Table S4. Summary of the quality appraisal for the included studies using JBI (Joanna Briggs Institute) critical appraisal checklist for prevalence studies

Author	1. Was the sample frame appropriate to address the target population?	2. Were study participants sampled in an appropriate way?	3. Was the sample size adequate?	4. Were the study subjects and the setting described in detail?	5. Was the data analysis conducted with sufficient coverage of the identified sample?	6. Were valid methods used for the identification of the condition?	7. Was the condition measured in a standard, reliable way for all participants?	8. Was there appropriate statistical analysis?	9. Was the response rate adequate, and if not, was the low response rate managed appropriately?	Score
Bessa et al, 2009	yes	unclear	unclear	yes	yes	yes	yes	yes	unclear	6
