Reviewer 1 v.1

Comments to the Author

Qianqian Chen and al. report an interresting meta-analsysis about prevalence of lung cancer in CPFE patients showing that lung cancer prevalence is increased in CPFE patients compared to IPF patients.

Though the guidelines of IPF have been updated in 2018, it makes sense to keep those of 2011 into account.

The definition of CPFE could be spelled

Do the papers report the PFTs results? It would be interesting to analyze the impact of FEV1 and FVC.

Are the ethnicity available?
