Supplementary Figure 1

Risk of bias assessment of included studies. Green denotes low risk of bias, red denotes high risk of bias, and grey denotes non-applicable domain.

	Selection bias		Misclassification bias			Reporting bias		Confounding bias	
	Exclusion of abnormal pre-radiotherapy TFT	Exclusion of prior thyroid disease	Exclusion of secondary hypothyroidism	Regular TFT monitoring after radiotherapy	Adequate follow-up duration (median >3 years)	Systematic evaluation of DVH parameter(s)	Systematic evaluation of cut-off value(s)	Multivariable adjustment for clinical factor(s)	Multivariable adjustment for thyroid volume
Studies on NTCP model or radiation dosimetric nomograms (n=10)
