Quality Assessment

Article ID

_____
(enter ID # from Covidence)

Selection Bias

Are the individuals selected to participate in the study likely to be representative of the target population?

- ◯ Very likely
- ◯ Somewhat likely
- ◯ Not likely
- ◯ Can't tell

What percentage of selected individuals agreed to participate?

- ◯ 80-100% agreement
- ◯ 60-79% agreement
- ◯ less than 60% agreement
- ◯ Not applicable
- ◯ Can't tell

Rate this section

◯ Strong ◯ Moderate
◯ Weak

Study Design

Indicate the study design

- ◯ Randomized controlled trial
- ◯ Controlled clinical trial
- ◯ Cohort analytic (two group pre + post)
- ◯ Case-control
- ◯ Cohort (one group pre + post (before and after))
- ◯ Interrupted time series
- ◯ Other
- ◯ Can't tell

Was the study described as randomized?

- ◯ Yes
- ◯ No

Was the method of randomization described?

- ◯ Yes
- ◯ No

Was the method appropriate?

- ◯ Yes
- ◯ No

Rate this section

◯ Strong ◯ Moderate
◯ Weak

Confounders

Were there important differences between groups prior to the intervention?

- ◯ Yes
- ◯ No
- ◯ Can't tell

(race, sex, martial status/family, age, SES, education, health status, Pre-intervention score on outcome measure)

Indicate the percentage of relevant confounders that were controlled (either in the design (e.g. stratification, matching) or analysis)?	◯ 80 - 100% (most) ◯ 60 - 79% (some) ◯ Less than 60% (few or none) ◯ Can't Tell
Rate this section	◯ Strong ◯ Moderate ◯ Weak

Blinding

Was (were) the outcome assessor(s) aware of the intervention or exposure status of participants?	◯ Yes ◯ No ◯ Can't tell
Were the study participants aware of the research question?	◯ Yes ◯ No ◯ Can't tell
Rate this section	◯ Strong ◯ Moderate ◯ Weak

Data Collection Methods

Were data collection tools shown to be valid?	◯ Yes ◯ No ◯ Can't tell
Were data collection tools shown to be reliable?	◯ Yes ◯ No ◯ Can't tell
Rate this section	◯ Strong ◯ Moderate ◯ Weak

Withdrawals and Drop-Outs

Were withdrawals and drop-outs reported in terms of numbers and/or reasons per group?	◯ Yes ◯ No ◯ Can't tell ◯ Not applicable (i.e. one time surveys or interviews)
Indicate the percentage of participants completing the study. (If the percentage differs by groups, record the lowest).	◯ 80 - 100% ◯ 60 - 79% ◯ Less than 60% ◯ Can't Tell ◯ Not Applicable (i.e. Retrospective case-control)
Rate this section	◯ Strong ◯ Moderate ◯ Weak ◯ Not applicable

Intervention Integrity

What percentage of participants received the allocated intervention or exposure of interest?
- ◯ 80 - 100%
- ◯ 60 - 79%
- ◯ Less than 60%
- ◯ Can't Tell

Was the consistency of the intervention measured?
- ◯ Yes
- ◯ No
- ◯ Can't tell

Is it likely that subjects received an unintended intervention (contamination or co-intervention) that may influence the results?
- ◯ Yes
- ◯ No
- ◯ Can't tell

Analyses

Indicate the unit of allocation
- ◯ Community
- ◯ Organization/Institution
- ◯ Practice/Office
- ◯ Individual

Indicate the unit of analysis
- ◯ Community
- ◯ Organization/Institution
- ◯ Practice/Office
- ◯ Individual

Are the statistical methods appropriate for the study design?
- ◯ Yes
- ◯ No
- ◯ Can't tell

Is the analysis performed by intervention allocation status (i.e. intention to treat) rather than the actual intervention received?
- ◯ Yes
- ◯ No
- ◯ Can't tell

Component Ratings

	Strong	Moderate	Weak
Selection Bias	◯	◯	◯
Study Design	◯	◯	◯
Confounders	◯	◯	◯
Blinding	◯	◯	◯
Data Collection Methods	◯	◯	◯
Withdrawals and Drop-Outs	◯	◯	◯

GLOBAL RATING FOR THIS PAPER
- ◯ Strong (no weak ratings)
- ◯ Moderate (one weak rating)
- ◯ Weak (2 or more weak ratings)

Is there a discrepancy between the two reviewers with respect to the component ratings?
◯ Yes ◯ No
(With both reviewers discussing the ratings)

Indicate the reason for the discrepancy
- ◯ Oversight
- ◯ Differences in interpretation of criteria
- ◯ Differences in interpretation of study

Final decision of both reviewers	◯ Strong ◯ Moderate ◯ Weak
