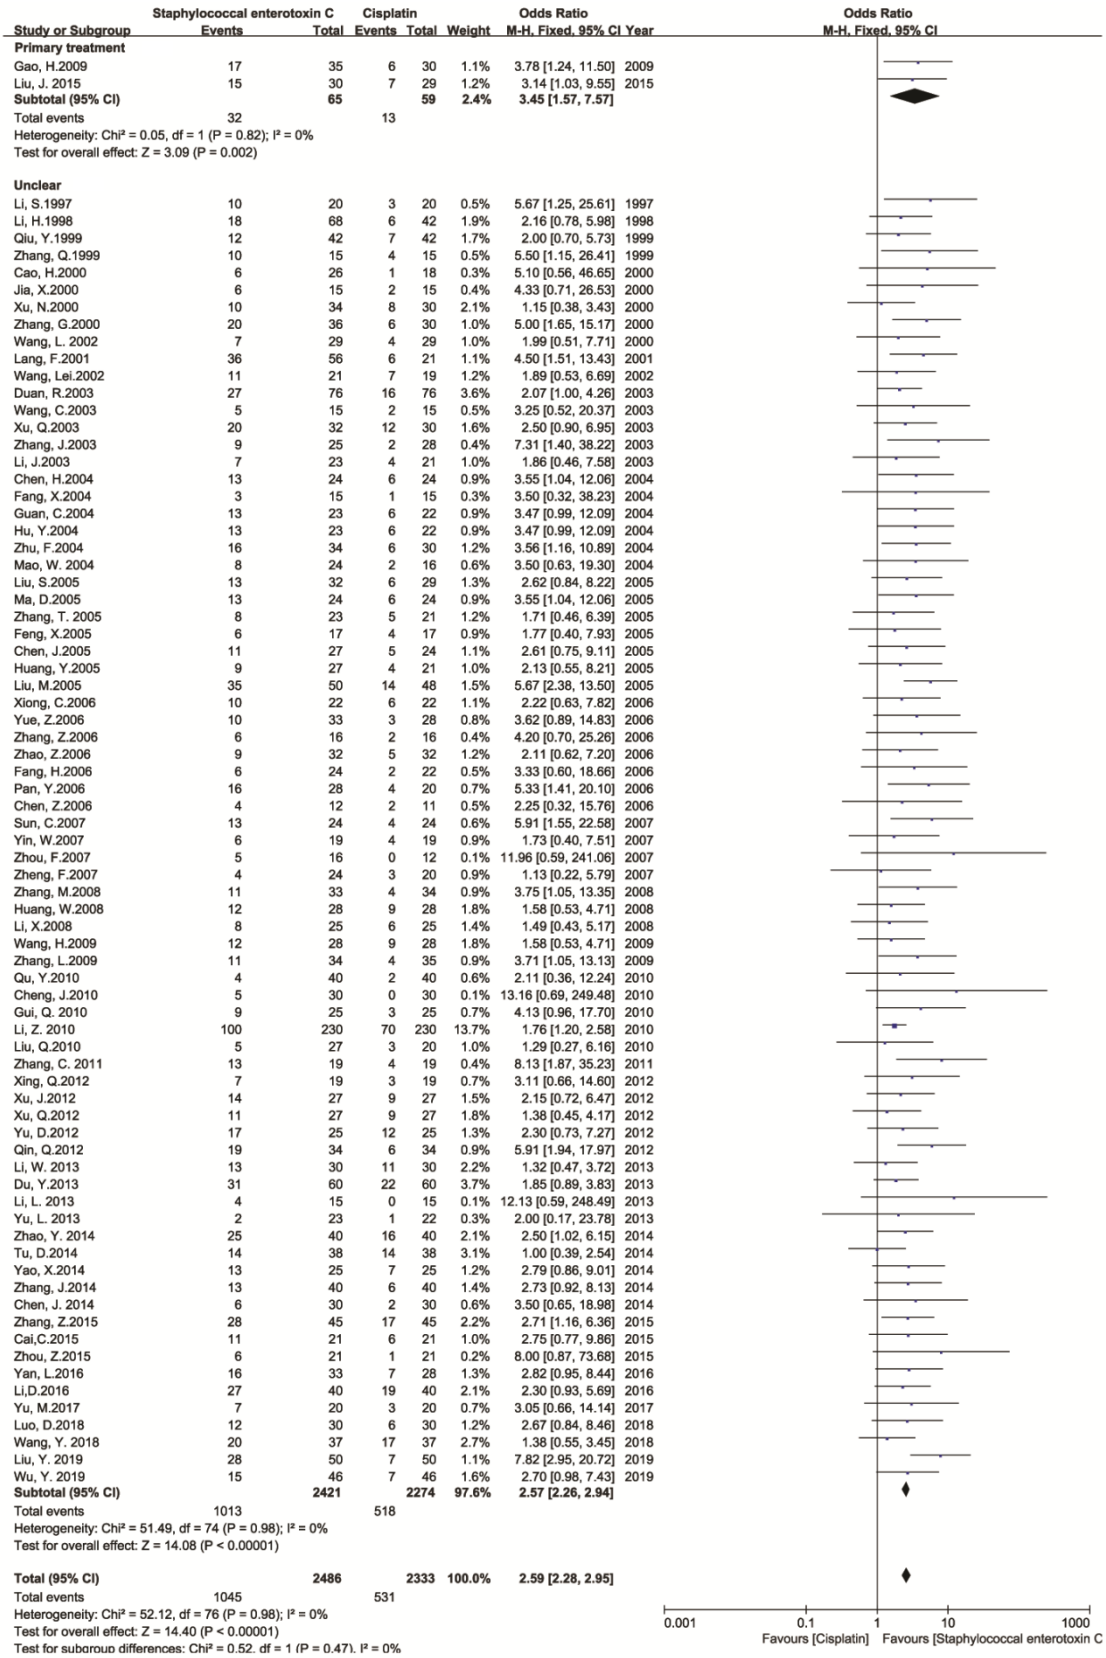

Fig.S26 Subgroups analysis of complete response via treatment history

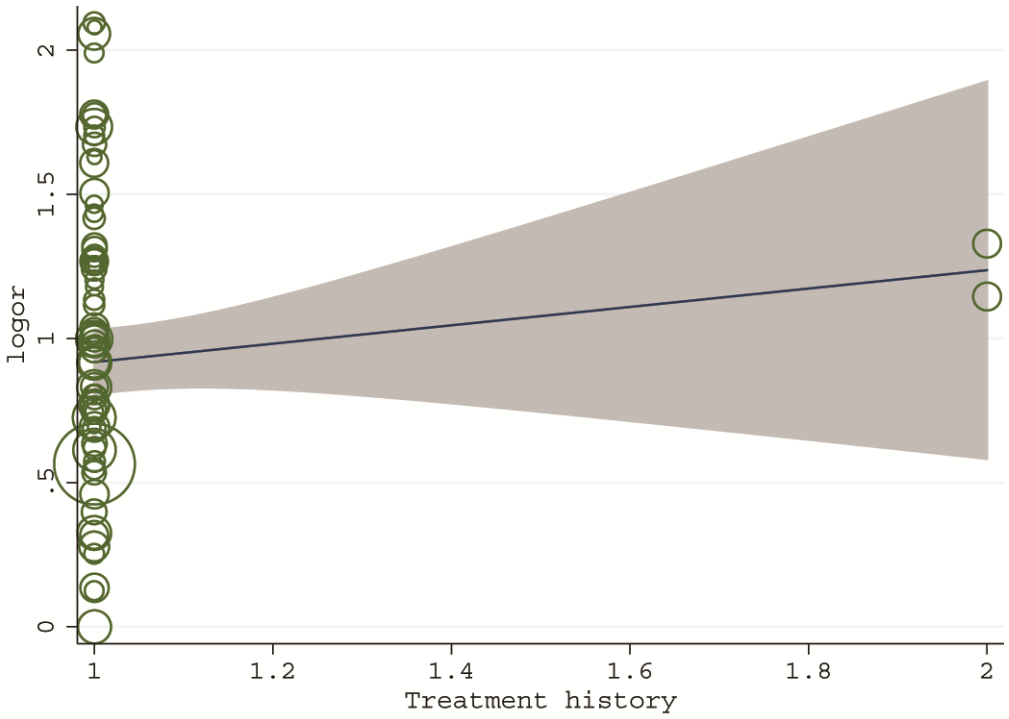

Fig.S27 Meta-regression of complete response via treatment history

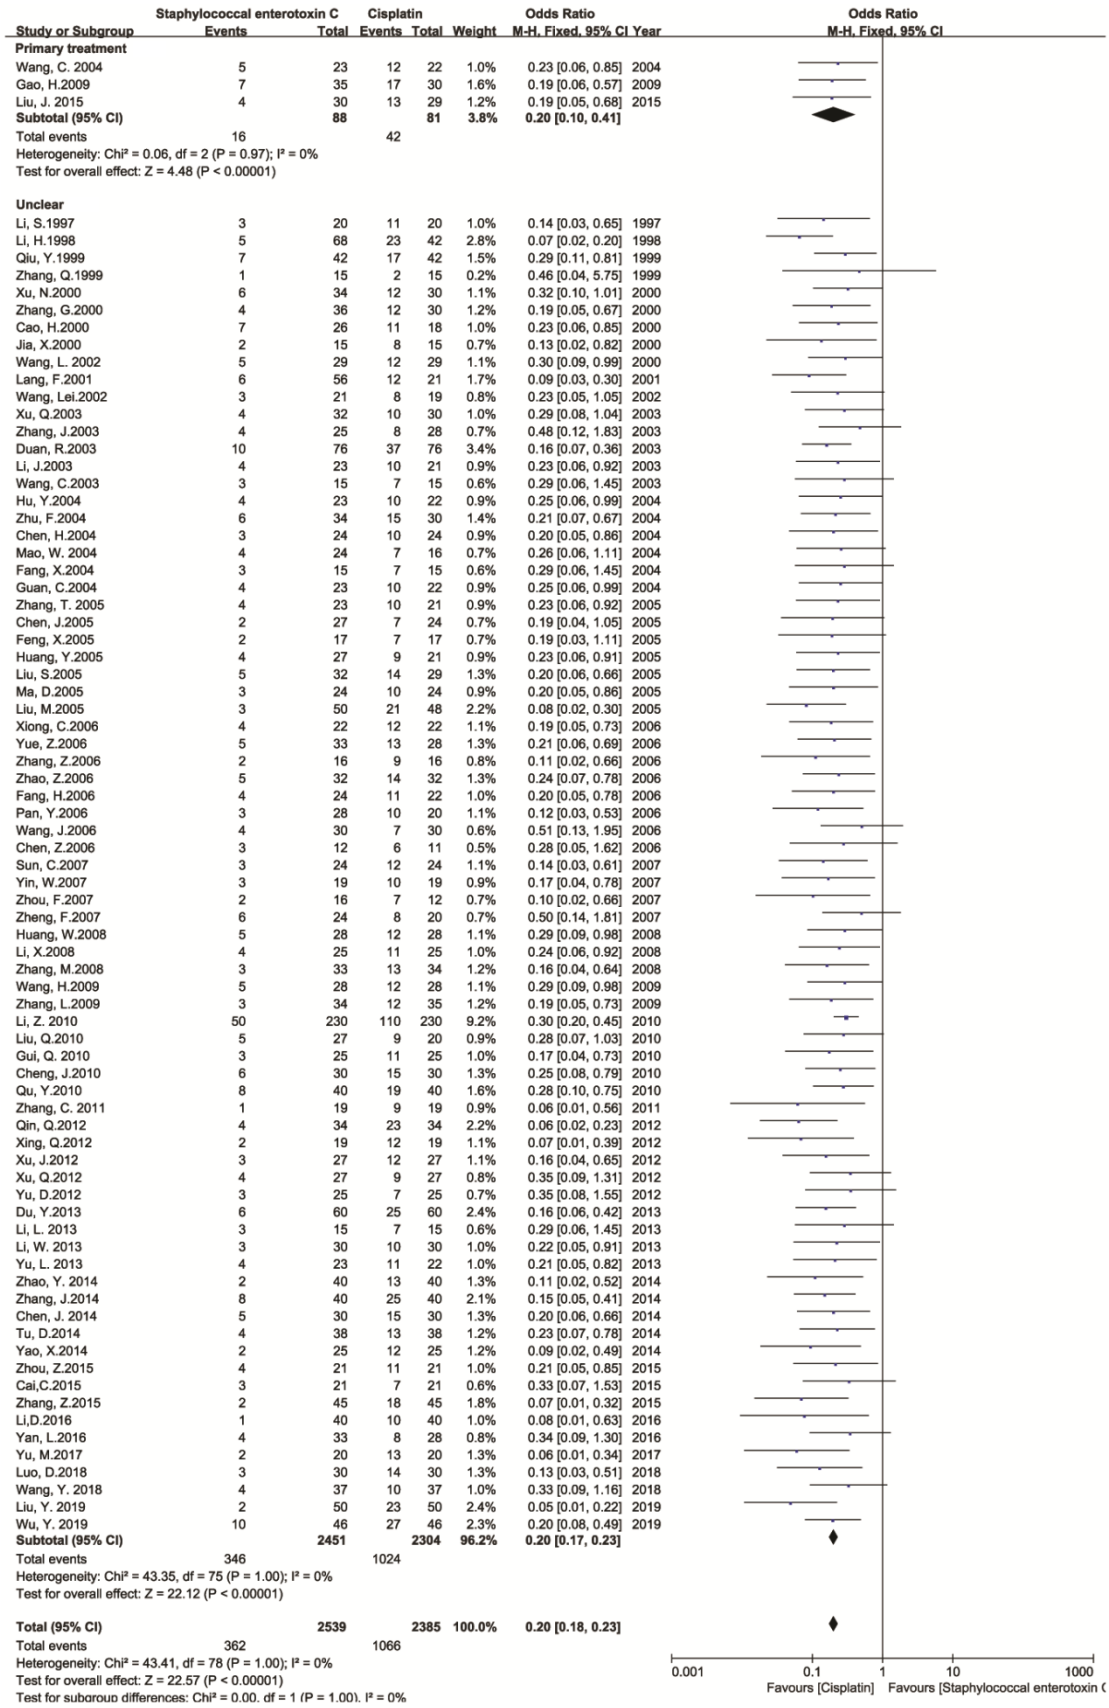

Fig.S28 Subgroups analysis of treatment failure via treatment history

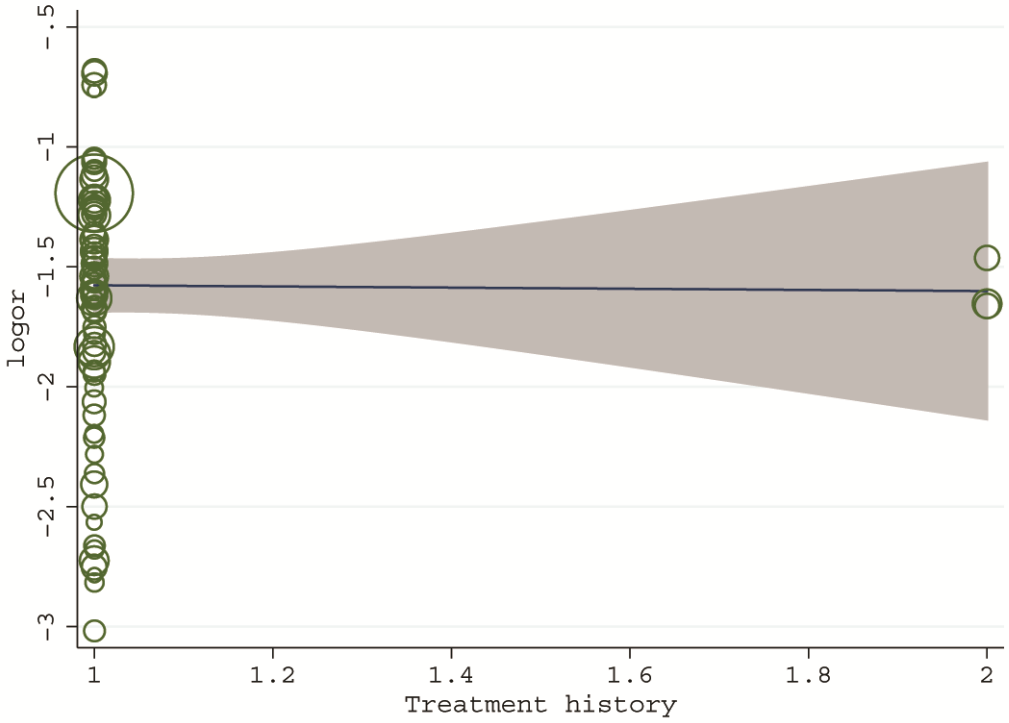

Fig.S29 Meta-regression of treatment failure via treatment history

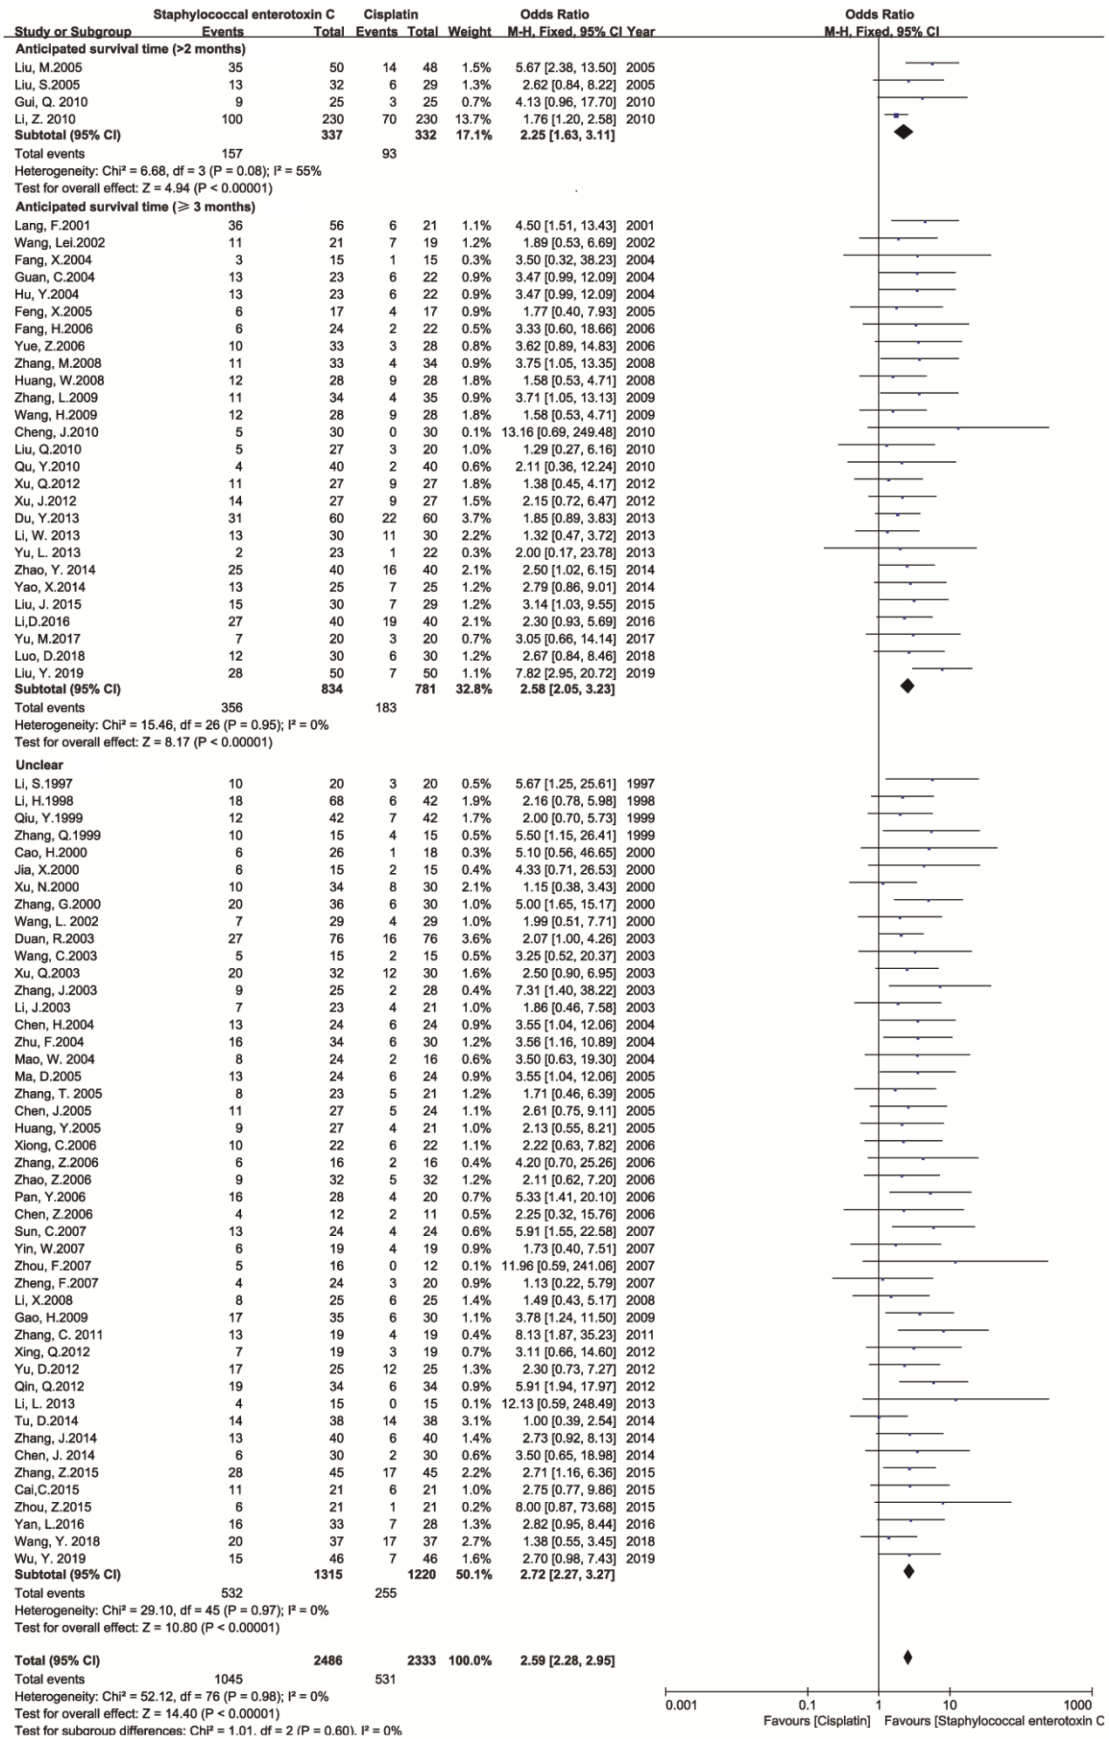

Fig.S30 Subgroups analysis of complete response via anticipated survival time

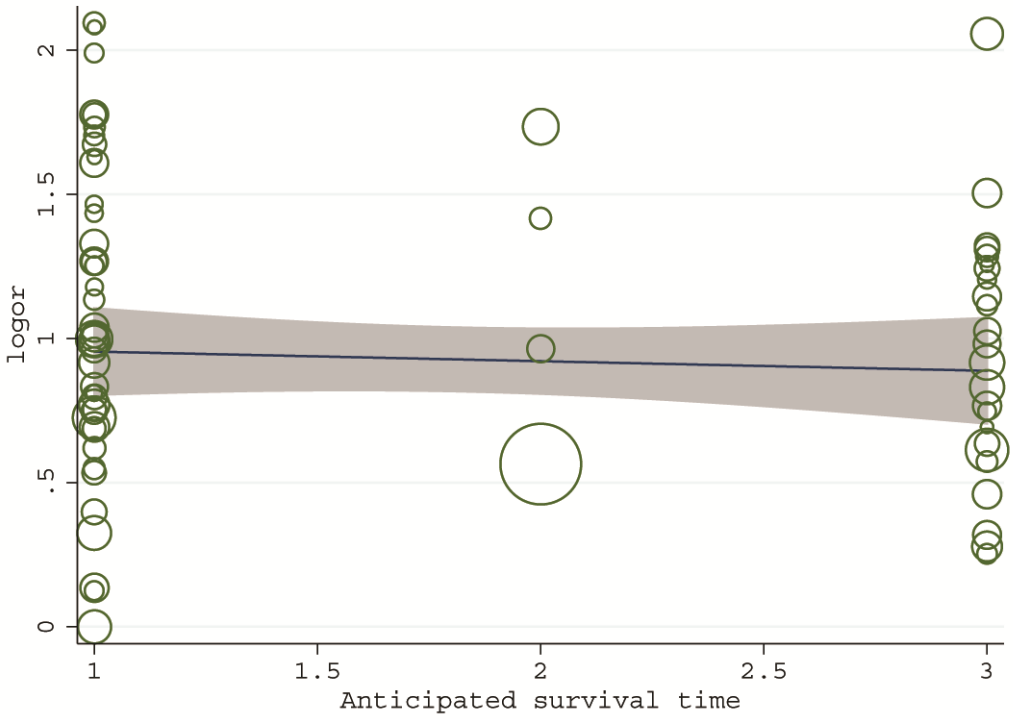

Fig.S31 Meta regression of complete response via anticipated survival time

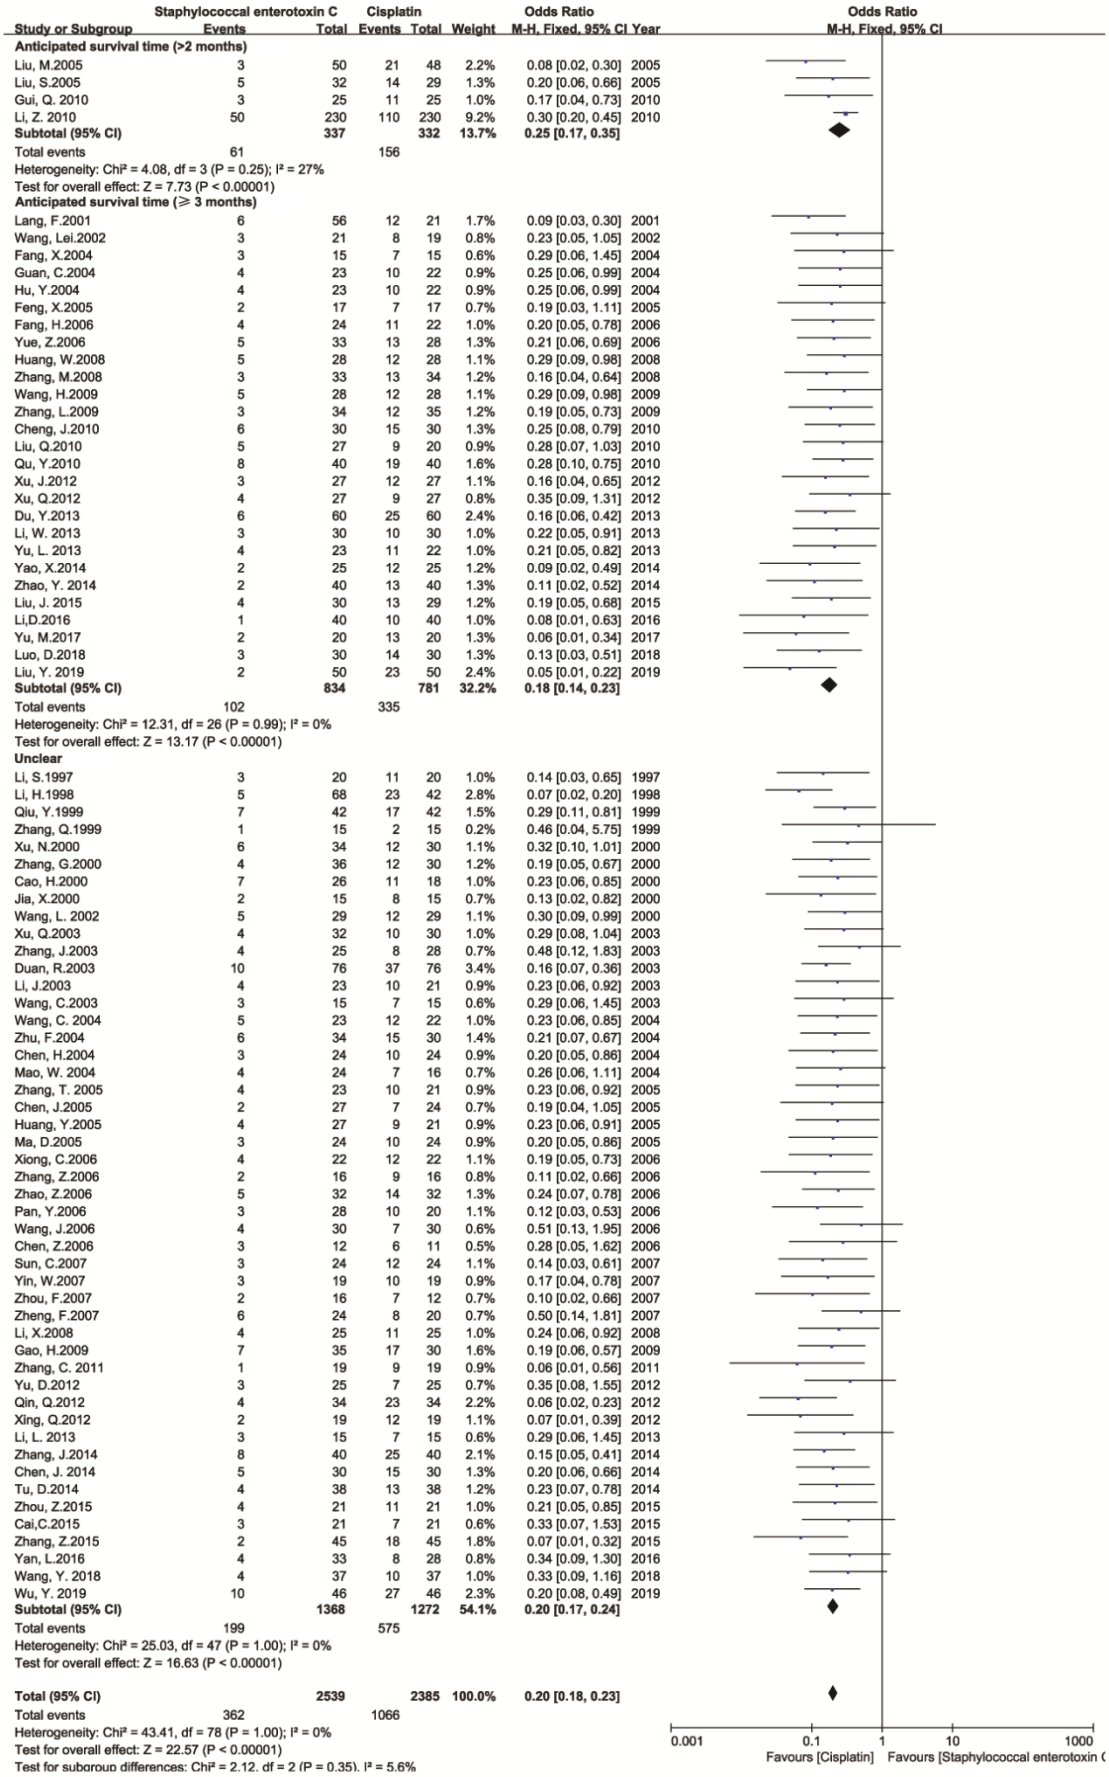

Fig.S32 Subgroups analysis of treatment failure via anticipated survival time

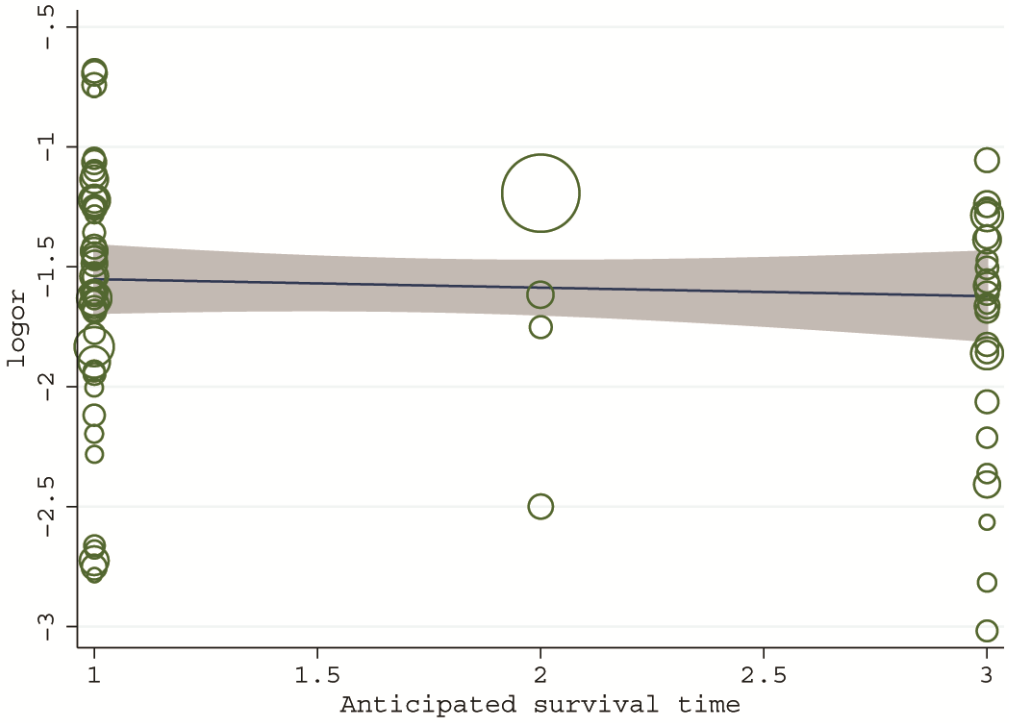

Fig.S33 Meta regression of treatment failure via anticipated survival time

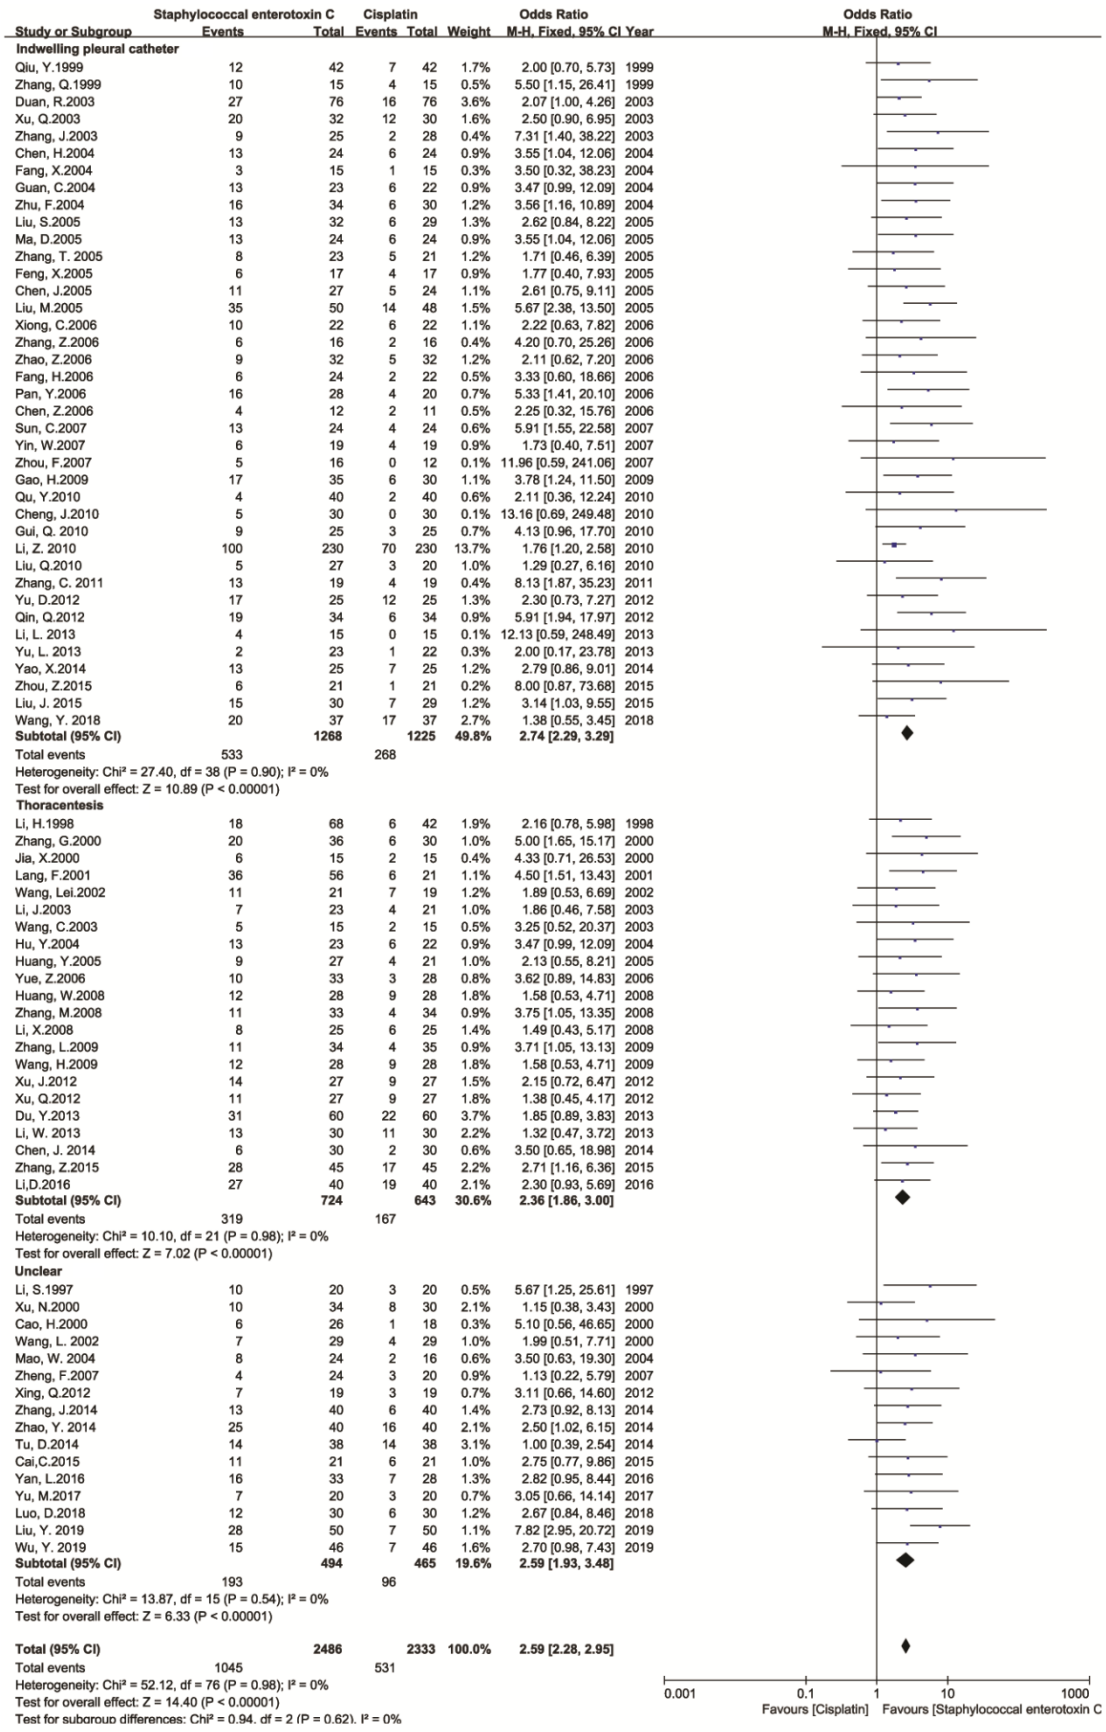

Fig.S34 Subgroups analysis of complete response via indwelling pleural catheter

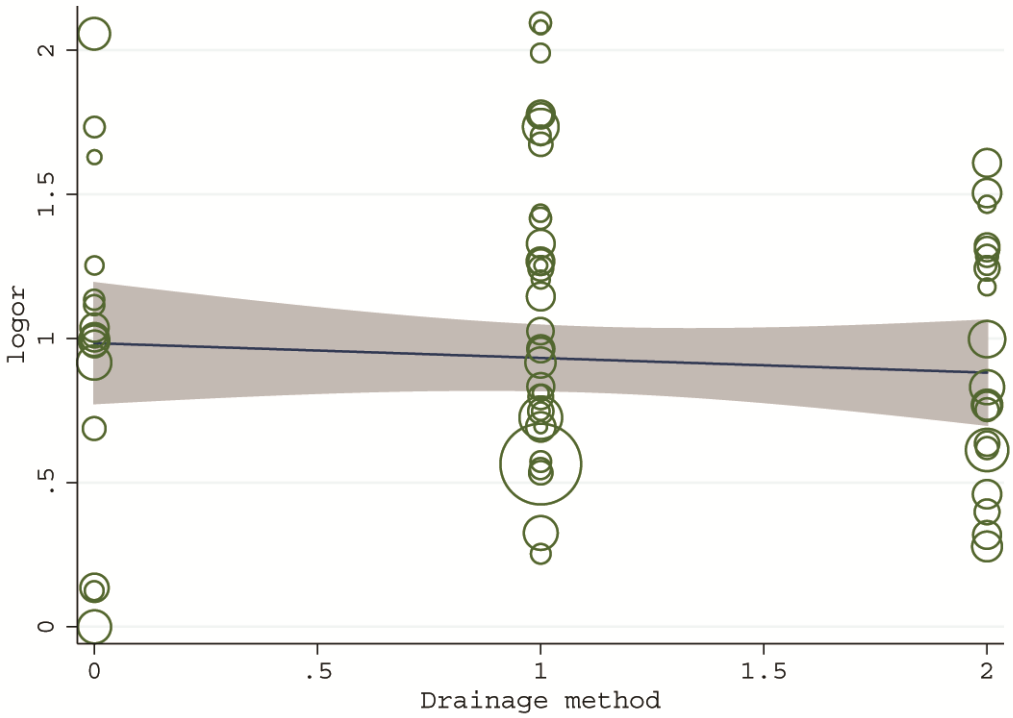

Fig.S35 Meta regression of complete response via indwelling pleural catheter

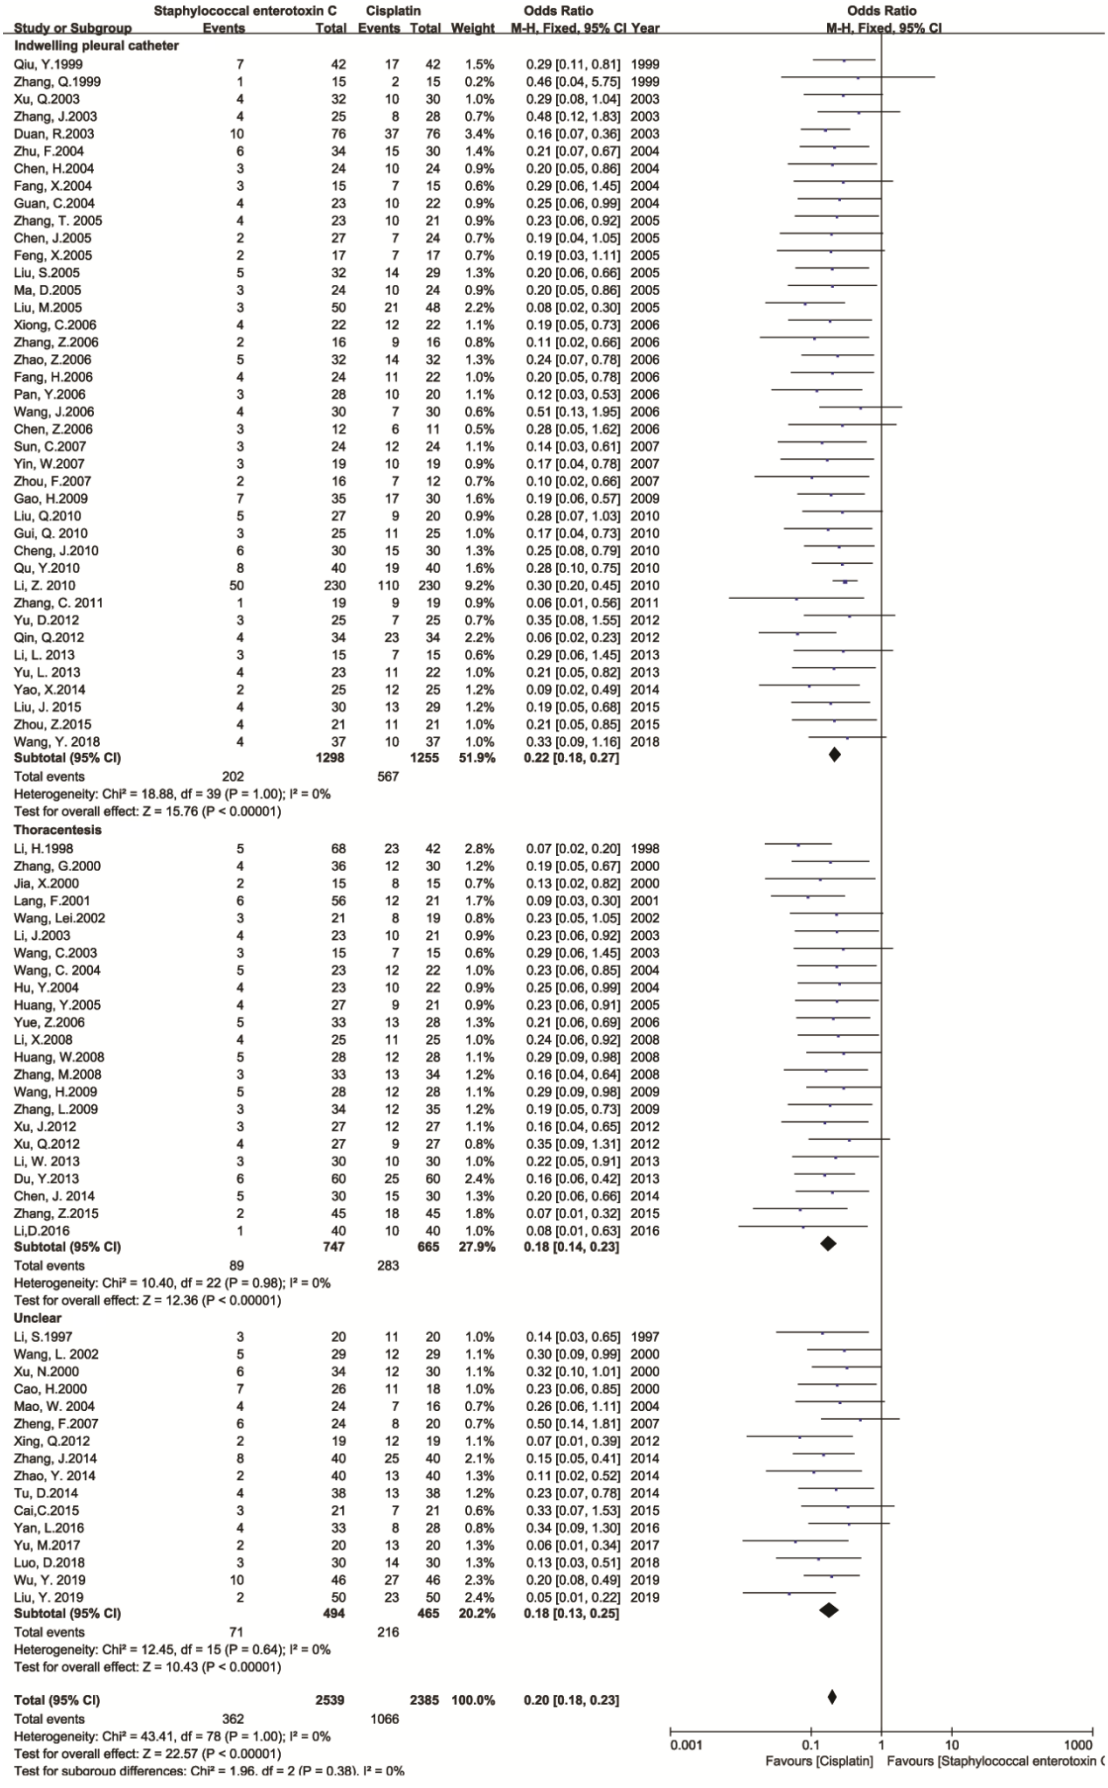

Fig.S36 Subgroups analysis of treatment failure via indwelling pleural catheter

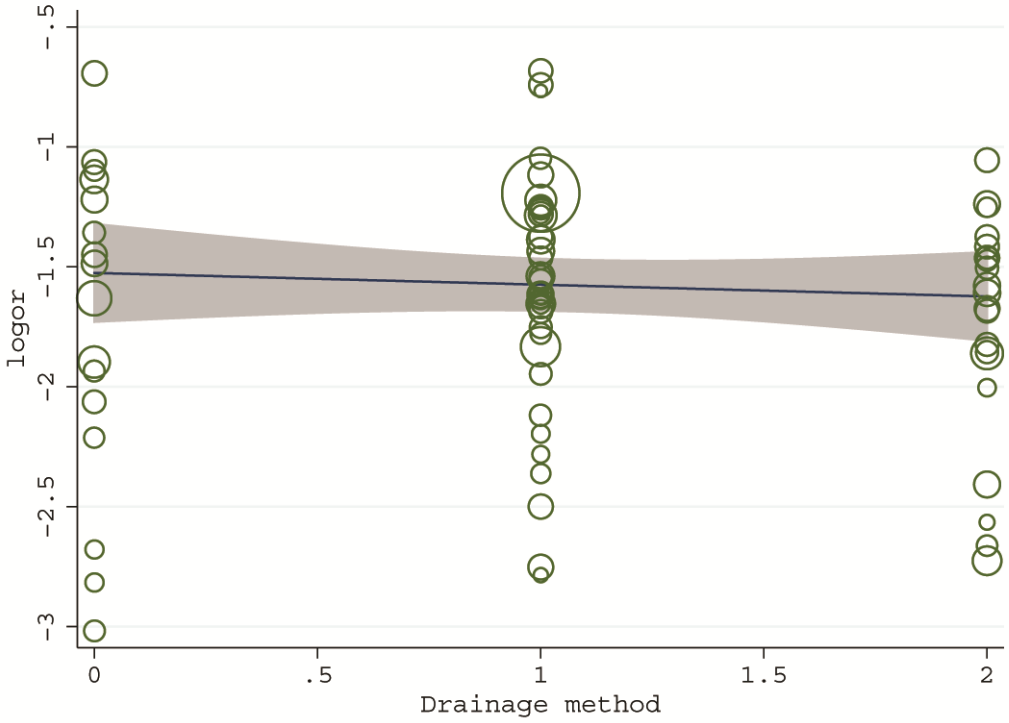

Fig.S37 Meta regression of treatment failure via indwelling pleural catheter

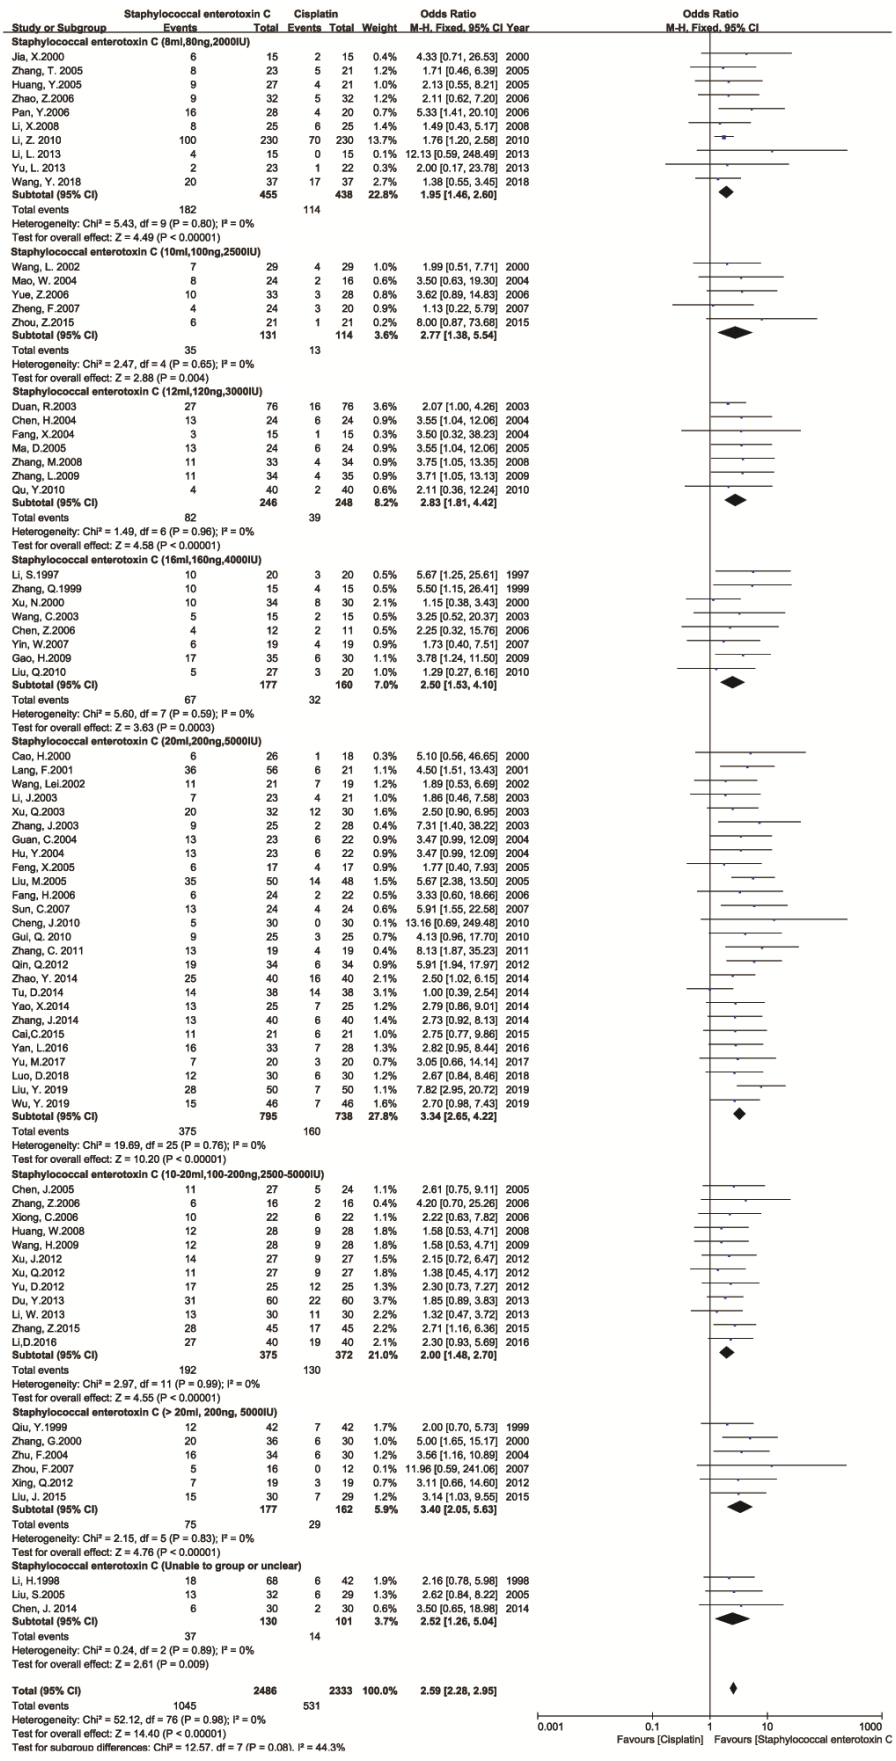

Fig.S38 Subgroups analysis of complete response via staphylococcal enterotoxin C dosage

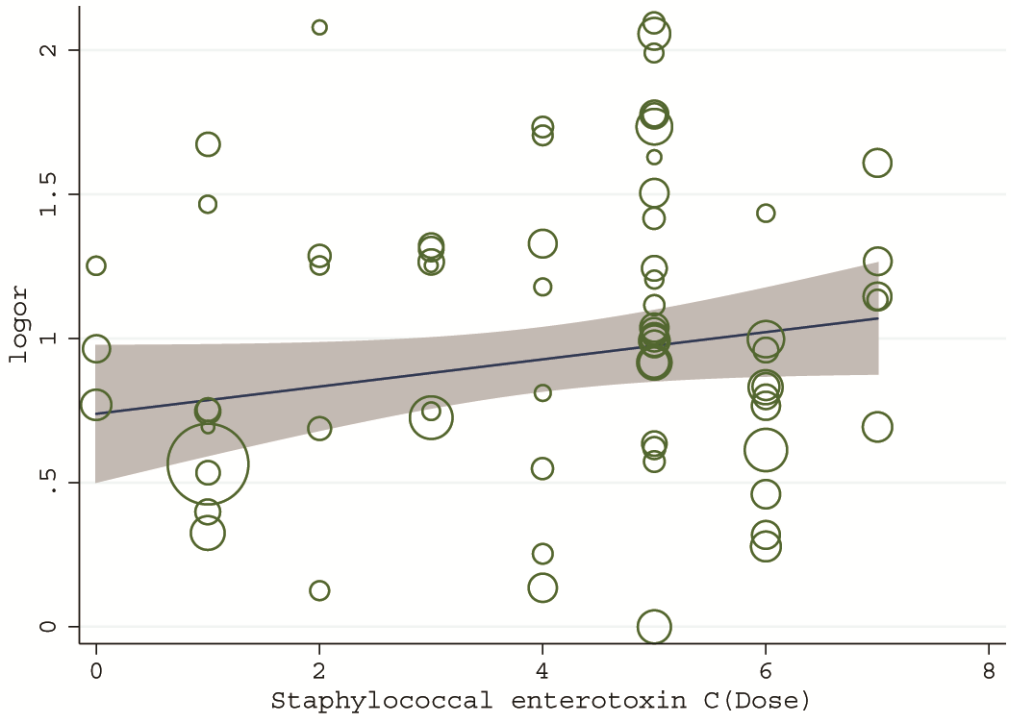

Fig.S39 Meta regression of complete response via staphylococcal enterotoxin C dosage

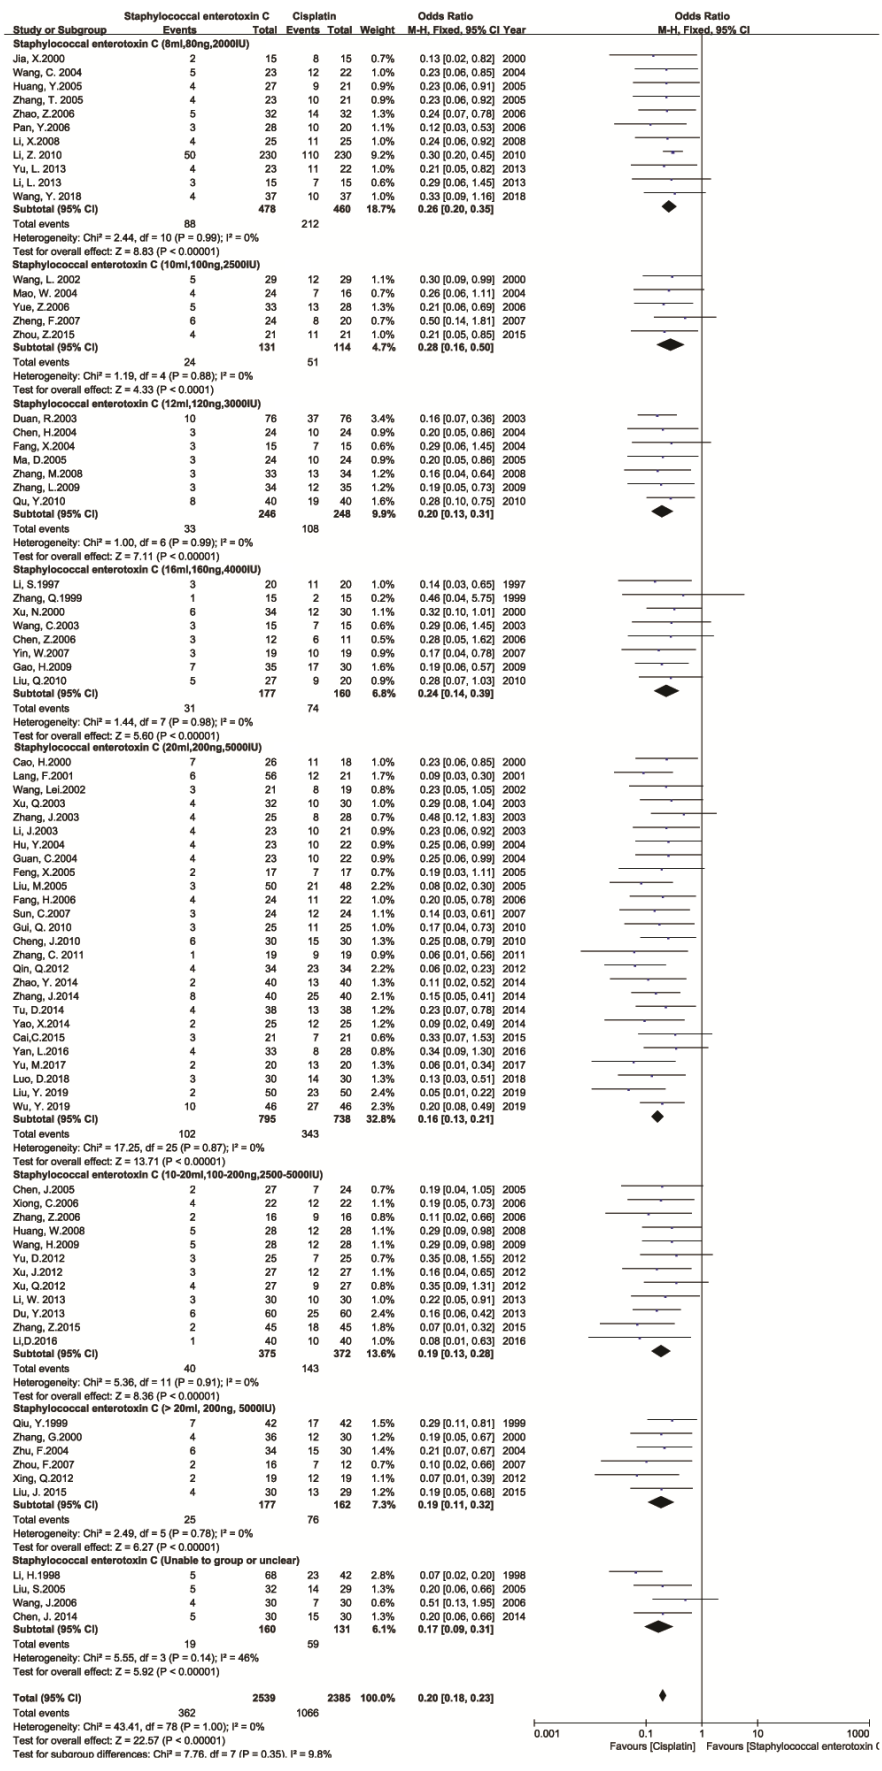

Fig.S40 Subgroups analysis of treatment failure via staphylococcal enterotoxin C dosage

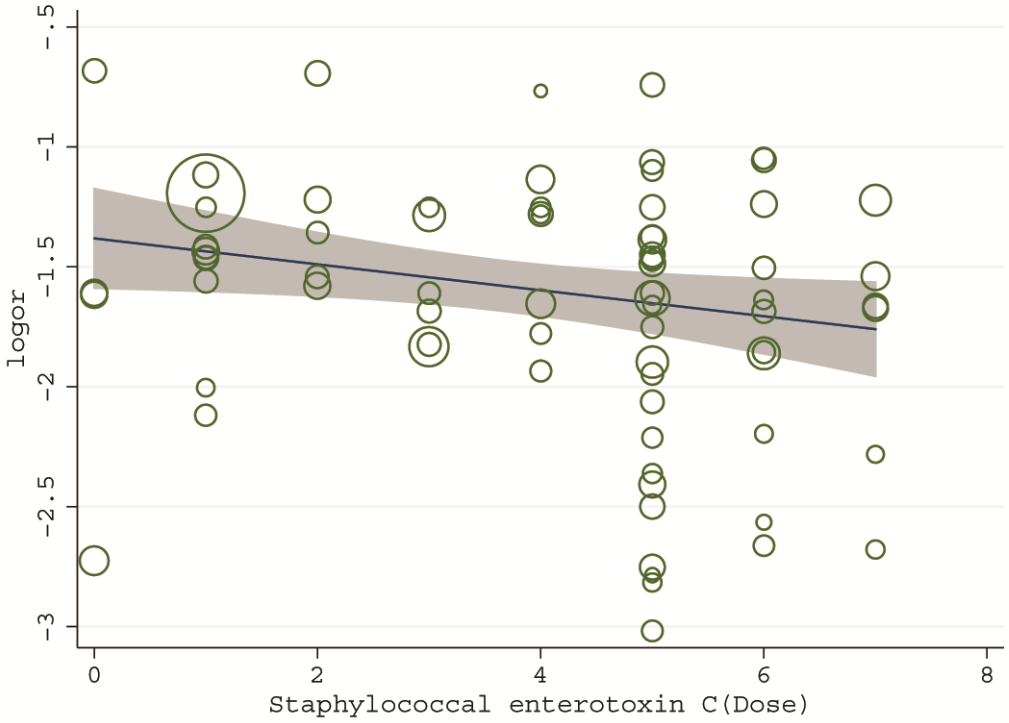

Fig.S41 Meta regression of treatment failure via staphylococcal enterotoxin C dosage

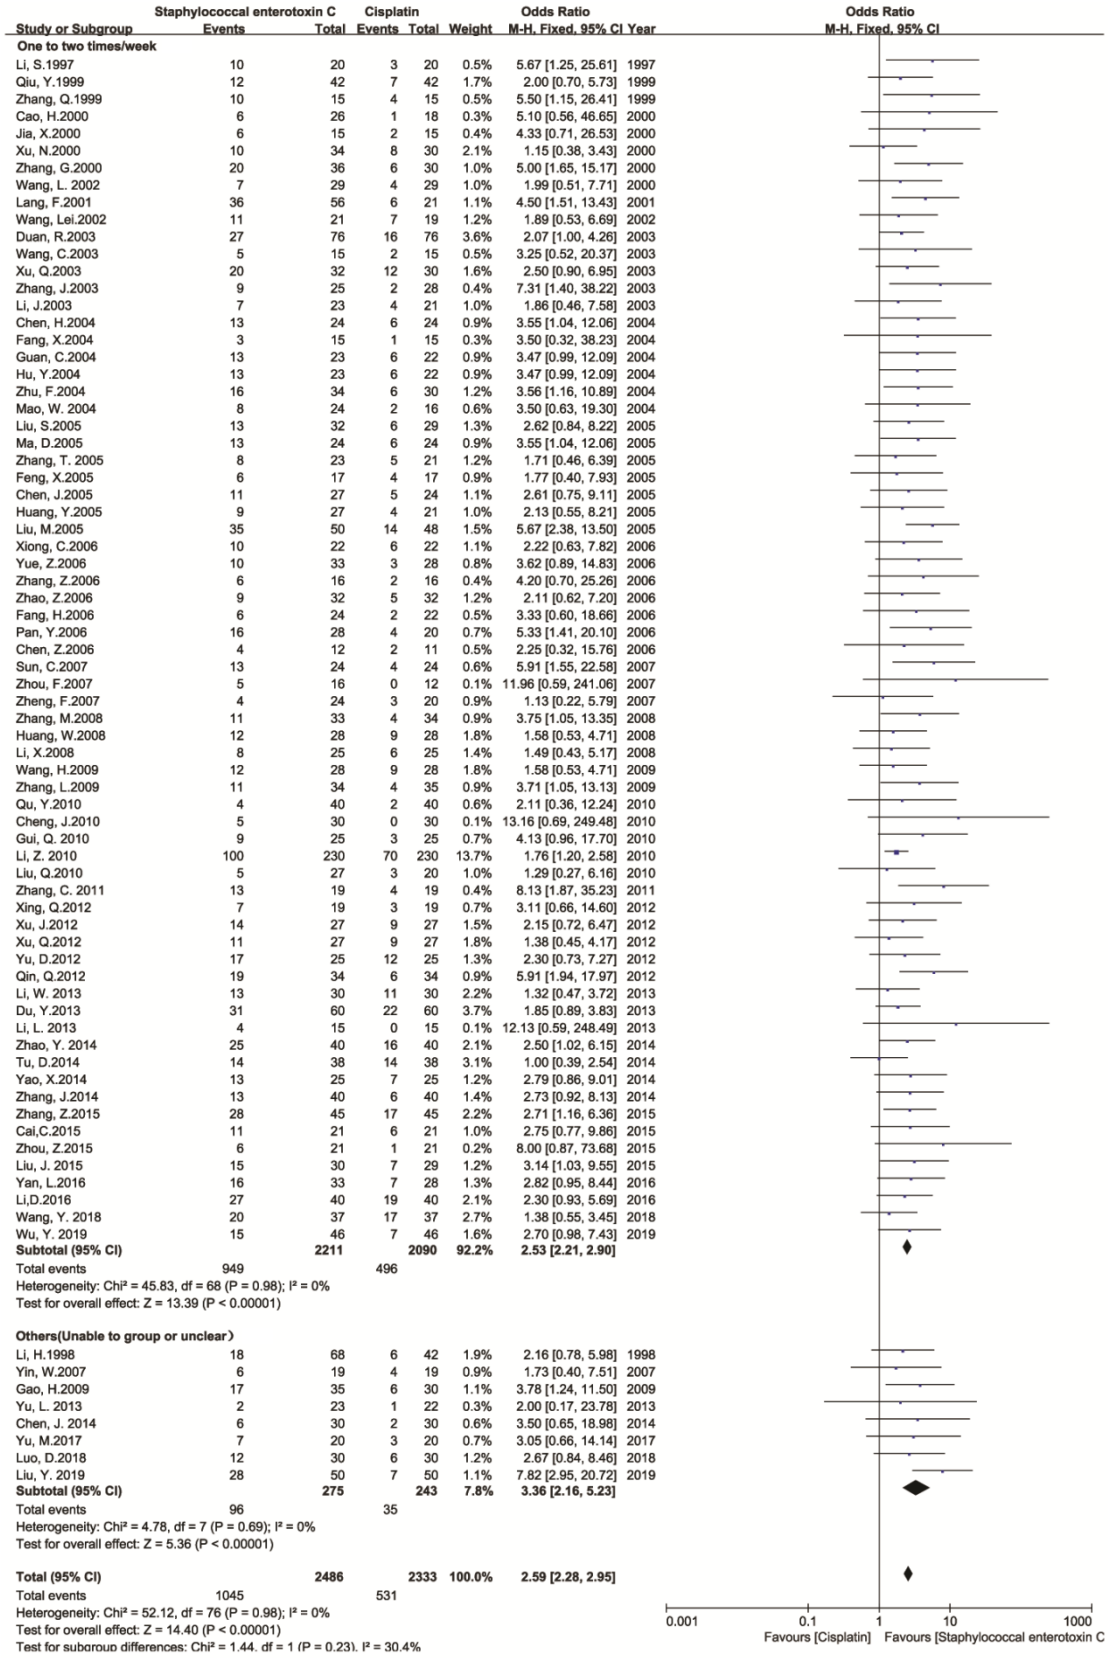

Fig.S42 Subgroups analysis of complete response via treatment frequency

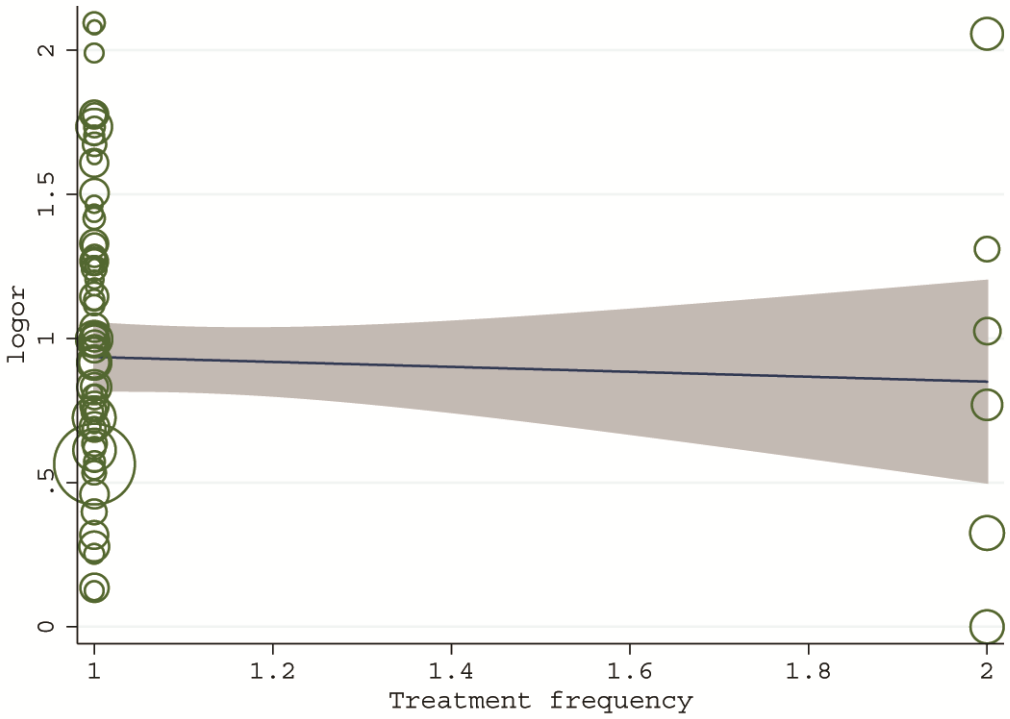

Fig.S43 Meta regression of complete response via treatment frequency

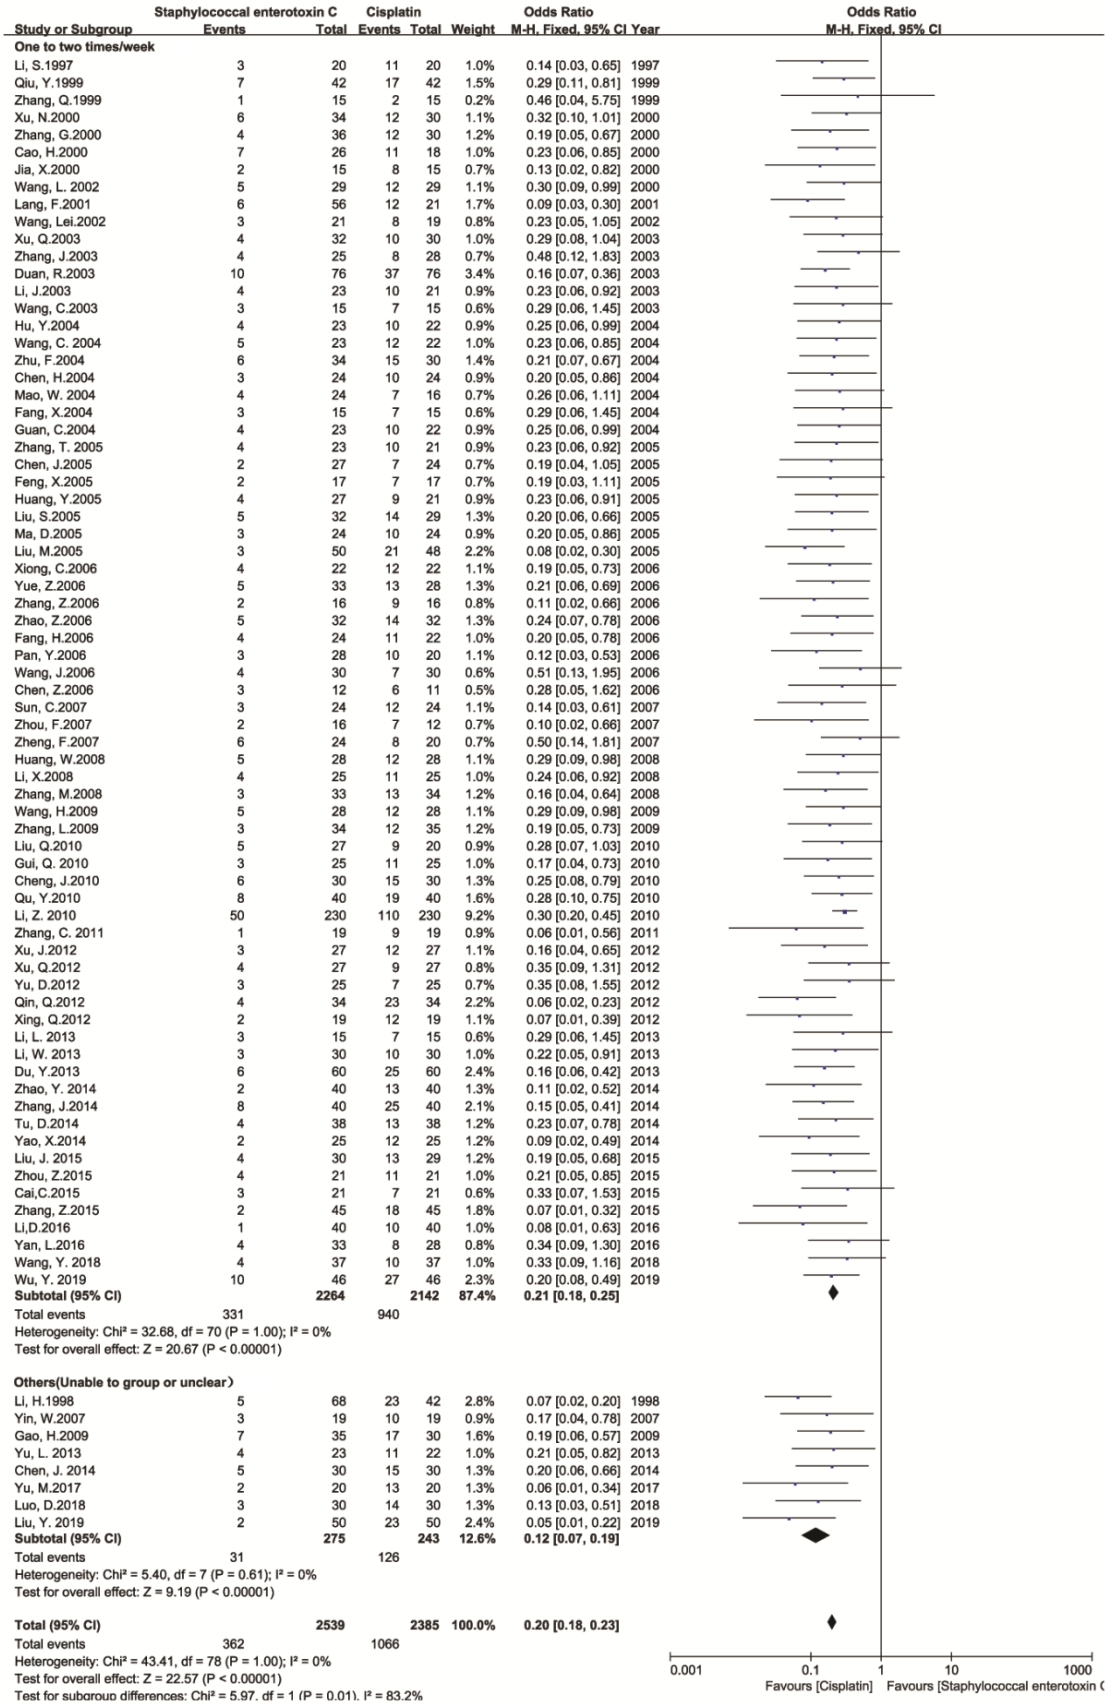

Fig.S44 Subgroups analysis of treatment failure via treatment frequency

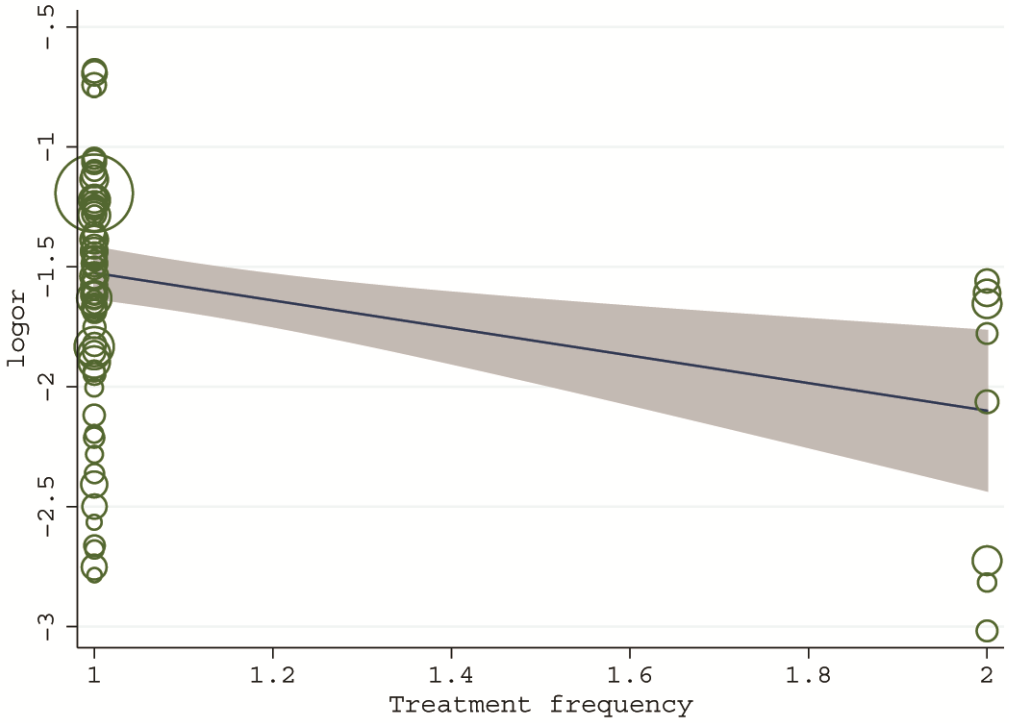

Fig.S45 Meta regression of treatment failure via treatment frequency

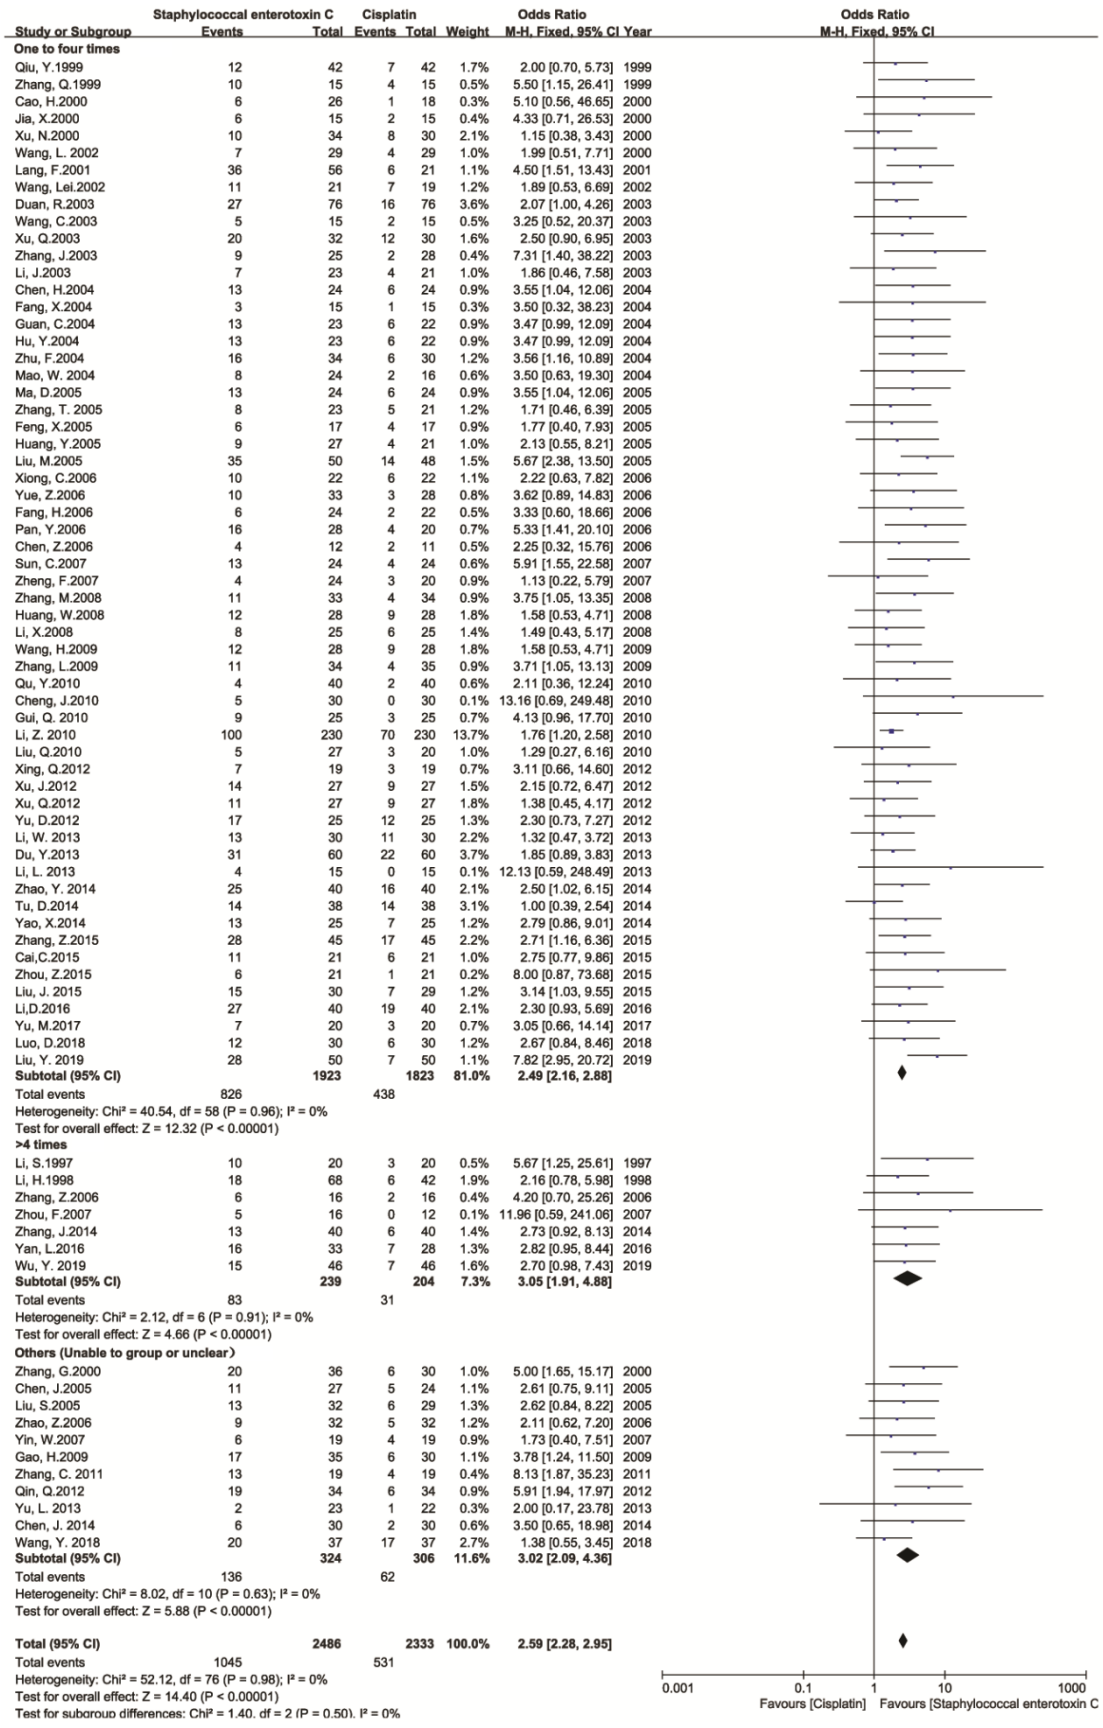

Fig.S46 Subgroups analysis of complete response via treatment times

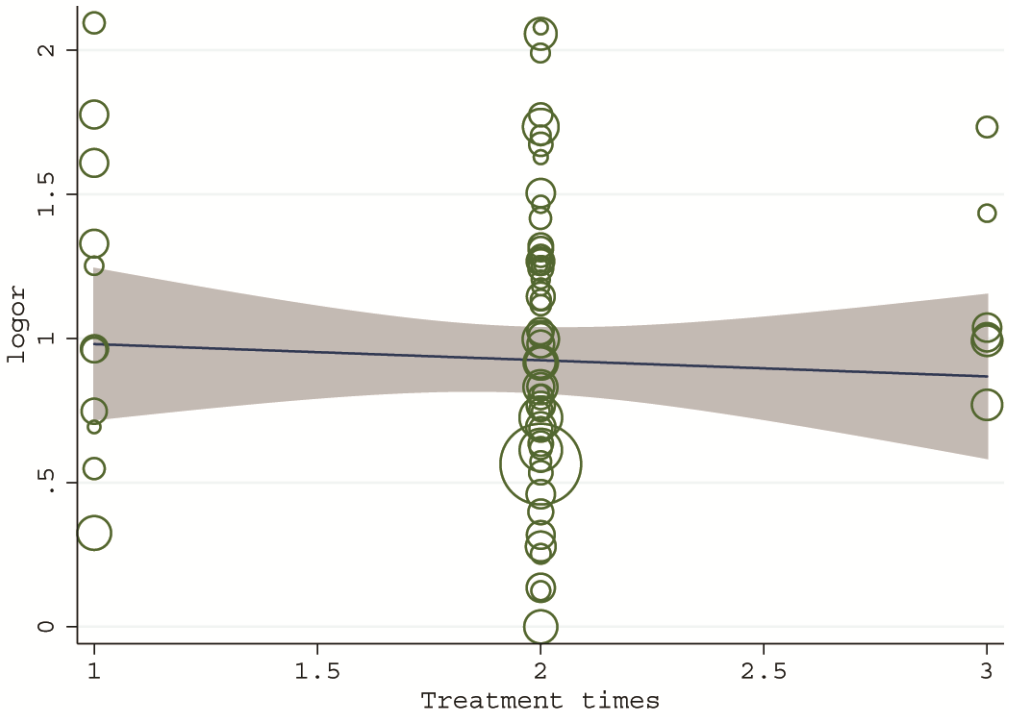

Fig.S47 Meta regression of complete response via treatment times

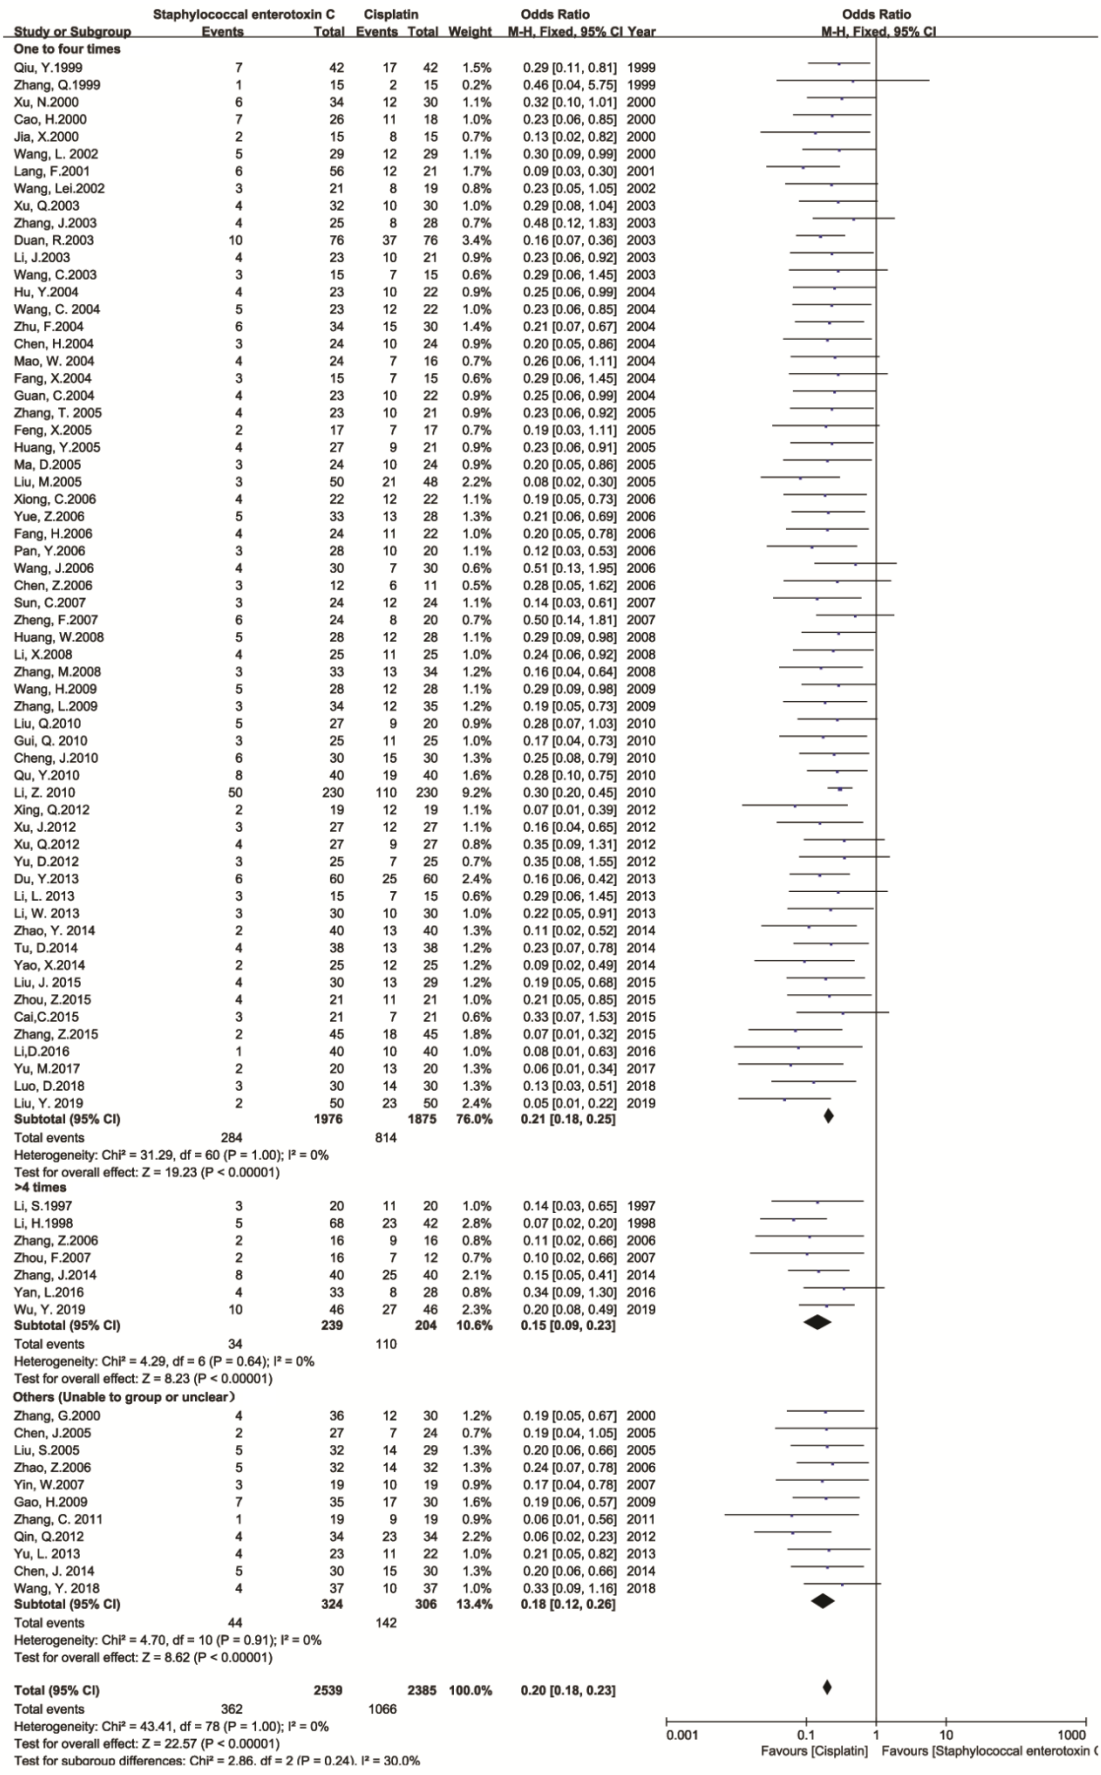

Fig.S48 Subgroups analysis of treatment failure via treatment times

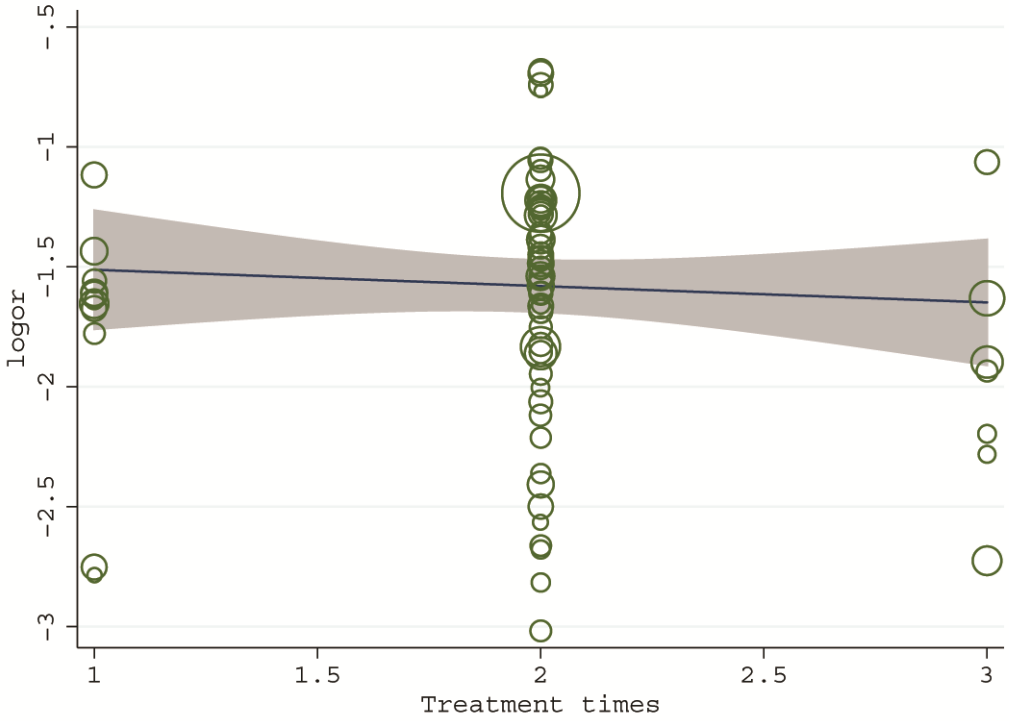

Fig.S49 Meta regression of treatment failure via treatment times

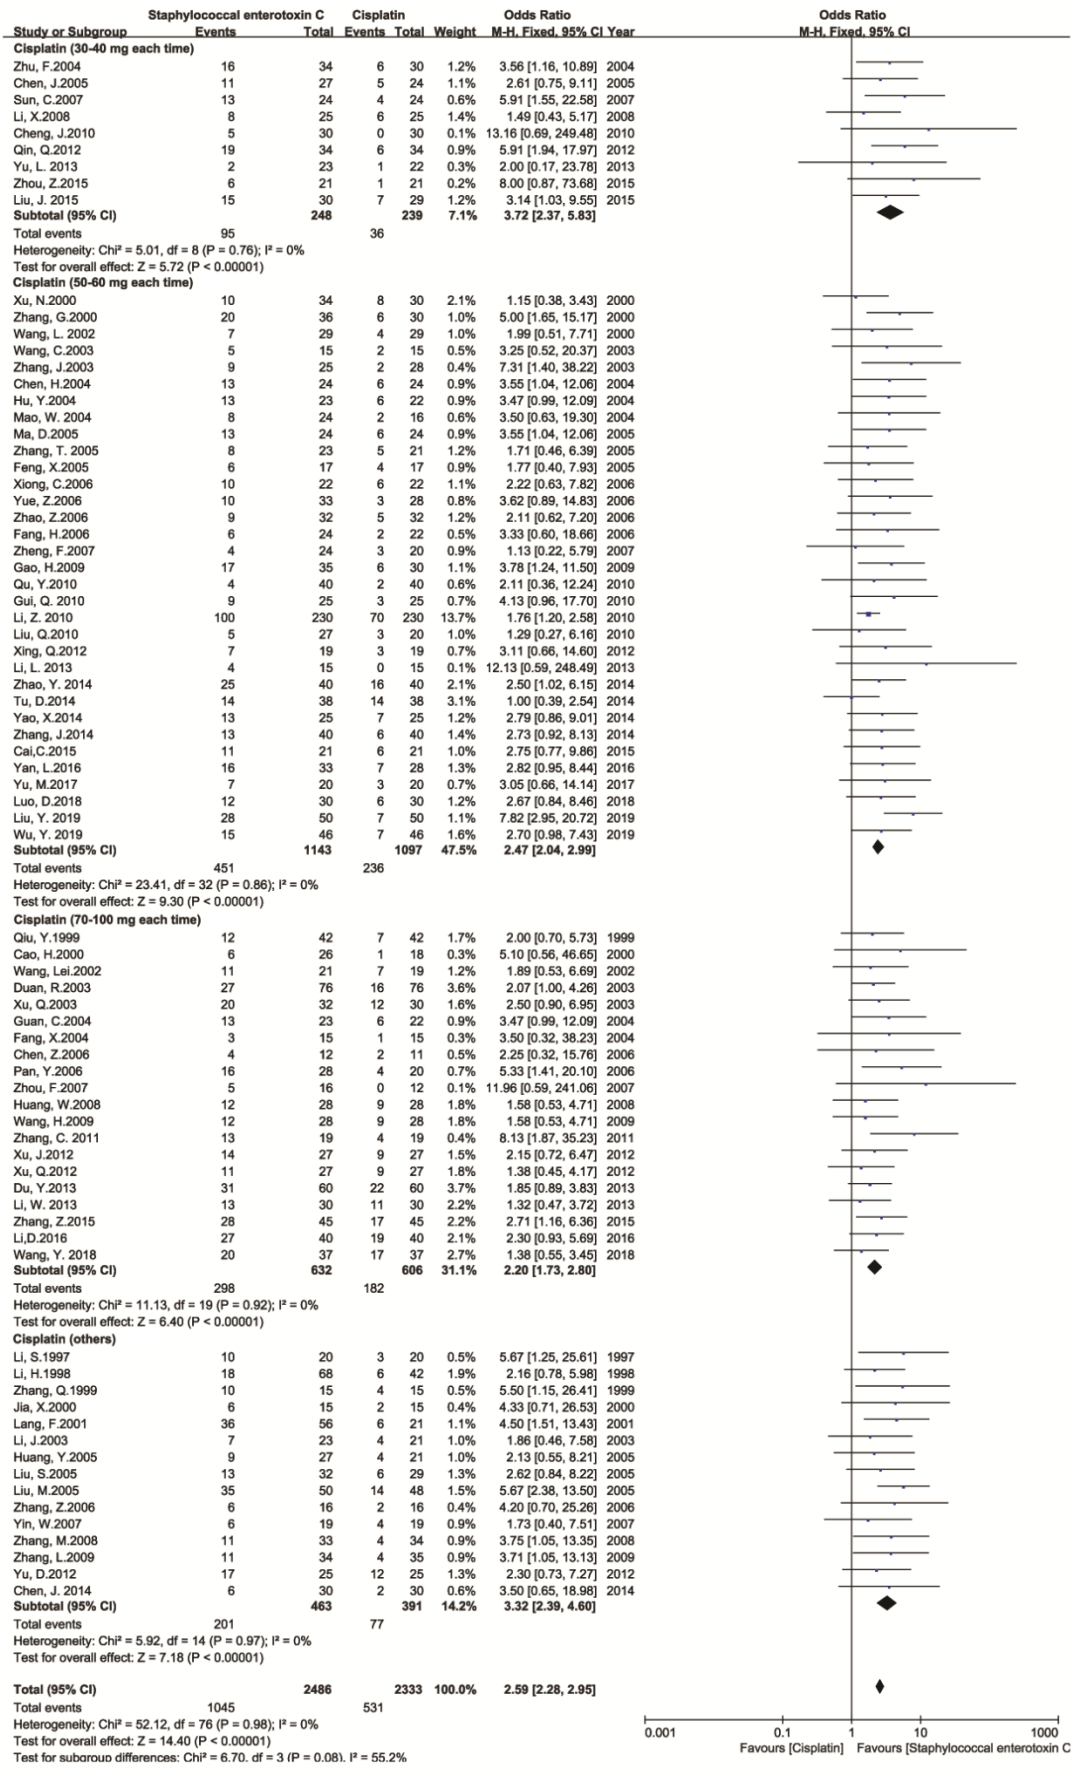

Fig.S50 Subgroups analysis of complete response via Cisplatin (dosage)

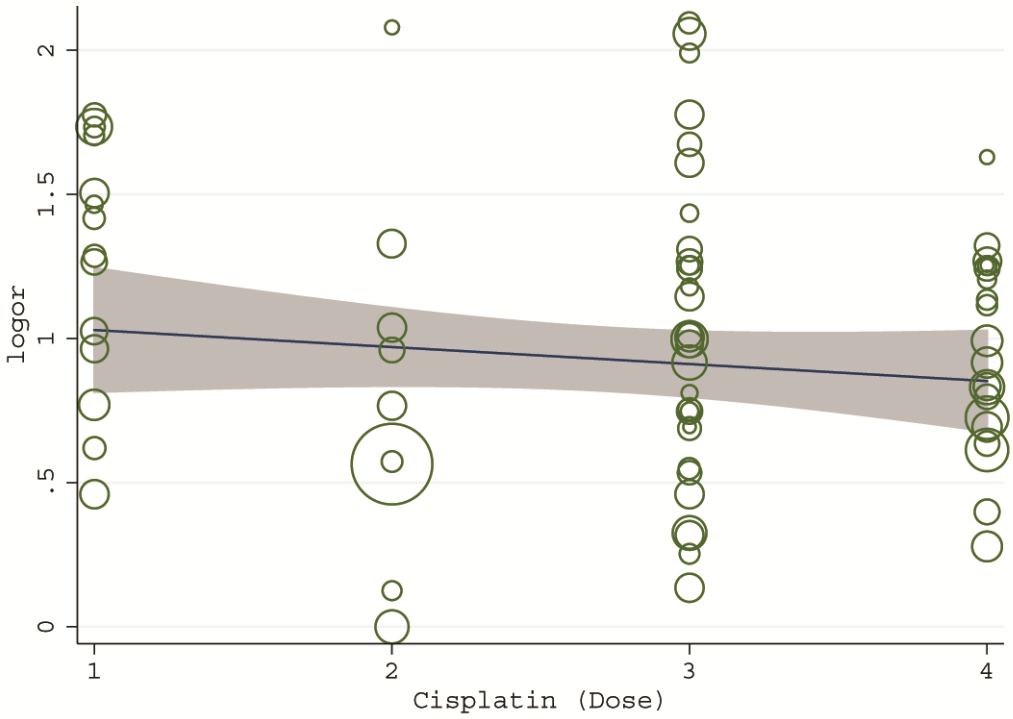

Fig.S51 Meta regression of complete response via Cisplatin (dosage)

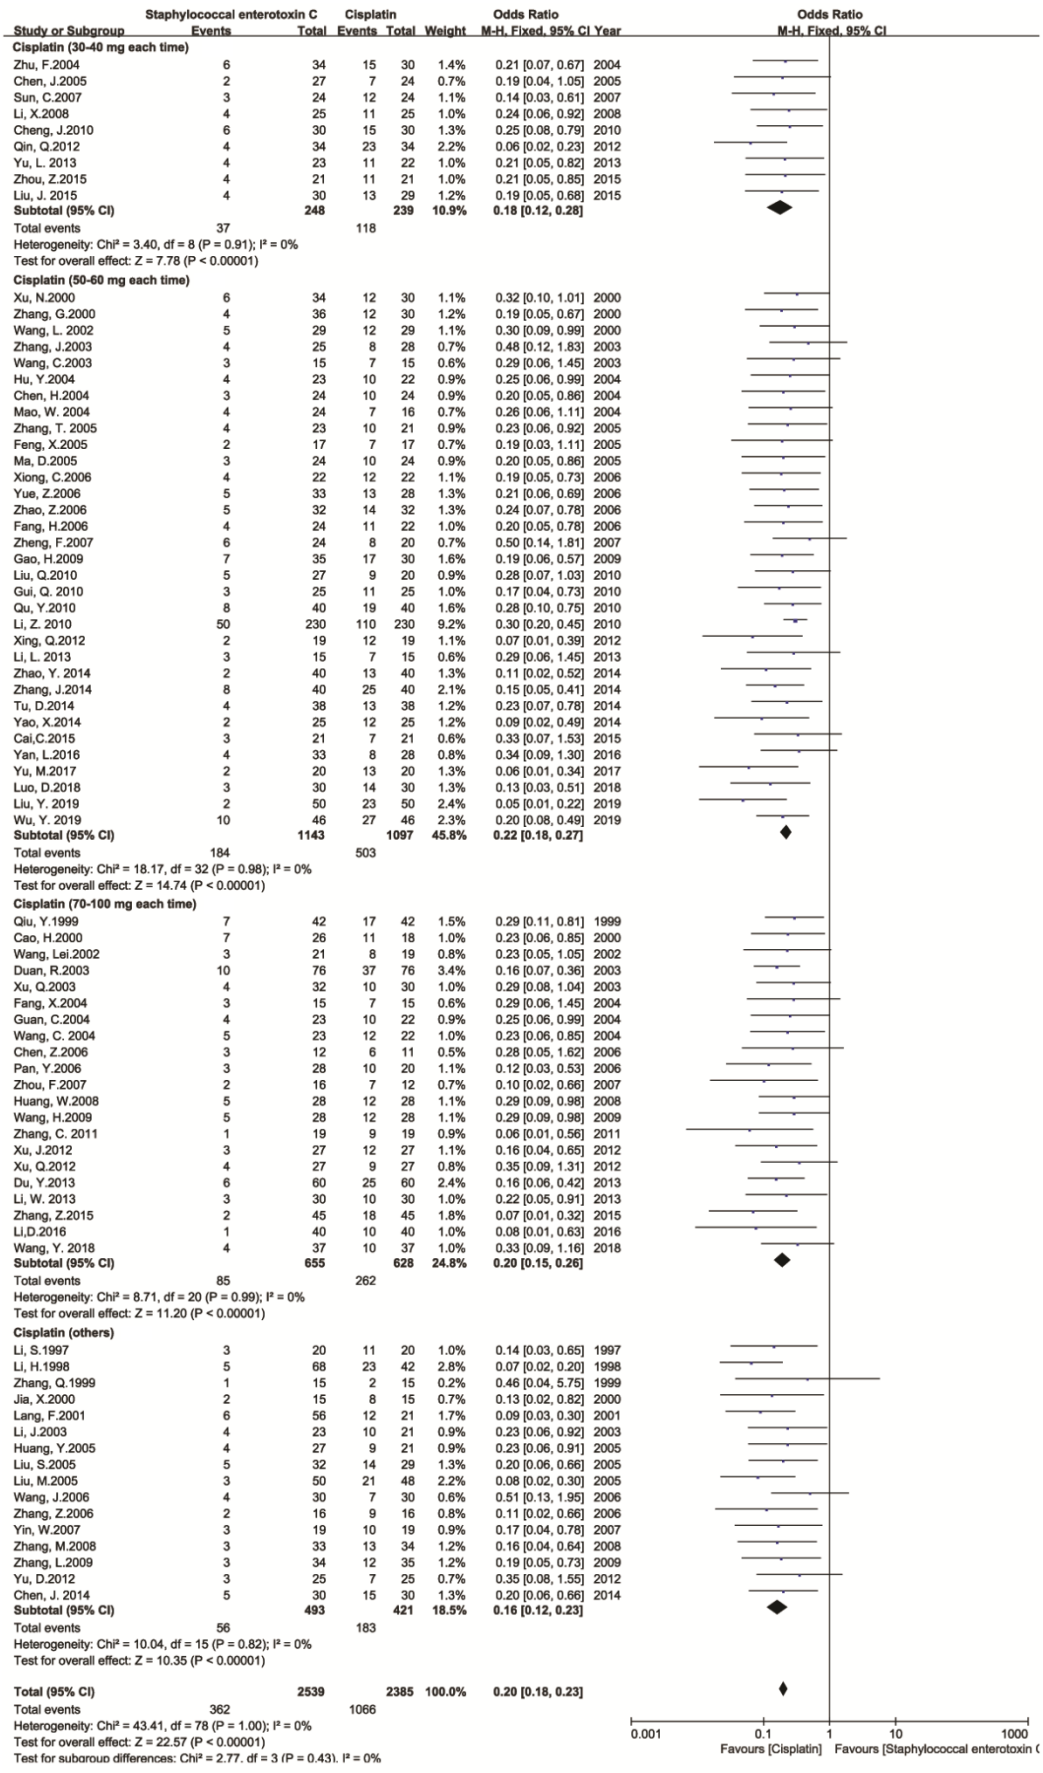

Fig.S52 Subgroups analysis of treatment failure via Cisplatin (dosage)

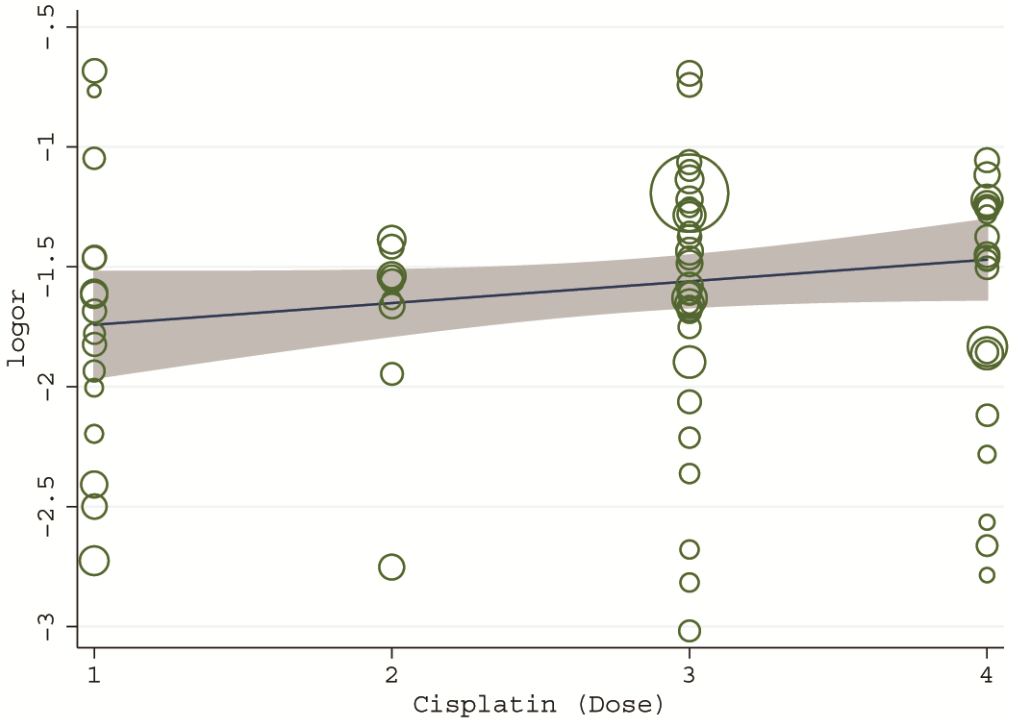

Fig.S53 Meta regression of treatment failure via Cisplatin (dosage)

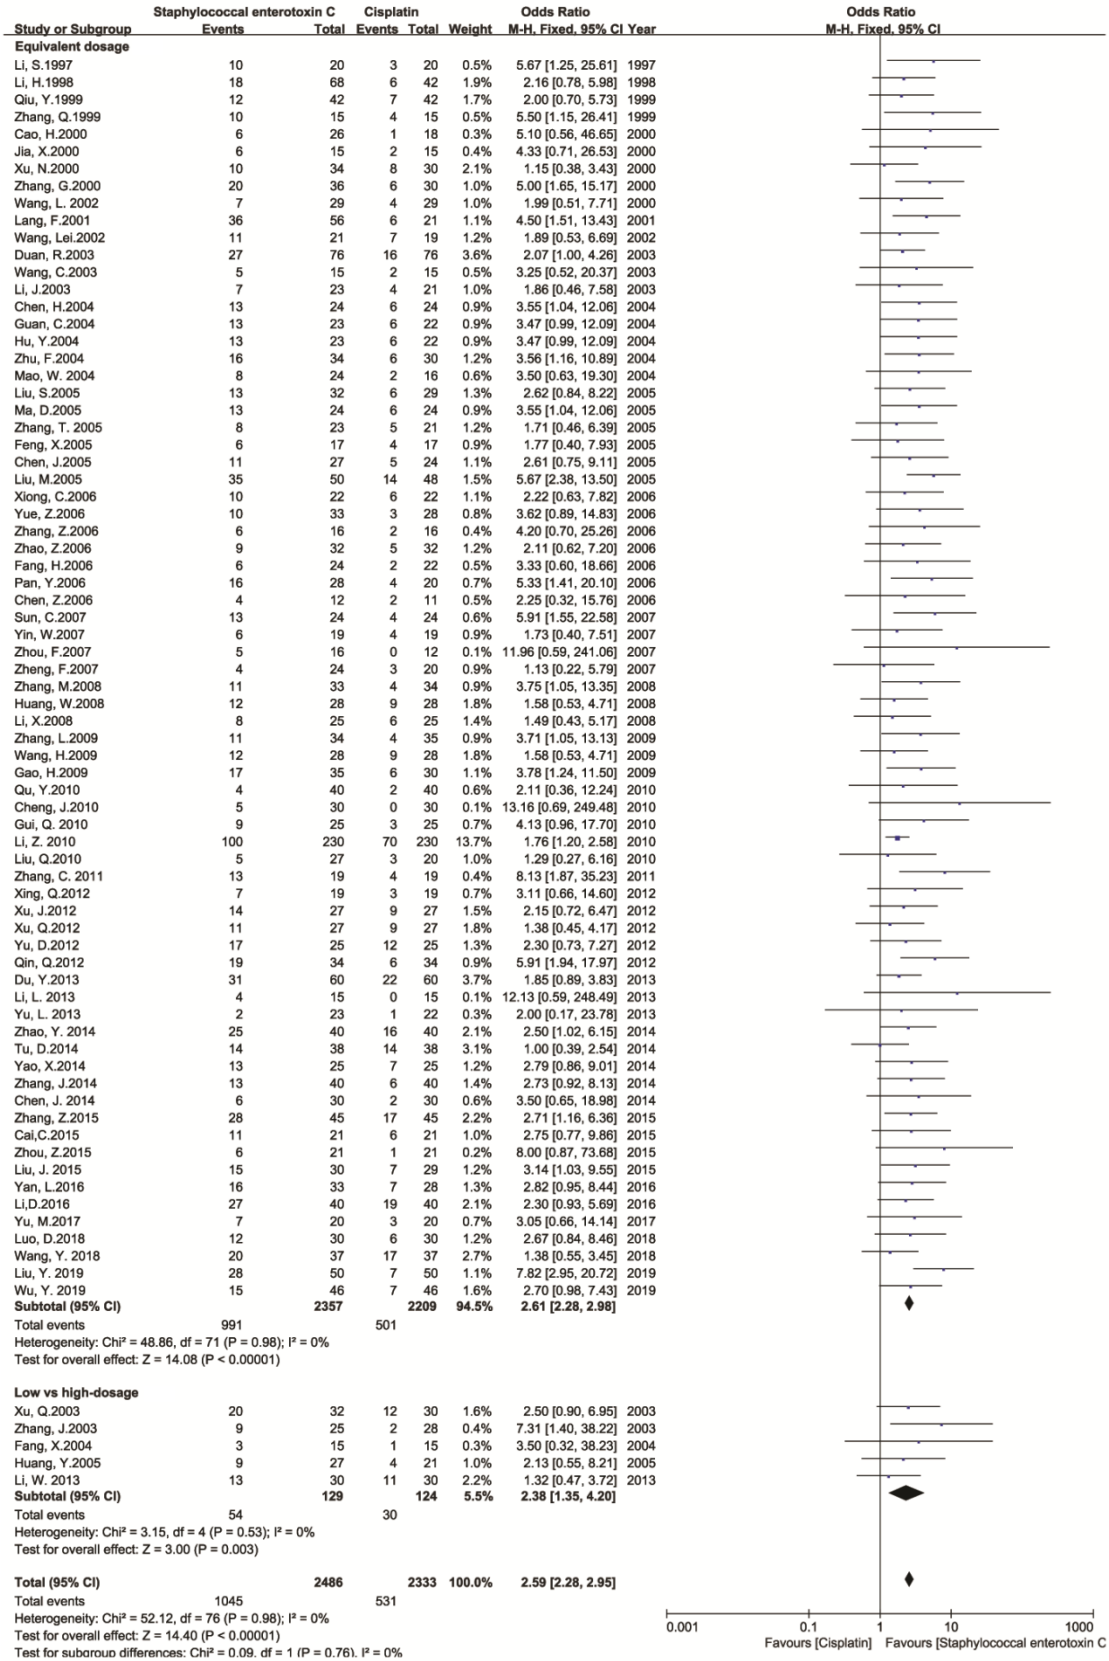

Fig.S54 Subgroups analysis of complete response via dosage difference of cisplatin

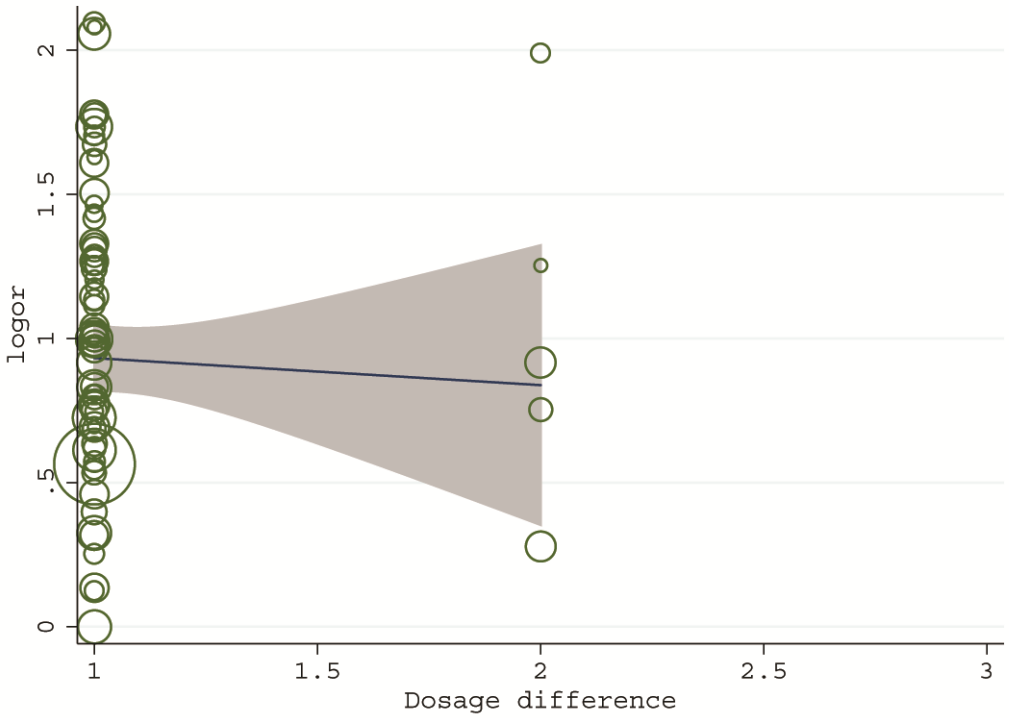

Fig.S55 Meta regression of complete response via dosage difference of cisplatin

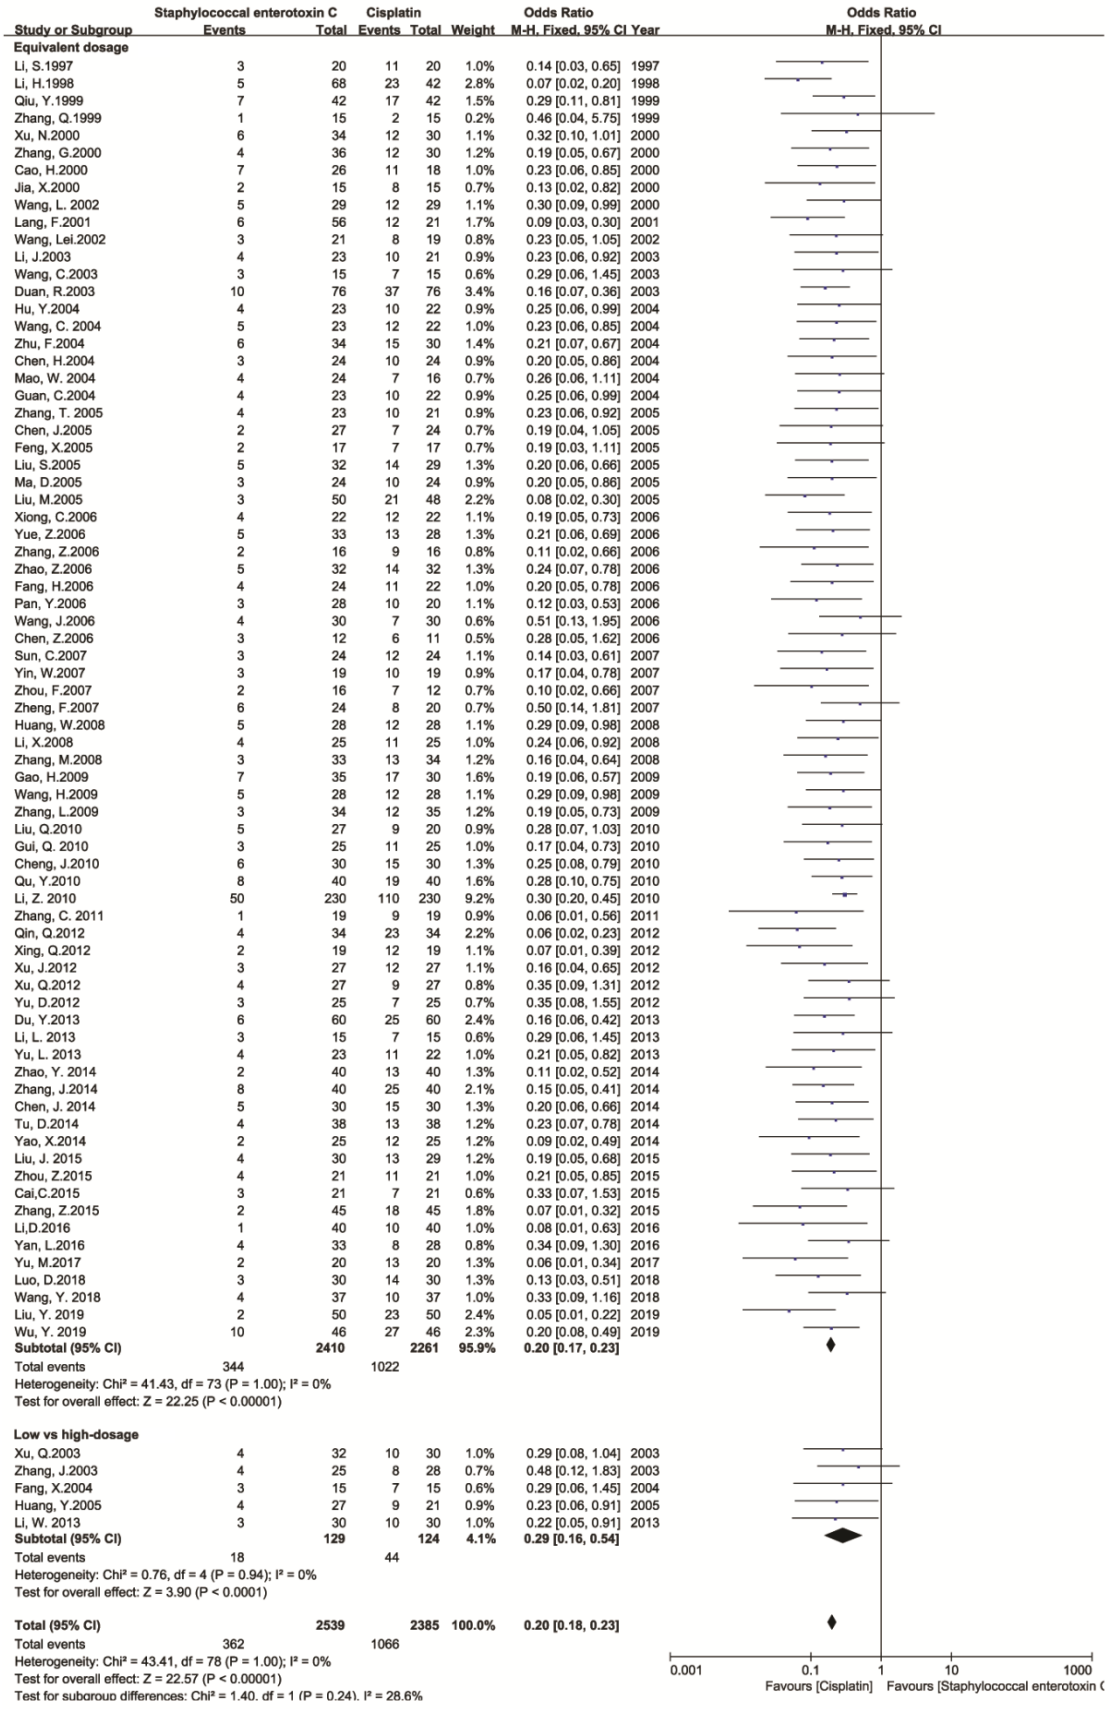

Fig.S56 Subgroups analysis of treatment failure via dosage difference of cisplatin

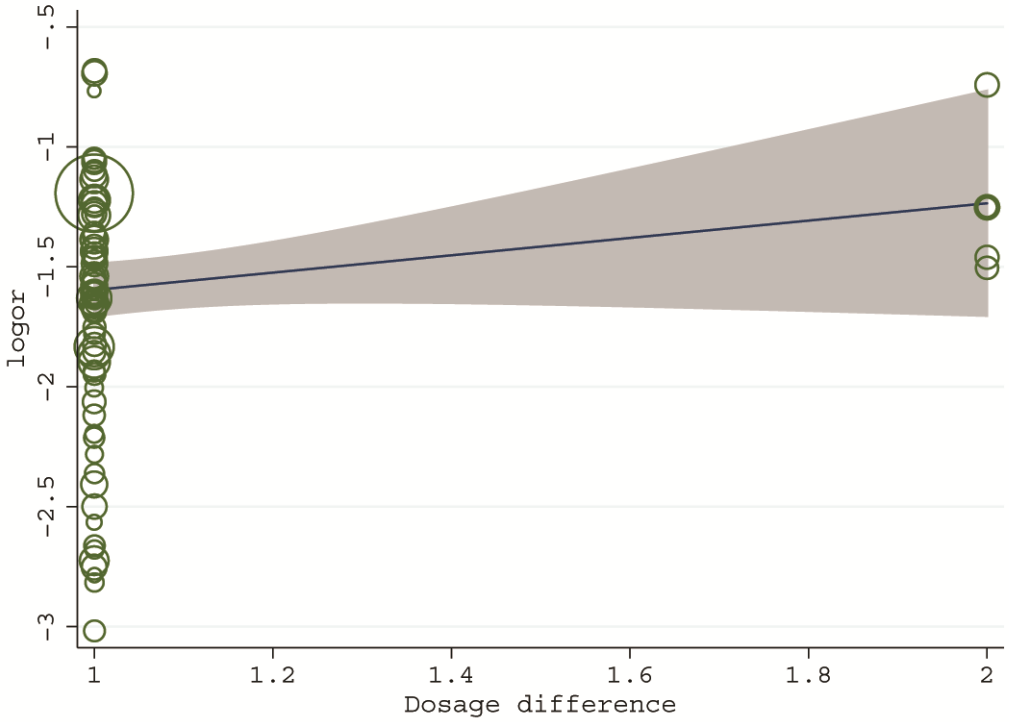

Fig.S57 Meta regression of treatment failure via dosage difference of cisplatin

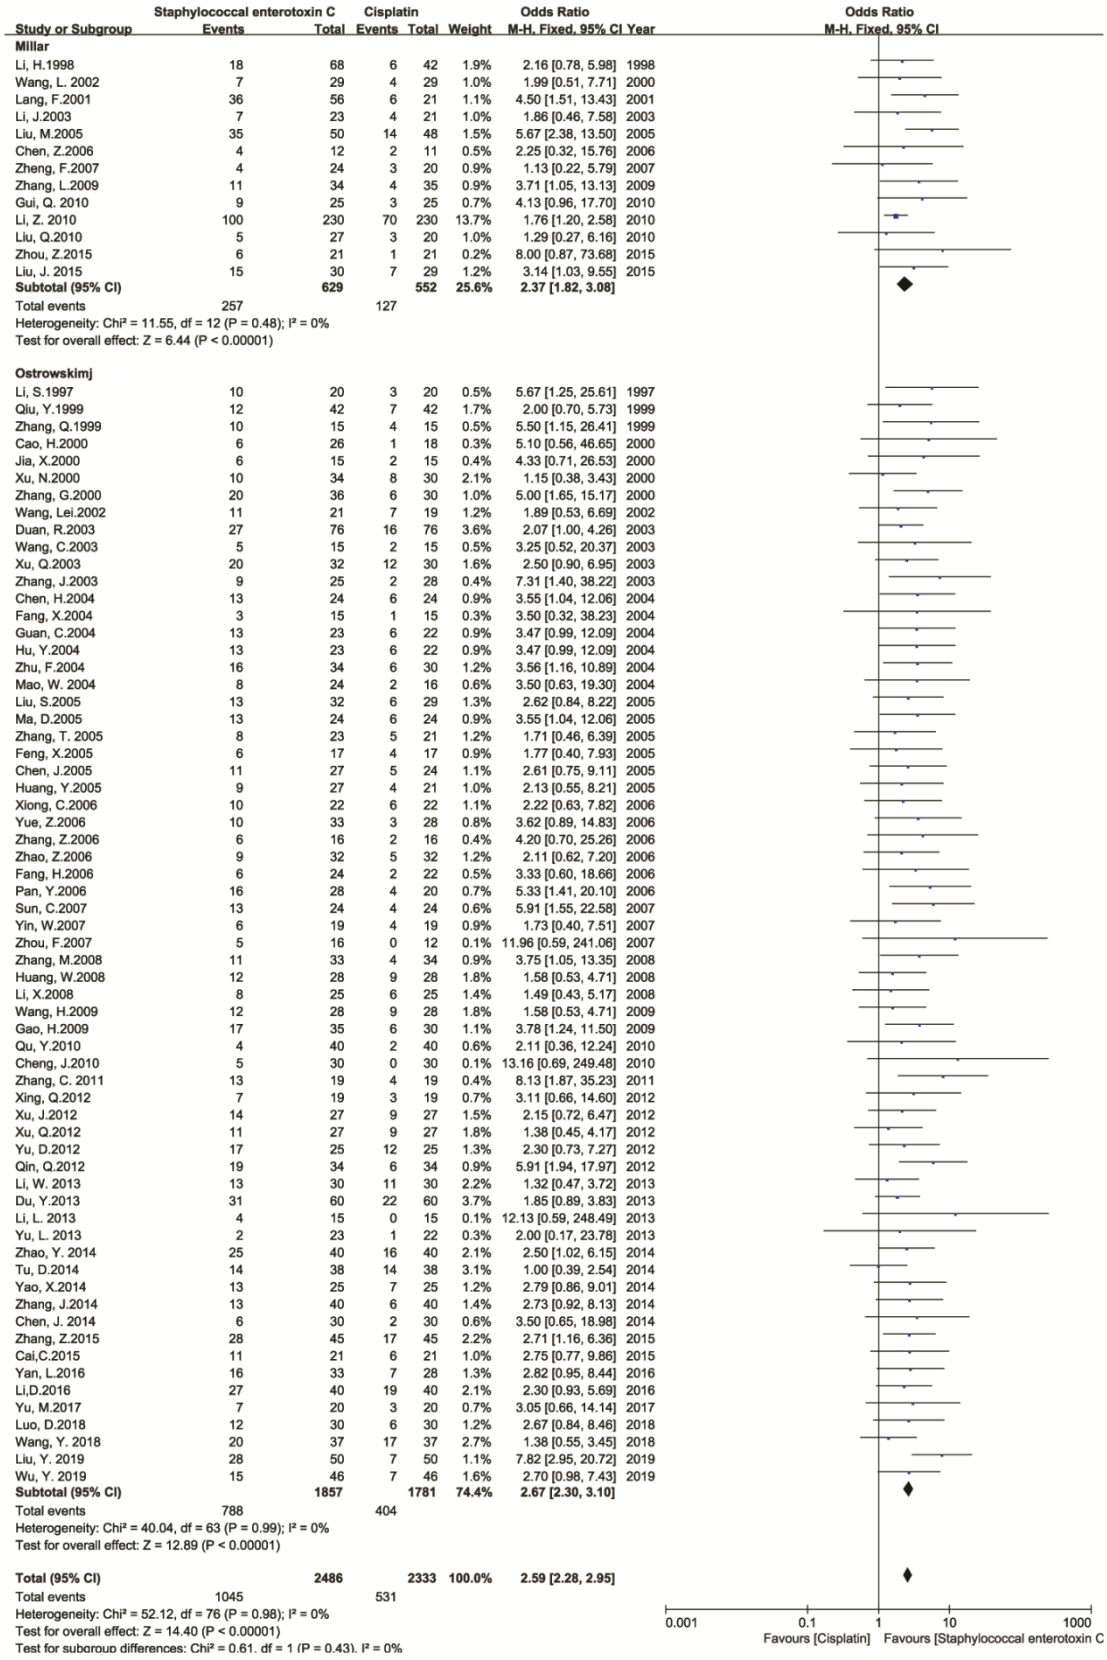

Fig.S58 Subgroups analysis of complete response via evaluation criteria

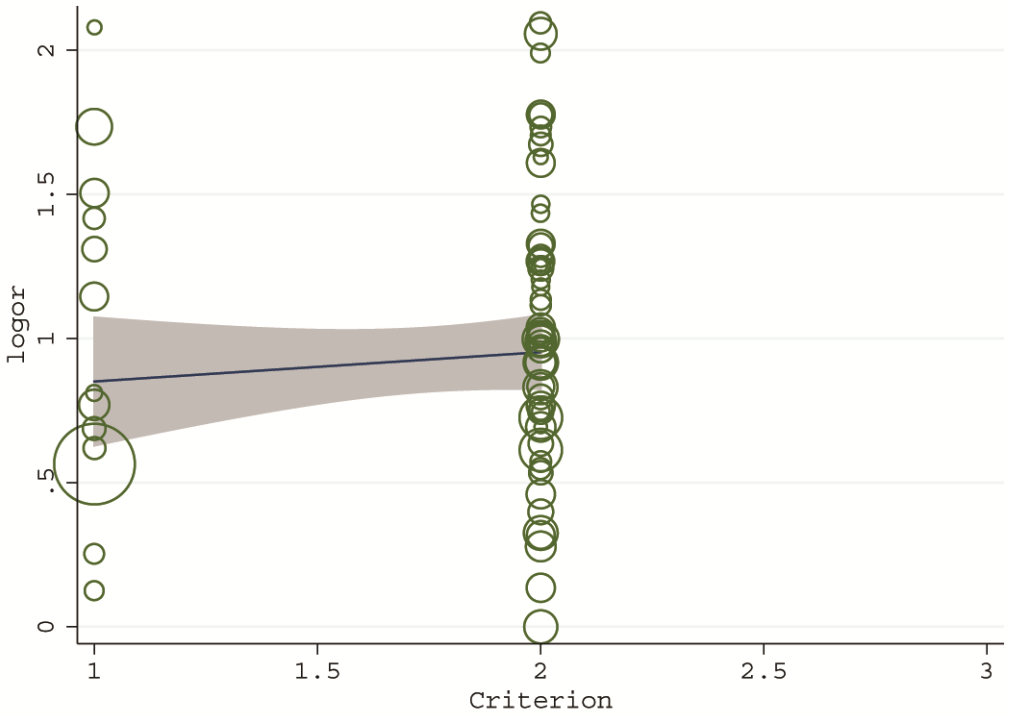

Fig.S59 Meta regression of complete response via evaluation criteria

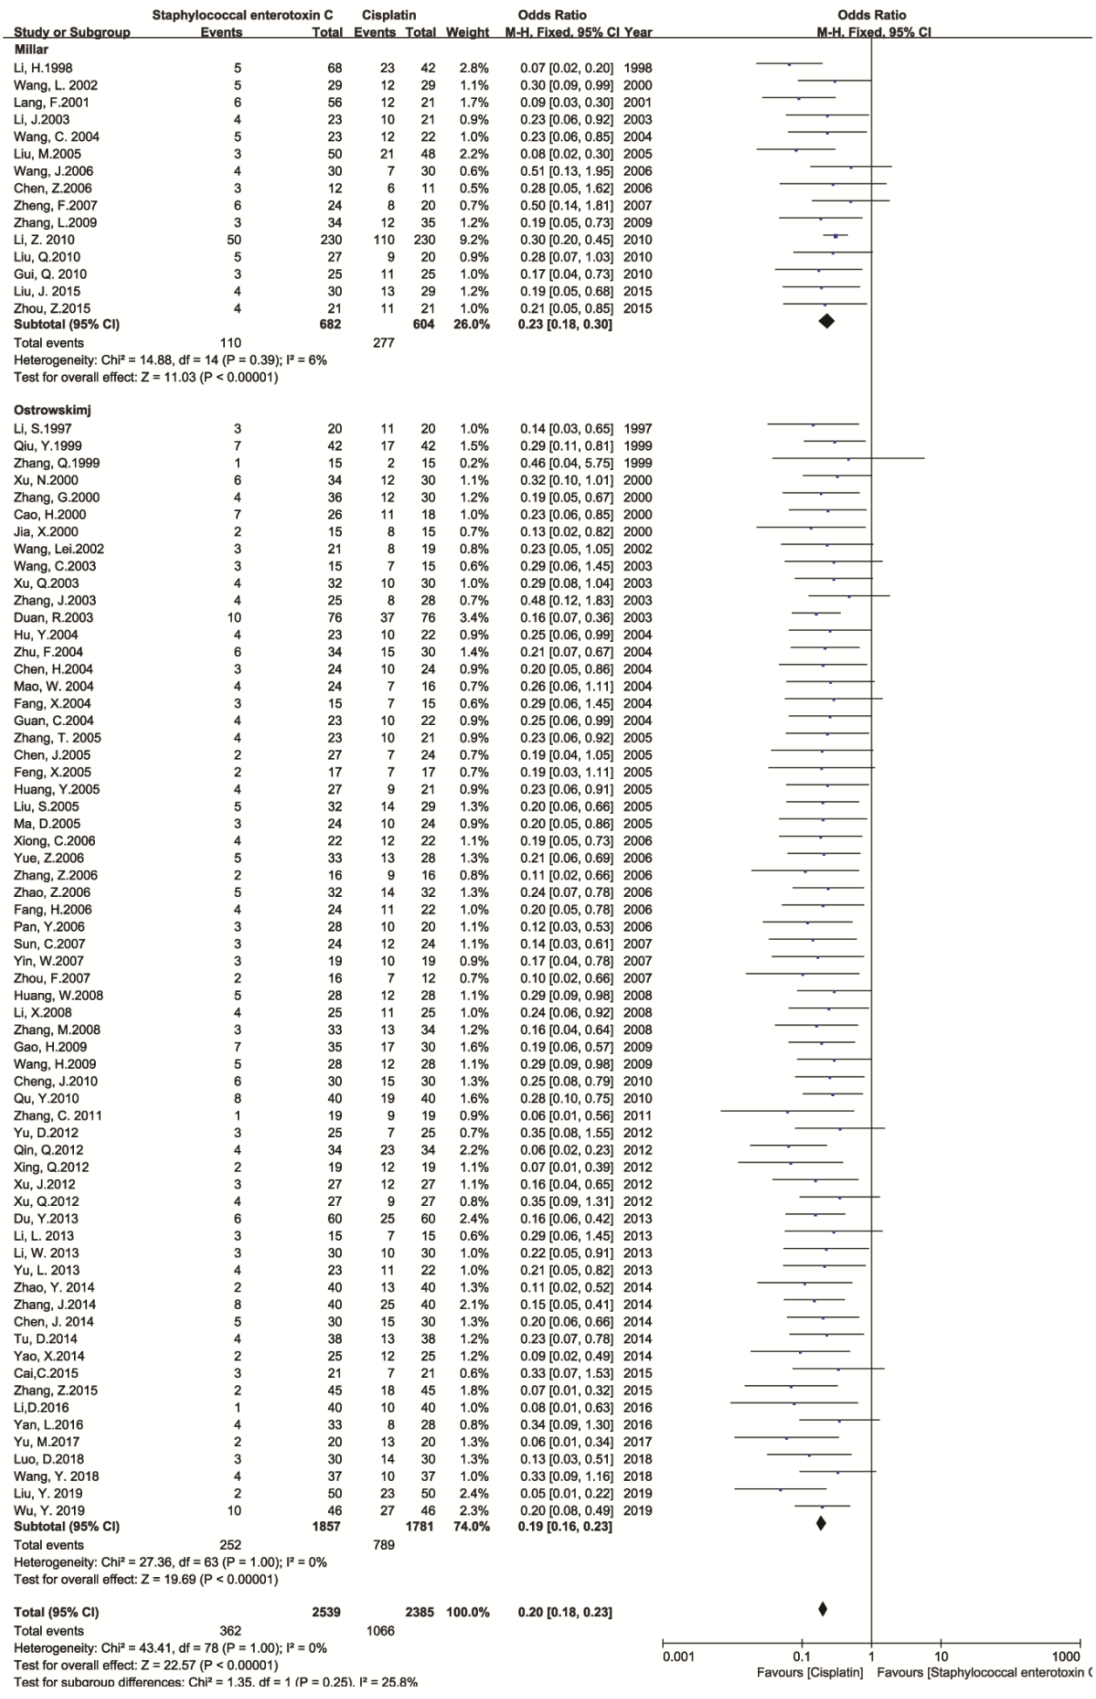

Fig.S60 Subgroups analysis of treatment failure via evaluation criteria

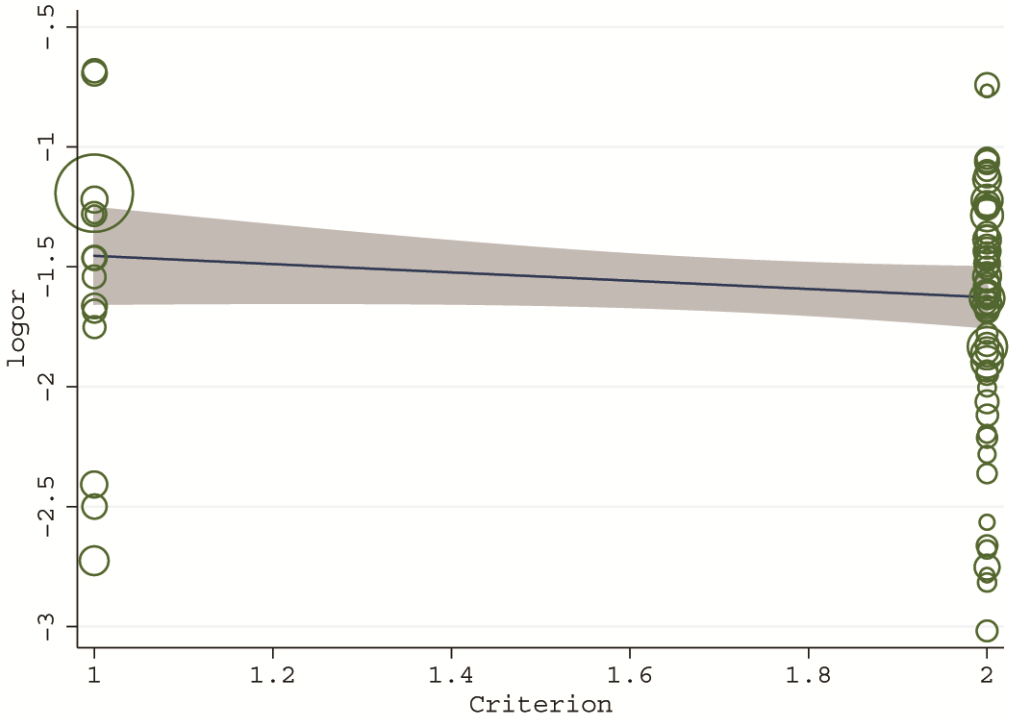

Fig.S61 Meta regression of treatment failure via evaluation criteria

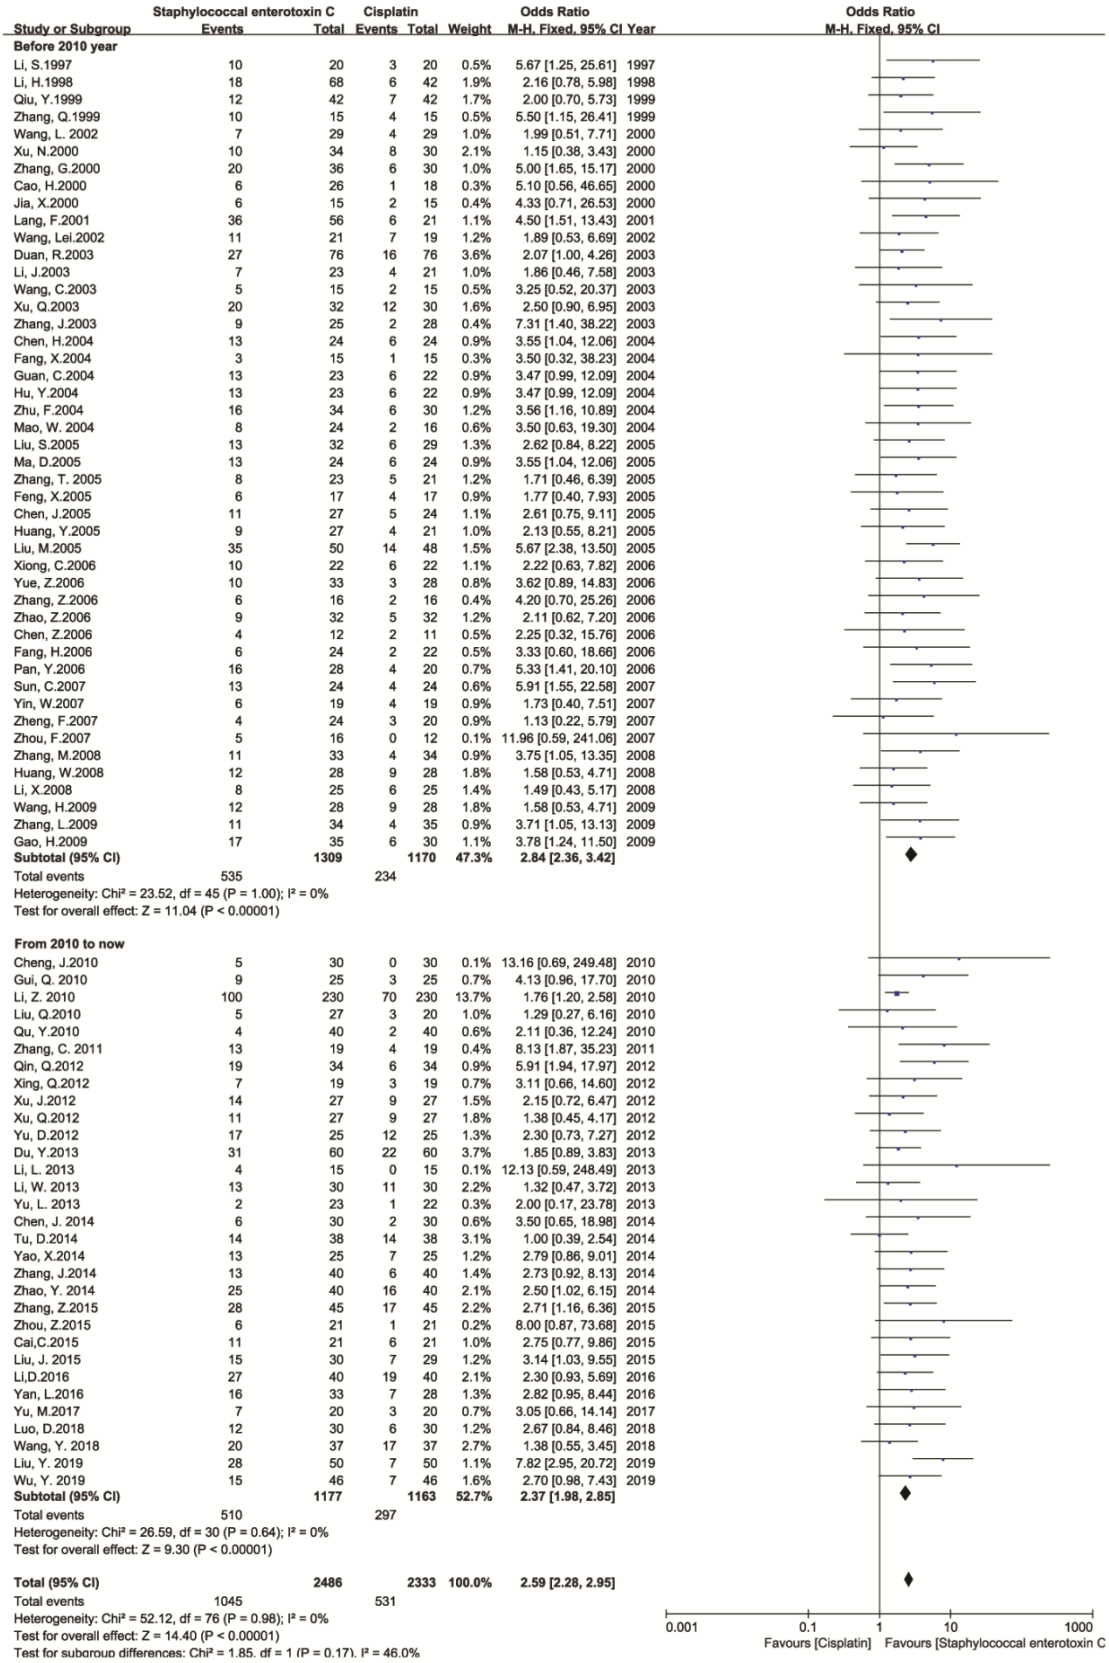

Fig.S62 Subgroups analysis of complete response via publication year

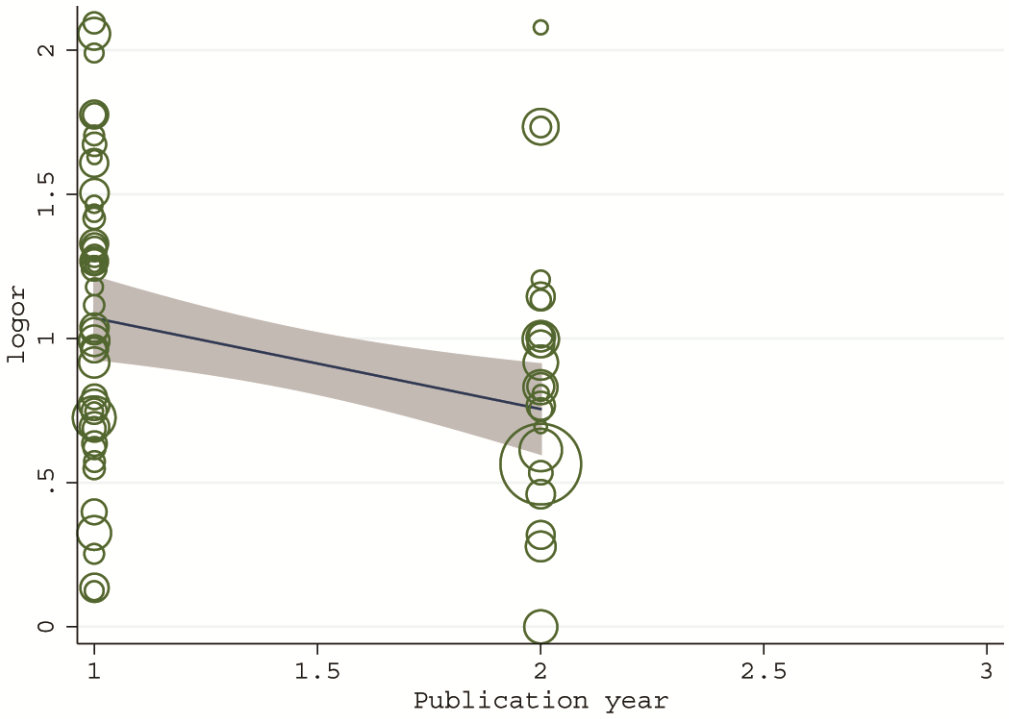

Fig.S63 Meta regression of complete response via publication year

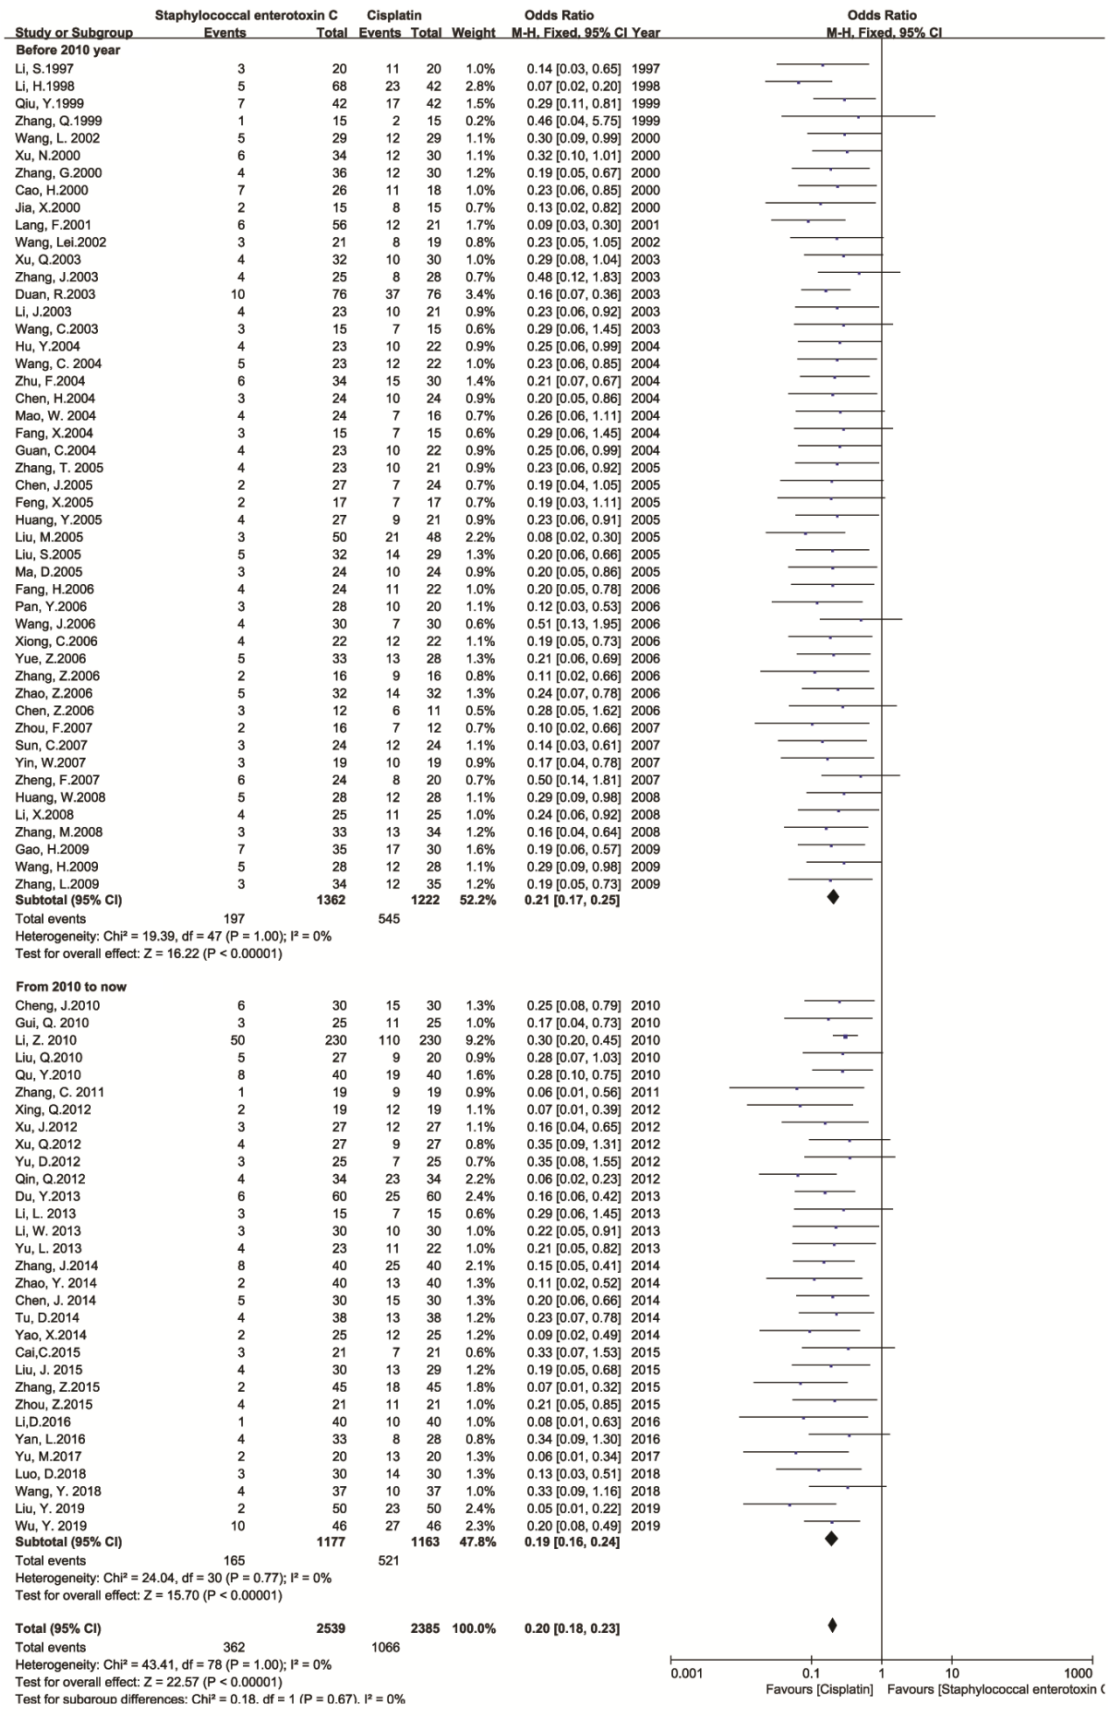

Fig.S64 Subgroups analysis of treatment failure via publication year

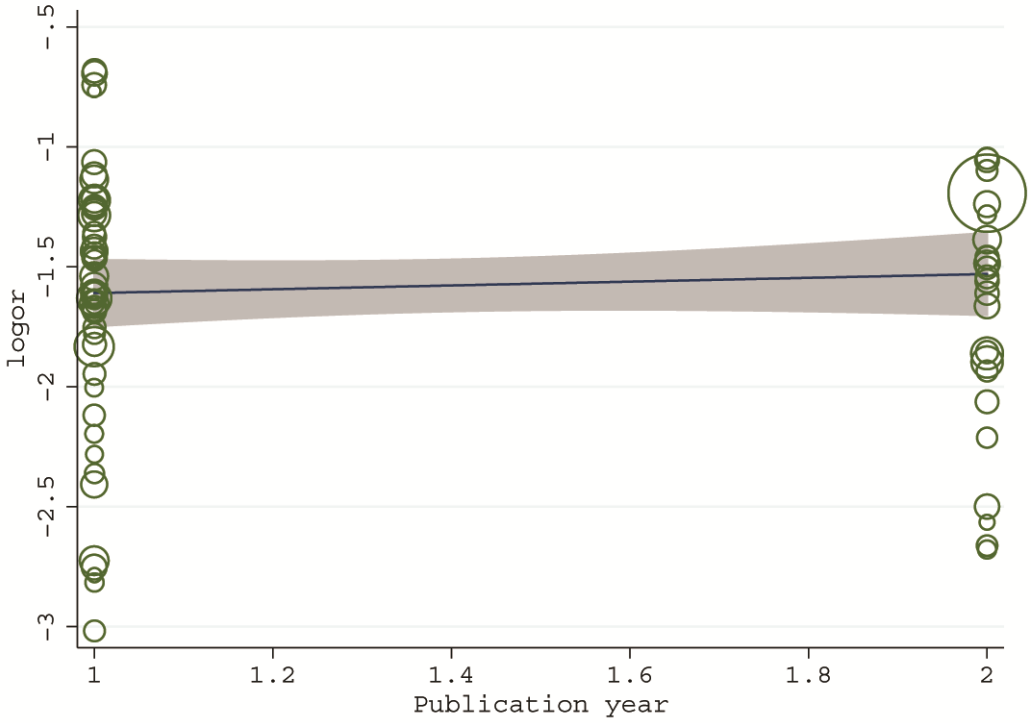

Fig.S65 Meta regression of treatment failure via publication year
