Appendix C: Cognitive assessment tools and domains measured across the included studies

STUDY	COGNITIVE ASSESSMENT TOOLS	COGNITIVE DOMAINS ASSESSED
ALARCON 2002 [23]	Cognitive Symptoms Inventory[Q]	attention/concentration, pattern recognition/activity management, intermediate memory, initiation of executive function
APPENZELLER 2009 [27]	Mini-Mental State Examination (MMSE)[S], digit span forward [O], reverse numerical sequence[O], logical memory[O], verbal semantic fluency[O], verbal phonemic fluency[O], comprehension[O], digit symbol[O], digit span backward[O]	simple attention, complex attention, memory, visuospatial processing, language, reasoning/problem solving, psychomotor speed, executive function
CALDERON 2017 [24]	Addenbrooke's Cognitive Examination – Revised (ACE-R)[O], Cambridge Neuropsychological Test Automated Battery (CANTAB)[O], Rapid Visual Information Processing (RVP)[O], Paired Associates Learning (PAL)[O], Stockings of Cambridge (SOC)[O]	Attention, spatial memory, learning, executive function, visual sustained attention, episodic learning and memory, visual spatial domains, spatial planning and motor control
FRITTOLI 2016 [28]	Picture Arrangement Test[O], Code Test[O], Picture Completion Test[O], Cube Test[O], Digit Test[O], Vocabulary Test[O], Rey Complex Figure Test (RCFT)[O], Boston Naming Test[O], FAZ Verbal Fluency Test[O], Trail Making Test[O], Stroop Neuropsychological Screening Test[O]	temporal reasoning, processing speeds, visual perception, spatial reasoning, immediate and working memory, semantic memory, general intelligence, perceptual organization, planning, praxis and memory, visual recognition, naming capacity, verbal phonological fluency, visual tracking, sustained attention and motor dexterity, selective attention, inhibitory control, mental flexibility
PANOPALIS 2007 [29]	Hopkins Verbal Learning Test- Revised (HVLT-R)[O]	Episodic verbal learning, memory

PLANTINGA 2018 [30]	Picture Sequence Memory Test [O], List Sorting Working Memory Test [O], Pattern Comparison Processing Speed Test [O], Flanker Inhibitory Control and Attention Test [O], Dimensional Change Card Sort Test [O]	episodic memory, working memory, processing speed, attention and inhibitory control, cognitive flexibility
POOLE 2007 [31]	MMSE[S]	Orientation, memory, attention, ability to name, follow verbal and written commands, visuo-spatial skills (copy two overlapping pentagons)
UTSET 2015 [32]	Brief cognitive symptoms index (BCSI)[Q]	Cognitive impairment
WILLIAMS 2011 [25]	Wechsler Abbreviated Scale of Intelligence (WASI)[O], Wide Range Assessment of Memory and Learning 2 (WRAML-2)[O], Delis-Kaplan Executive Function System[O], Comprehensive Trail-Making Test parts 1 and 5[O], Stroop Color and Word Test (SCWT)[O], Wechsler Adult Intellectual Scale III[O], Wechsler Intellectual Scale for Children[O], Purdue Pegboard[O], Wide Range Achievement Test[O]	Memory, language and verbal reasoning, visual spatial reasoning, executive functioning, psychomotor speed, motor dexterity, academic functioning
ZELKO 2012 [33]	WASI[O], Working Memory and Processing Speed subscale of WASI[O], Wide Range Assessment of Memory and Learning 2[O], Woodcock-Johnson III Tests of Achievement (WJ-III) [O], Conners' Continuous Performance Test II (CPT-II)[O], Behaviour Rating Inventory of Executive Functioning (BRIEF)[Q]	working memory, psychomotor speed, ability to learn and recall new verbal and visual info, basic reading/decoding ability, written arithmetic skills, sustain attention, inhibit impulsive responses, executive functioning
KATZ 2008 [34]	Medical Outcomes Study Cognitive Function scale[Q]	Overall cognition

TAM 2008 [26]	MMSE[S], Chinese version of the Mattis Dementia Rating Scale (CDRS-IP)[O]	Orientation, memory, attention, language, construction skills, executive function, verbal fluency and cognitive and motor programming
UTSET 2006 [35]	National Adult Reading Test-revised[O], California Verbal Learning Test (CVLT)[O], RCFT[O], SCWT[O], Trail Making Test[O], Symbol Digit Modalities Test[O], WASI[O], Controlled Oral Word Association Test (FAS)[O], Animal Naming[O], Halstead-Reitan battery[O]	premorbid verbal IQ, verbal and visual memory, attention, processing speeds, working memory, motor speed, language function
KANAPATHY 2019 [36]	Montreal Cognitive Assessment (MoCA)[O]	attention and concentration, executive functions, memory, language, visuoconstructional skills, conceptual thinking, calculations, orientation

O= objective cognitive measure; Q= self-report questionnaire; S= cognitive screening measure.
