SUPPLEMENTARY DATA

Supplementary Table SIII A summary of unanswered questions regarding PCOS natural history from reproductive, psychological and oncological feature perspectives.

General question (s)	
1	What reproductive, psychological and oncological feature changes occur over time, in women with PCOS compared to those without PCOS across the life course?
Specific question (s)	
1	What are the changes in reproductive hormones (LH, FSH and LH/FSH ratio) and AMH over time in women with PCOS?
2	How does biochemical hyperangrodenism (such as total and free T, FAI and A_4) change over time across the life course?
3	Does mFG score change across the life course and across different ethnicity in women with PCOS and how would this impact diagnosis and later quality of life?
4	What are the changes in menstrual cycle regularity over time in women with PCOS?
5	Does the risk of endometrial or uterine cancer or breast cancer over time differ between women with and without PCOS?
6	Does the risk of depression and anxiety over time differ between women with and without PCOS?
Other question (s)	
1	What standard assays and cutoffs can be universally used in assessing biochemical hyperandrogenism?
2	What are the phenotypic variations in AMH levels over time in women with PCOS?
3	What should be the standard follow-up time for assessing each of the PCOS core outcomes?
