Quality Evaluation

	The selection of study population					Comparability between groups	Outcome measurement			
Researchers	**Time**	**Representativeness of exposure cohort**	**Choice of non-exposed cohort**	**Determination of exposure**	**No ending event at the beginning**	**Consider the comparability of the exposed group and the unexposed group when designing and statistical analysis**	**Outcome assessment**	**Is the follow-up adequate**	**Completeness of follow-up**	**Score**
