Table S2. Risk of Bias Assessment for Cohort Studies (Newcastle-Ottawa Quality Assessment Scale)

	SELECTION				COMPARABILITY		OUTCOME		
	Representativeness of exposed cohort	Selection of non exposed cohort	Ascertainment of exposure	Outcome not present at start of study	Most important factor	Additional factor	Assessment of outcome	Duration of follow-up	Adequacy of follow-up of cohorts

Table S3. Risk of Bias Assessment for Case Series Included (Joanna Biggs Institute Tool)

Author: Saiprasertkit **Year:** 2018	Yes	No	Unclear	N/A
Were there clear criteria for inclusion in the case series?	X			
Was the condition measured in a standard, reliable way for all participants included in the case series?	X			
Were valid methods used for identification of the condition for all participants included in the case series?			X	
Did the case series have consecutive inclusion of participants?			X	
Did the case series have complete inclusion of participants?			X	
Was there clear reporting of the demographics of the participants in the study?	X			
Was there clear reporting of clinical information of the participants?	X			
Were the outcomes or follow up results of cases clearly reported?	X			
Was there clear reporting of the presenting site(s)/clinic(s) demographic information?	X			
Was statistical analysis appropriate?				X
