Supplementary Table 1. Reporting of the search process for scientific literature in bibliographic databases*.

	Details of the searches	
	Pubmed	**EMBASE**
Date of search	5 March 2020	5 March 2020
Date span of the search	1999 to 5 March 2020	1999 to 5 March 2020
Search strategies	1. Methimazole OR Methylthiouracil OR Propylthiouracil OR Thiouracil OR Ethylenethiourea OR "Antithyroid Agents"[Mesh] OR ((Antithyroid OR anti-thyroid OR "anti thyroid" OR anti-thyroidal OR antithyroidal OR "anti thyroidal") AND (drug OR drugs OR agent OR agents)) AND cancer 2. ("Thyroid Neoplasms/epidemiology"[Mesh] OR "Thyroid Neoplasms/etiology"[Mesh]) AND (case-control OR cohort) AND risk 3. #1 OR #2 4. Limit #3 to publication date from 1/1/1999 onwards	1. ('malignant neoplasm'/exp AND ('antithyroid agent'/de OR methimazole OR methylthiouracil OR propylthiouracil OR thiouracil OR ethylenethiourea) OR (('risk'/exp OR risk) AND 'thyroid cancer'/exp AND ('case control study'/de OR 'cohort analysis'/exp OR 'cohort analysis'))) 2. Limit #1 to publication date from 1/1/1999 onwards
Total number of summary records retrieved	2451	2609
Total number of summary records retrieved after removing duplicates: 4505		

*Additional, simplified, literature searches with similar keywords were conducted in Google Scholar, Web of Science and the Cochrane Library. A supplementary search in PubMed with keywords for mancozeb and metiram and thyroid cancer was also conducted.
