

Supplementary Figure 1. Quality and applicability charts for included articles

A

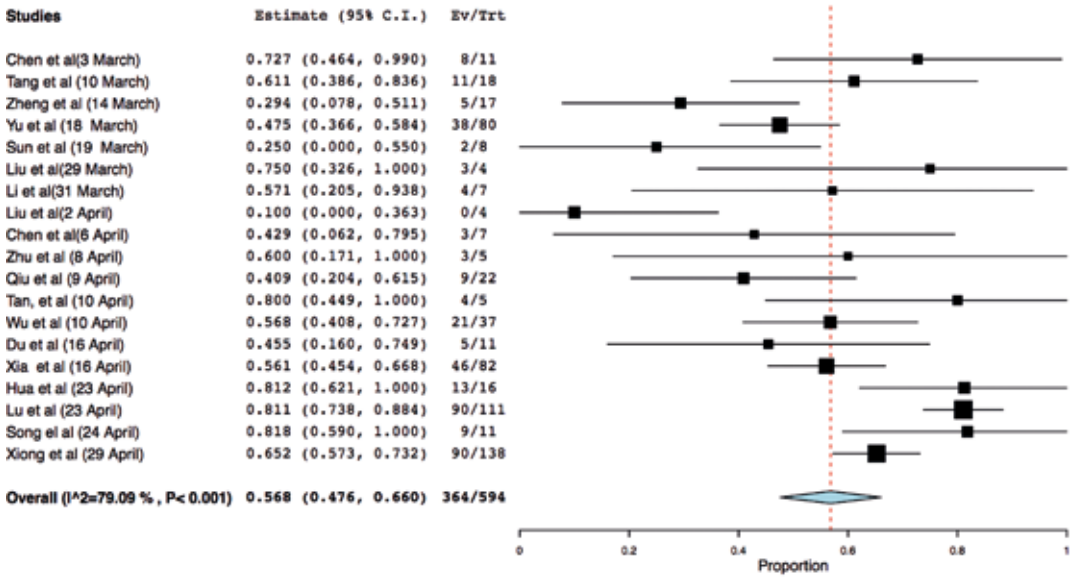

B

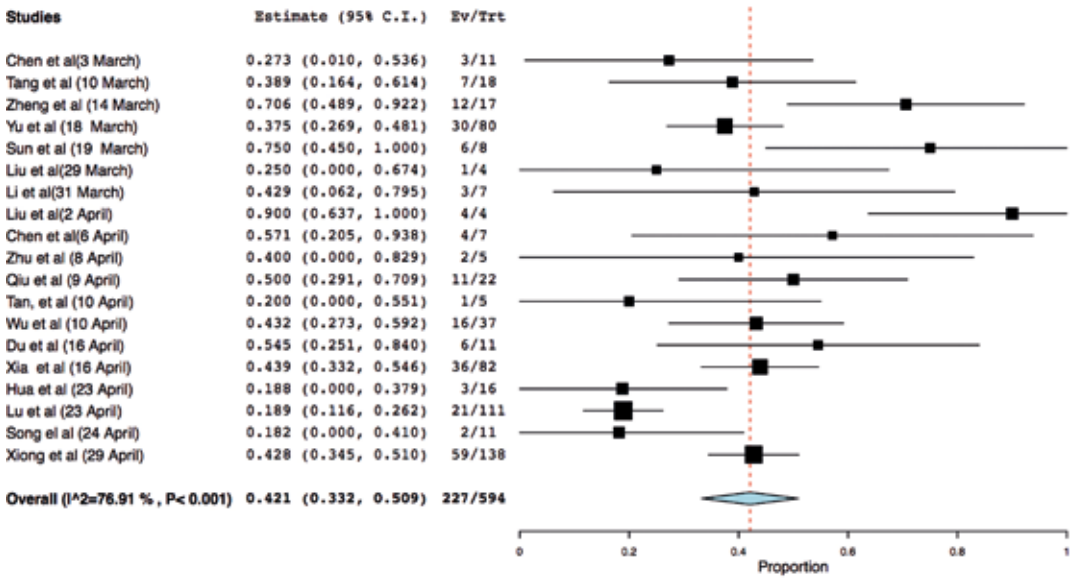

Supplementary Figure 2. Forest plot shows pooled incidence of GGO, pulmonary patches and consolidations detected by CT chest among all patients from selected studies. Squares indicate incidence, and size reflects statistical weight. Horizontal lines indicate 95% confidence interval (CI) of each included study. Dashed line represents overall pooled estimate from meta-analysis, and diamond represents 95% CI of overall frequency

Supplementary Figure 3. Forest plot shows pooled incidence of unilateral and bilateral distribution detected by CT chest among all patients from selected studies. Squares indicate incidence, and size reflects statistical weight. Horizontal lines indicate 95% confidence interval (CI) of each included study. Dashed line represents overall pooled estimate from meta-analysis, and diamond represents 95% CI of overall frequency
