Questions

Risk of Bias

1. Was the allocation sequence adequately gereated and applied?
2. Were the groups similar at baseline or adjusted for confounders?
3. Was the allocation adequately concealed?
4. Are the animals randomly housed during the experiment?
5. Were the caregivers/investigators during the course of the exp adequately blinded?
6. Were animals selected at random during outcome assessment?
7. Was the outcome assessment adequately blinded?
8. Were incomplete outcome data adequately addressed?

Quality factors:

1. Is any blinding reported?
2. Is any randomisation reported?
3. Is the sample size calculation reported?
4. Are housing conditions reported?
5. Is ethical approval reported?
6. Are any conflicts of interest reported?
