Theme	Definition	When to use	When not to use
Accessibility	The interventions include approaches deployed to make the tests affordable and accessible to the population	Apply this code to mean strategies that brought testing closer to the people, covered more people, in addition to making testing affordable. Interventions that fall under this could include increasing number of testing facilities; categories of individuals tested among others.	Do not use this code if interventions are proposed, but have not been implemented
Diagnostics	This covers all the diagnostic assays available and approaches to ensuring they are in plenty	Apply this code to capture all strategies that resulted in new or more testing assays on the market. This could include use of both PCR and RDTs, repurposing manufacturing plants for manufacturing of diagnostics among others	Do not use this code if there is no evidence that this indeed happened.
Regulatory & Legislation	Regulatory and legislative frameworks that allowed several players onto the market to help boost availability of testing	Apply this code where there is indication that existing legislation and regulatory frameworks were made more accommodative and flexible to handle the immediate challenges around COVID-19 testing. Use if there is an indication that the red tape was reduced.	Do not use this code if the frameworks were more prohibitive than accommodative
Integration	Integration of COVID-19 testing in the existing health care systems without having to reinvent the wheel	Apply this code to descriptions on where countries used the already existing systems to increase testing. This could include systems available for the other diseases e.g., Malaria, TB, HIV among others.	Do not apply this code if there is no evidence that these systems were actually leveraged. Do not include if these were mere proposals, and did not happen.

Personnel	The number of personnel available to do COVID-19 testing as well as approaches that improve capacity of the personnel to do COVID-19 testing	Apply this code to strategies that involved increasing capacity and number of for the human resources.	Do not apply this code to criteria that does not relate to increasing number of personnel available for COVID-19 testing. Also do not include if there is no indication of such trainings
Technology & Innovation	Interventions that leverage technology and also use the available testing systems more efficiently.	Apply this code in instances where innovative ways to increase testing were adopted. This could include better use of technology and testing systems., as well as efficient testing approaches.	Do not apply this code if the routine or expected is what has been done
Collaboration	Countries develop partnerships both in country and out of the country to help with increased testing. These partnerships are aimed at supporting countries to expand testing.	Apply this code to instances where countries created partnerships to help with increased testing. These partnerships could be aimed at increasing testing equipment, reagents, trainings, guidelines among others	Do not use this code if partnerships or collaborations did not lead to influence testing
