Study selection criteria

Inclusion criteria	Exclusion criteria
Time frame data collection: data collection finished after 1/1/2005 Geographic location: data collection in Germany Setting: no restrictions Participants: no restrictions Reported outcomes: HBV vaccination coverage in humans	Time frame data collection: data collection finished before 1/1/2005 Geographic location: no data from Germany Reported outcomes: no report of vaccination coverage

Time frame publication:
published after 01/01/2005
 	
Study design:
• original study data of observational studies
  ○ cross-sectional studies
  ○ cohort studies
  ○ cases of case-control studies
  ○ case series
• surveillance data
• secondary/registry data
• meta-data from systematic reviews
 	
Type of publication:
Original work with clear origin of analysed data
• articles in scientific journals
• reports
• dissertations
• conference abstracts including data on research question plus additional information from author
 	
Peer review:
no restriction
	Time frame publication:
	Published before 01/01/2005
	
	Study design:
	Expert opinions, narrative reviews, editorials, comments
	
	Type of publication:
	• Non-published data
	• Abstracts: No full text existing or available for study team, no relevant data on outcome in the abstract, no consultation of the data provider possible
	• Data already used in other publication (Publications reporting identical outcomes of the same study and no new and relevant aspects according to the research questions) → publication with more relevant information will be included
	
	Availability:
	• No full text available

Publication language: no restriction Availability: • full text available • abstracts if additional information available Quality standards: • report of n study population • description of setting/study population • year of data collection • study tool for outcome	• Abstract with no additional information from author Quality standards: • No report of n study population • No description of setting/study population • No year of data collection reported • No study tool for outcome reported
