Supplementary Table 2. Characteristics of included studies on pediatric psoriasis for metabolic comorbidities

Source (Country)	Age range (yr)	Study populations (psoriasis/control)	Study design	Data source	Exposure variable	Definition of psoriasis	Comorbidities	Definition of comorbidities
Cohen et al.[34], 2008 (Israel)	0～14	585/19,697	Cross-sectional	EHR database	Psoriasis	Diagnosis in the medical records	Diabetes	Diagnosis in the medical records
Kimball et al.[11], 2012 (United States)	0～18	7,404/37,020	Case-control	EHR database	Psoriasis	Diagnosis in the medical records†	Obesity, Hypertension, Diabetes, Dyslipidemia	Diagnosis in the medical records†
Zhu et al.[23], 2012 (China)	0～15	332/146	Case-control	Clinic recruitment	Plaque psoriasis	Clinical diagnosis	Obesity	Body mass index
Goldminz et al.[35], 2013 (United States)	9～17	20/20	Case-control	Clinic recruitment	Psoriasis or psoriatic arthritis	Clinical diagnosis	Metabolic syndrome	Criteria described by de Ferranti et al.[37]
Paller et al.[24], 2013 (International study*)	5～17	409/205	Case-control	Clinic recruitment	Plaque psoriasis	Clinical diagnosis	Obesity	Body mass index
Torres et al.[12], 2014 (Portugal)	5～15	20/27	Case-control	Clinic recruitment	Plaque psoriasis without psoriatic arthritis	Clinical diagnosis	Obesity, Hypertension, Diabetes, Dyslipidemia, Metabolic syndrome	Body mass index (obesity), blood pressure (hypertension), lab values (diabetes and dyslipidemia), criteria described by de Ferranti et al.[37] (metabolic syndrome)
Augustin et al.[13], 2015 (Germany)	1～18	1,313/291,868	Cross-sectional	EHR database	Psoriasis	Diagnosis in the medical records‡	Obesity, Hypertension, Diabetes, Dyslipidemia	Diagnosis in the medical records‡
Mahé et al.[25], 2015 (France)	2～18	261/261	Case-control	Clinic recruitment	Psoriasis	Clinical diagnosis	Obesity, Hypertension, Diabetes, Dyslipidemia	Body mass index (obesity), history taking (hypertension, diabetes, dyslipidemia)
Tom et al.[26], 2016 (United States)	0～18	44/44	Case-control	Clinic recruitment	Psoriasis	Clinical diagnosis	Obesity	Body mass index
Lee et al.[27], 2016 (Australia)	5～16	135/73	Case-control	Clinic recruitment	Psoriasis	Clinical diagnosis	Obesity, Metabolic syndrome	Body mass index (obesity), criteria described by the International Diabetes Federation[38] (metabolic syndrome)

Supplementary Table 2. Continued

Source (Country)	Age range (yr)	Study populations (psoriasis/control)	Study design	Data source	Exposure variable	Definition of psoriasis	Comorbidities	Definition of comorbidities
Choon et al.[28], 2016 (Malaysia)	5～17	92/115	Case-control	Clinic recruitment	Psoriasis	Diagnosis in the medical records ‡	Obesity	Body mass index
Kwa et al.[29], 2017 (United States)	0～17	1,506/ 4,857,674	Cross-sectional	EHR database	Psoriasis	Diagnosis in the medical records †	Obesity, Hypertension, Diabetes, Dyslipidemia	Diagnosis in the medical records †
Ergun et al.[30], 2017 (Turkey)	0～18	267/151	Case-control	Clinic recruitment	Psoriasis	Clinical diagnosis	Obesity	Body mass index
Hunjan et al.[31], 2018 (United States)	0～18	550/1,100	Case-control	EHR database	Psoriasis	Diagnosis in the medical records	Obesity, Hypertension, Diabetes, Dyslipidemia, Metabolic syndrome	Body mass index (obesity), Diagnosis in the medical records (hypertension, diabetes, dyslipidemia, metabolic syndrome)
Caroppo et al.[33], 2019 (Italy)	4～16	52/52	Case-control	Clinic recruitment	Plaque psoriasis	Clinical diagnosis	Hypertension	Blood pressure
Paller et al.[32], 2019 (United States)	4～17	7,686/30,744	Case-control	EHR database	Psoriasis	Diagnosis in the medical records †	Obesity, Hypertension, Diabetes, Dyslipidemia	Diagnosis in the medical records †

EHR, electronic health record. *Including the Americas (Brazil, Canada, Chile, and the United States), Europe (Italy, Netherlands, Turkey, and United Kingdom), and Asia (Malaysia). Based on International Classification of Diseases (ICD) †9th revision; ‡10th revision.
